

Exhibit D6 - Invalidity of '982 Patent in view of U.S. Patent Application No. 2008/0166001

U.S. Patent Application No. 2008/0166001 to Hankey (“Hankey”). Filed June 28, 2007, and published July 10, 2008.

Hankey qualifies as prior art to U.S. Patent No. 10,491,982 (“the '982 patent”) under at least pre-AIA 35 U.S.C. § 102(b) because the earliest effective filing date of each of the claims of the '982 patent is not earlier than July 10, 2008. In particular, the '982 patent includes at least one element that is not supported by a disclosure filed before July 10, 2008. Further, the filing dates of the claims of the '982 patent is described in Appendix A. Claims 1–20 of the '982 Patent are invalid under 35 U.S.C. § 103(a) because they are obvious over Hankey in view of the background knowledge and ordinary creativity of a person having ordinary skill in the art at the time the Patent was invented; and (b) obvious over Hankey in view of one or more of the references listed in Appendix A.

In addition to the disclosures listed below, Apple incorporates by reference the teachings and disclosures of U.S. Patent Application No. 2008/0166001 (“’001”).

Claim	U.S. Patent Application No. 2008/0166001 (“’001”)
[1(a)] A system comprising:	<p>Hankey discloses a system including a wireless headset and a portable device. “Headsets may communicate with the host device via a wired and/or wireless connection. Such connections may for example occur through a cable/connector arrangement. On the other hand, communication can occur through the air (no physical connection is needed). The type of connection may be widely varied. Wired protocols may for example be based on Universal Serial Bus (USB) interfaces, Firewire interfaces, conventional serial interfaces, parallel interfaces, and the like. Wireless protocols may, for example, be based on short range transmissions of voice data. Such protocols may further be used to create personal area networks between the portable device and the host device such as a cellular phone. Some examples of wireless protocols that may be used include Bluetooth, Home RF, iIEEE 802.11, IrDA, Wireless USB, and the like. The communication may be embodied as a system on a chip (SOC).”</p> <p>(Para. [0103])</p> <p>“Also, while some embodiments of the present invention can include <u>headset communication with a cellular phone and/or personal media device</u> (”</p>

Exhibit D6 - Invalidity of '982 Patent in view of U.S. Patent Application No. 2008/0166001

Claim	U.S. Patent Application No. 2008/0166001 ('982 Patent)
	<p>similar to that sold under the trademark ipod® by Apple Inc. of Cupertino, Calif. The present invention can also be incorporated into headsets configured for use with an electronic device.”</p> <p>(Para. [0329])</p>  <p>FIG. 10A</p> <p>(Para. 10A)</p>

Exhibit D6 - Invalidity of '982 Patent in view of U.S. Patent Application No. 2008/0166001

Claim	U.S. Patent Application No. 2008/0166001 ('982 Patent)
<p>[1(b)] headphones comprising a pair of first and second wireless earphones to be worn simultaneously by a user, wherein the first and second earphones are separate such that when the headphones are worn by the user, the first and second earphones are not physically connected, wherein each of the first and second earphones comprises:</p>	<p>Hankey discloses a wireless headset that may include speakers for both ears.</p> <p>“The present invention relates to headsets and methods for manufacturing communication devices that are worn on a user's head in order to allow hands-free communication with a host device such as a computer, phone handset, cell phone, or the like. Headsets can include one or more speakers (in proximity to the user's ears) and/or one or more microphones for audio input.”</p> <p>(Para. [0091])</p> <p>To the extent Hankey does not expressly disclose two identical, separate wireless earphones, it would have been obvious to a person of ordinary skill in the art to provide two separate wireless earphones given the disclosures of Hankey in view of the teachings of Chiloyan. Additional information regarding such combinations, and motivation therefor, is set forth in Appendix A, which is incorporated by reference herein.</p>
<p>[1(c)] a body portion that comprises:</p>	<p>Hankey discloses a wireless headset that includes a primary housing, with an earbud member extending therefrom from which an elongated portion extends:</p> <p>“According to one aspect of the invention, the headset can be embodied as a primary housing and an earbud member extending therefrom. The earbud member can be formed to or integrally formed with the primary housing. Various components can be provided within the confines of the earbud member and the primary housing. In fact, more components depending on the needs of the device. The components can be widely varied. Examples of operational components can include speakers, microphones, connectors, buttons, displays, indicators, battery, and associated processing circuitry. Generally, the earbud member includes at least a speaker while the primary housing includes at least a microphone and a processor.</p>

Exhibit D6 - Invalidity of '982 Patent in view of U.S. Patent Application No. 2008/0166001

Claim	U.S. Patent Application No. 2008/0166001 (“’982 Patent”)
	<p>microphone (although this is not a requirement). Depending on their size, additional components of the headset. In one embodiment, the primary interface button, indicator or display (e.g., LEDs), battery, microphone, accompanying circuitry while a speaker, a processor, and its accompanying earbud. The button can be located on one end of the main housing. A user can perform various functions (e.g., terminating calls).”</p> <p>(Para. [0093])</p> <p>“FIG. 1 is a simplified block diagram of headset 10 in accordance with the present invention. Headset 10 can be configured to be a small compact unit in the form of an earbud to be placed in the ear. The headset can include a primary housing 11 and the primary housing. Earbud 12 can fit into an ear thereby placing the primary housing 11 in the ear. Each of these members can surround and protect various internal components and various external components associated with operating the headset. The primary housing 11 may include electrical components that provide specific functions for the electronic device. The primary housing 11 may generally be associated with generating, receiving, and/or transmitting signals to the device.”</p> <p>(Para. [0107])</p>

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
