Dear [REDACTED]
I would like to give you some more details and explanations regarding the Lucentis feasibility studies, which are "already" planned or to be planned.

... but first of all I would like to introduce myself.
[REDACTED] did build up a complete project team during the last days/weeks to provide you the full development service in future. I'm the team member, which will be responsible for the process development (together with [REDACTED] team), process implementation into the production and all the additional things around e.g. technical, pharmaceutical or quality aspects.
I'm working in the process development team since [REDACTED], thus some experiences especially with syringes are available.

[REDACTED]

[REDACTED]

Please don't hesitate to contact me for further detailed questions; otherwise I'm looking forward to meet you on 8th of April in [REDACTED]
We are open for all discussions and are happy, if we could get as many information as possible about your product, to support you as much as possible.

Kind regards,
[REDACTED]
