

Apple Releases New Firmware for AirPods 2 and AirPods Pro

Monday December 16, 2019 9:46 am PST by Juli Clover

Apple today released a new firmware update for the [AirPods 2](#) and the [AirPods Pro](#), though there is no word on what's new in the refreshed firmware.

AirPods Pro were previously using firmware version 2B588, while AirPods 2 were previously using 2A364. Both AirPods Pro and AirPods 2 run firmware version 2C54 following the update.

There's no clear cut way to upgrade the firmware of the AirPods and AirPods Pro, with the new software being installed over-the-air while the AirPods are connected to an iOS device.

Putting the AirPods in the case, connecting the AirPods to a power source, and then pairing the AirPods to an [iPhone](#) or an [iPad](#) should force the update after a short period of time.

You can check the firmware of your AirPods by following these steps:

- 1 Make sure the AirPods are connected to your iOS device.
- 2 Open the Settings app.

- 4 Tap About.
- 5 Tap AirPods.
- 6 Look at the number next to "Firmware Version."

AirPods firmware updates often bring performance improvements, bug fixes, and feature tweaks, but we may not find out what's new as Apple does not provide any kind of release notes for AirPods updates.

Have updated my airpods. Sound quality is greatly improved and I'm getting around 3 hours more battery life.

Hopefully this brings back the original anc. ANC has been weak since the 2b588.

One thing to remember is not to use cheap ass no brand Chinese chargers as their voltage regulation

If this were reddit, I'd give you at least silver over this statement. I've literally confiscated chargers and cables from my parents so that they don't burn their house down and replaced them with Anker chargers and cables, lol. After explaining it a bit to my dad, he gets it as he's a union electrician. He just didn't know there was so much going on in the ends of those Lightning cables.

12W wouldn't be so good for them though, would it?

Common misconception - devices only draw what they need. You can't 'force' current into them.

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
