

Exhibit D8 - Invalidity of '982 Patent in view of U.S. Patent Application No. 2008/0076489

U.S. Patent Application No. 2008/0076489 to Rosener ("Rosener"). Filed August 7, 2006, and published

Rosener qualifies as prior art to U.S. Patent No. 10,491,982 ("the '982 patent") under at least pre-AIA 35 U.S.C. 102(b) and 103. Claims 1-20 of the '982 Patent are invalid as (a) obvious over Rosener itself or Rosener in view of the background knowledge of a person having ordinary skill in the art at the time the '982 Patent was invented; and (b) obvious over Rosener and the references listed in Appendix A, combined as set forth herein.

In addition to the disclosures listed below, Apple incorporates by reference the teachings and disclosures

Claim	U.S. Patent Application No. 2008/0076489 ("Rosener")
<p>[1(a)] A system comprising:</p>	<p>Rosener discloses a system including a data source and wireless earphones.</p> <p>"The present invention relates to wireless systems. More particularly, the invention relates to wireless communication between a data source and two or more and separated wireless data sinks such as, for example, wireless earphones." (Para. [0001])</p> <p>"FIG. 5 is an illustration of a user 500 wearing a wireless headset comprising earphones 502, 504, in accordance with an embodiment of the present invention. The first and second wireless earphones 502, 504 comprises a housing containing a speaker, a microphone, a transceiver and a battery. . . . As explained in detail below, the receiver of the first and second earphones 502, 504 is operable to communicate with one or more data devices (e.g., a cellular telephone, PDA, MP3 player, CD player, game console, etc.) over one or more wireless links." (Para. [0030])</p>
<p>[1(b)] headphones comprising a</p>	<p>Rosener discloses a pair of separate (i.e., not physically connected) wireless</p>

Exhibit D8 - Invalidity of '982 Patent in view of U.S. Patent Application No. 2008/0076489

Claim	U.S. Patent Application No. 2008/0076489 (“’982 Patent”)
<p>pair of first and second wireless earphones to be worn simultaneously by a user, wherein the first and second earphones are separate such that when the headphones are worn by the user, the first and second earphones are not physically connected, wherein each of the first and second earphones comprises:</p>	<p>simultaneously:</p> <p>“Wireless systems having a plurality of physically and electrically-separated wireless data sinks having no physical connection therebetween. The first and second data sinks each include a wireless communication frequency (RF) receiver or transceiver configured to receive data signals over the wireless links or over a multi-access wireless link. The first and second data sink embodiments may comprise audio data sinks, e.g., stereo speakers, left-ear and right-ear headphones (e.g., earbuds or canalphones), left-ear and right-ear circum-aural over-ear headphones.”</p> <p>(ABSTRACT; see also para. [0011])</p> <p>“The present invention relates to wireless systems. More particularly, the invention relates to wireless communication between a data source and two or more and physically separated wireless data sinks such as, for example, wireless earphones.”</p> <p>(Para. [0001])</p>

Exhibit D8 - Invalidity of '982 Patent in view of U.S. Patent Application No. 2008/0076489

Claim	U.S. Patent Application No. 2008/0076489 (“’982 Patent”)
<p>[1(d)] a wireless communication circuit for receiving and transmitting wireless signals;</p>	<p>Rosener discloses that each of the wireless earphones includes a wireless receiving and transmitting wireless signals:</p> <p>“Wireless systems having a plurality of physically and electrically-separated wireless system includes first and second data sinks having no physical connection therebetween. <u>The first and second data sinks each include a wireless radio frequency (RF) receiver or transceiver configured to receive data over a single-access wireless link or over a multi-access wireless link.</u> The first and second data sinks may be coupled to a data source. Exemplary embodiments may comprise audio data sinks, e.g., stereo speakers, earphones (e.g., earbuds or canalphones), left-ear and right-ear circum-aural headphones, etc. <u>At least one of the first and second data sinks may also be coupled to a data source.</u> At least one of the first and second data sinks may be coupled to an accompanying data source (e.g., a microphone or sensor), so as <u>to provide communications</u> between a user and an external data device (e.g., a cellular phone).”</p> <p>(ABSTRACT; see also para. [0011])</p> <p>“Each of the first and second wireless earphones 502, 504 comprises a housing 506, a <u>RF receiver or transceiver</u> and a battery.”</p> <p>(Para. [0030])</p> <p>“Whereas the wireless system 600 above has been described as comprising two RF receivers, in an alternative embodiment <u>RF transceivers containing both a transmitter and a receiver</u> may be used in place of each of the RF transmitters 610, 614 and the same alteration is also applicable to the other embodiments set forth in the</p>

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
