LAS VEGAS, Jan. 5 /PRNewswire/ -- The first public demonstration of the all-new litl webbook (litl.com) will take place at the Intel booth during the 2010 International Consumer Electronics Show (CES) from Jan. 7 - 10th. In addition, a special press and blogger demonstration of the litl webbook will be held on January 7 at 3:00 pm at the Intel booth's "Upload Lounge."

Announced in November, the litl webbook is an easy-to-use Internet computer for the home that blends the best of the Web with high-quality TV-like viewing. Using the power of the Intel® Atom (TM) processor, the webbook makes the web simple, engaging, and fun. With a unique and versatile design, the litl webbook can be used as a conventional laptop or the 12-inch screen and keyboard flip around on the patented hinge so it can stand upright like an easel - making it ideal for viewing photos, reading news headlines, and watching online videos.

WHERE: Las Vegas - Convention Center - Intel Booth, Central Hall #7153

WHEN: Jan. 7 at 3 pm - Press and blogger event with product giveaways (members of litl's executive team are also available throughout the show for meetings and demonstrations)

RSVP: Contact Lisa Hendrickson for one-on-one meetings and to attend the event on Jan. 7, at lisa@commstrat.com or 516-767-8390
