UNITED STATES PATENT AND TRADEMARK OFFICE
BEFORE THE PATENT TRIAL AND APPEAL BOARD
Playtika Ltd. and Playtika Holding Corp.,
Petitioners,
v.
NEXRF Corp.,
Patent Owner.
U.S. Patent No. 8,747,229 Filing Date: Dec. 29, 2010 Issue Date: June 10, 2014
Case No. IPR 2021-00951

DECLARATION OF STACY A. FRIEDMAN

TABLE OF CONTENTS

I.	Introduction			
II.	Background and Qualifications			
III.	Summary of Opinions			
IV.	Background and Technology of the '229 Patent			
	A.	The	229 Patent Prosecution History	13
V.	Challenged Claims			
VI.	Legal Standards1			
VII.	Level of Person of Ordinary Skill in the Art			
VIII.	Claim Construction			
IX.	The Challenged Claims are Unpatentable Over the Prior Art			
X.	Grounds 1-2: The Joshi Grounds Render Obvious Claims 1, 9, and 17			
	A.	Over	view of Prior Art	27
		1.	Joshi	27
		2.	Finlayson	31
			a. Motivation to Combine	32
	B.	Inde	pendent Claim 1	33
		1.	[1p] "A gaming server system configured to communicate with at least one network access device communicatively coupled to a network, the gaming server system comprising:"	33
		2.	[1a] "a verification system configured to access a registration database having a plurality of registration data associated with each registered user;"	35

3.	[1b] "a memory module configured to store a plurality of images corresponding to at least one game outcome that are communicated to the at least one network access device;"	40
4.	[1c] "a centralized gaming server communicatively coupled to each of the at least one network access device, the centralized gaming server configured to generate at least one random game outcome by random generation at the centralized gaming server;"	43
5.	[1d] "a paytable module associated with the centralized gaming server, the paytable module configured to determine one or more prizes associated with a game outcome;"	45
6.	[1e] "the centralized gaming server configured to access the memory module and communicate the plurality of images corresponding to the at least one random game outcome to the at least one network access device."	46
Indep	endent Claim 9	48
1.	[9p] "A gaming server system configured to communicate with a plurality of network access devices that are communicatively coupled to a network, the gaming server system comprising:"	48
2.	[9a] "a verification system configured to access a registration database having a plurality of registration data associated with each registered user, wherein the verification system is configured to:"	48
3.	[9b] "receive user identification information associated with a player from at least one network access device, and"	49
4.	[9c] "verify the player accessing the network access device is a registered user by comparing the user identification information to the registration data;"	50

C.

	5.	[9d] "a memory module configured to store a plurality of images corresponding to at least one game outcome that are communicated to the plurality of network access devices;"	51	
	6.	[9e] "a centralized gaming server communicatively coupled to each of the plurality of network access devices, the centralized gaming server configured to generate at least one random game outcome by random generation at the centralized gaming server;"	52	
	7.	[9f] "a paytable module associated with the centralized gaming server, the paytable module configured to determine one or more prizes associated with a game outcome; and"	52	
	8.	[9g] "the centralized gaming server configured to access the memory module and communicate the plurality of images corresponding to the at least one random game outcome to each network access device."	52	
Independent Claim 17				
	1.	[17p] "A method for generating a game outcome with a gaming server system configured to communicate with a plurality of network access devices that are communicatively coupled to a network, the gaming server system comprising:"	53	
	2.	[17a] "enabling a verification system to receive user identification information from at least one network access device;"	54	
	3.	[17b] "verifying with the verification system that the user accessing the at least one network access device is a registered user by comparing the user identification information to registration data stored in a registration database;"	54	
	4.	[17c] "generating, with a centralized gaming server communicatively coupled to each of the plurality of network access devices, at least one random game.		

D.

			outcome with random generation at the centralized gaming server;"	54
		5.	[17d] "determining one or more prizes associated with the random game outcome with a paytable module associated with the centralized gaming server; and"	55
		6.	[17e] "communicating a plurality of images corresponding to the at least one random game outcome from the centralized gaming server to each network access device."	55
XI.			4: The Joshi Agasse Grounds Render Obvious Claims 6, 7, and 23	55
	A.	Over	view of Additional Prior Art: Agasse	56
	B.	Moti	vation to Combine	58
	C.	comp plura	m 6] "The gaming server system of claim 1, further brising an encoding module configured to convert the lity of images to a format meeting the requirements of network access device."	62
	D.	comp	m 7] "The gaming server system of claim 1, further brising an encryption module, the encryption module gured to encrypt the plurality of images communicated to network access device."	67
	E.	comp imag	m 14] "The gaming server system of claim 9, further orising an encoding module configured to convert the es to a format meeting the requirements of each network as device."	68
	F.	comp	m 15] "The gaming server system of claim 9, further brising an encryption module, the encryption module gured to encrypt the plurality of images communicated to network access device."	68
	G.	_	m 22] "The method of claim 17, further comprising erting the plurality of images to a format meeting the

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time** alerts and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
