

Macular degeneration tests & treatment

Medicare Part B (Medical Insurance) may cover certain diagnostic tests and treatment (including treatment with certain injected drugs) of eye diseases and conditions if you have age-related macular degeneration (AMD).

Your costs in Original Medicare

- You pay 20% of the Medicare-Approved Amount for the drug and your doctor's services, and the Part B deductible applies.
- In a hospital outpatient setting, you pay a copayment.

Note:

To find out how much your test, item, or service will cost, talk to your doctor or health care provider. The specific amount you'll owe may depend on several things, like:

- Other insurance you may have
- How much your doctor charges
- Whether your doctor accepts assignment
- The type of facility
- Where you get your test, item, or service

Note:

Your doctor or other health care provider may recommend you get services more often than Medicare covers. Or, they may recommend services that Medicare doesn't cover. If this happens, you may have to pay some or all of the costs. Ask questions so you understand why your doctor is recommending certain services and whether Medicare will pay for them.
