(57) **ABSTRACT**

A system and method is disclosed for the secure transfer of data by carrier virtual machines between participating physical hosts through a virtual network (VNET) implemented on one or more internal and/or external networks. The method of the invention can provide additional security controls, comprising parameters that may include, but are not limited to, time-to-live (TTL), access control lists (ACLs), usage policies, directory roles, etc. Additionally, access to one or more of a plurality of carrier virtual machine payloads by security groups, individual access, subdivided individual access, and MIME-like subdivision of a VM-encapsulated payload may be controlled, thereby providing the carrier VM the ability to carry many secured payloads. In addition, VM packets, a group of packets, a single VM, or subpackets within a VM between network endpoints, or at a predetermined intermediary network point, may be quarantined to realize further security. Individual or combinations of these functionalities on carrier virtual machines, and by extension, application and/or one or more sets of secure data may be implemented.

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
