HCPCS codes are used for billing Medicare & Medicaid patients — The Healthcare Common Procedure Coding System (HCPCS) is a collection of codes that represent procedures, supplies, products and services which may be provided to Medicare beneficiaries and to individuals enrolled in private health insurance programs. HCPCS codes primarily correspond to services, procedures, and equipment not covered by CPT® codes. This includes durable medical equipment (DME) (e-codes/), prosthetics, ambulance rides (a-codes/), and certain drugs and medicines.

HCPCS Codes (/section/)

HCPCS codes are alpha-numeric codes representing primarily procedures, supplies, products and nonphysician services.

(/drugs/)

ASP Drug Pricing (/drugs/)

CMS requires physicians & providers to use the appropriate HCPCS code & accurately report the units of service.

(/drugs/crosswalk/)

HCPCS Crosswalk (/drugs/crosswalk/)

The NDC-HCPCS crosswalks are intended to help understand which drug products are assigned to which HCPCS billing codes.

- Note 1: Payment allowance limits (/drugs/) subject to the ASP methodology are based on 4Q 2021 [ASP \(Average Sales Price\)](#) data (/drugs/10-2021/).
- Note 2: The absence or presence of a HCPCS code and the payment allowance limits in this table does not indicate Medicare coverage of the drug. Similarly, the inclusion of a payment allowance limit within a specific column does not indicate Medicare coverage of the drug in that specific category. These determinations shall be made by the local Medicare contractor processing the claim.
