---

BEFORE THE PATENT TRIAL AND APPEAL BOARD

---

Playtika Ltd. and Playtika Holding Corp.,

Petitioners,

v.

NEXRF Corp.,

Patent Owner.

U.S. Patent No. 8,506,406

Filing Date: Dec. 30, 2010

Issue Date: Aug. 13, 2013

---

Case No. IPR2021-00952

---

**DECLARATION OF STACY A. FRIEDMAN**

**TABLE OF CONTENTS**

I. Introduction.....1

II. Background and Qualifications .....1

III. Summary of Opinions.....6

IV. Background and Technology of the '406 Patent .....7

V. Challenged Claims.....12

VI. Legal Standards .....15

VII. Level of Person of Ordinary Skill in the Art.....19

VIII. Claim Construction.....21

IX. The Challenged Claims are Unpatentable Over the Prior Art.....22

X. Grounds 1-16: The Joshi Grounds Render Obvious Claims 1-3, 6, 7,  
and 17-19 .....23

    A. Overview of Prior Art .....25

        1. Joshi.....25

        2. Muir.....29

        3. Walker .....31

        4. Agasse .....32

        5. Nguyen .....34

    B. A person of ordinary skill in the art Would Have Combined  
    Muir, Walker, Agasse, and Nguyen with Joshi.....36

        1. Motivation to Combine with Muir.....36

        2. Motivation to Combine with Walker .....40

        3. Motivation to Combine with Agasse .....41

4.	Motivation to Combine with Nguyen .....	43
C.	Independent Claim 1 .....	44
1.	[1p] “A system to run a gaming application on a network access device, comprising:” .....	44
2.	[1a] “the network access device; and” .....	46
3.	[1b] “a remote gaming system including a verification system;” .....	47
4.	[1c] “the network access device configured to transmit user identification information and security information to the verification system;” .....	49
5.	[1d] “the network access device configured to receive an acknowledgement from the verification system indicating that the user identification information and security information are valid;” .....	54
6.	[1e] “the network access device configured to receive a game input from a user of the network access device and transmit the game input to the remote gaming system;” .....	58
7.	[1f] “the remote gaming system configured to receive the game input and generate a random game output, the remote gaming system further configured to associate an image ID with the random game output and select one or more images associated with the image ID for encoding and broadcasting to the network access device;” .....	60
a.	“the remote gaming system configured to receive the game input and generate a random game output” .....	60
b.	“the remote gaming system further configured to associate an image ID with the random game output and select one or more images associated with the image ID” .....	61

c.	“for encoding and broadcasting to the network access device” .....	64
8.	[1g] “the network access device configured to receive a plurality of broadcast images generated by the remote gaming system.” .....	69
D.	Independent Claim 17 .....	70
1.	[17p] “A method for running a gaming application on a network access device, comprising:” .....	70
2.	[17a] “transmitting user identification information and security information to a verification system;” .....	70
3.	[17b] “receiving an acknowledgement from the verification system indicating that the user identification information and the security information are valid;” .....	70
4.	[17c] “receiving a game input from a user of the network access device;” .....	70
5.	[17d] “transmitting the game input to a remote gaming system, the remote gaming system generating a random game output and associating an image ID with the random game output; and” .....	70
6.	[17e] “receiving a plurality of broadcast images generated by the remote gaming system, the remote gaming system selecting one or more images associated with the image ID, the remote gaming system encoding the one or more images into the plurality of broadcast images and broadcasting the plurality of broadcast images to the network access device.” .....	71
E.	[Claim 2] “The system of claim 1, wherein the plurality of broadcast images received by the network access device is displayed on a web browser.” .....	71
F.	[Claim 3] “The system of claim 1, wherein the plurality of broadcast images is encrypted.” .....	72

G.	[Claim 6] “The system of claim 1, wherein the network access device is a wireless device.” .....	73
H.	[Claim 7] “The system of claim 1, wherein the network access device is a display that is operatively coupled to an interactive set-top box.” .....	73
I.	[Claim 18] “The method of claim 17, further comprising displaying the plurality of broadcast images on a web browser.” .....	75
J.	Dependent Claim 19 .....	76
1.	[19p] “The method of claim 17, wherein receiving a plurality of broadcast images includes:” .....	76
2.	[19a] “receiving a plurality of encrypted broadcast images from the remote gaming system;” .....	76
3.	[19b] “decrypting the plurality of encrypted broadcast images, resulting in a plurality of decrypted images; and” .....	76
4.	[19c] “displaying the plurality of decrypted images.” .....	76
XI.	Grounds 17-32: The Joshi Menashe Grounds Render Obvious Claims 1-4, 6, 7, and 17-19 .....	77
A.	Overview of Prior Art .....	77
1.	Menashe .....	77
2.	Muir .....	79
B.	Motivation to Combine .....	79
1.	Menashe .....	79
2.	Muir .....	81
C.	Independent Claim 1 .....	82
1.	[1p] “A system to run a gaming application on a network access device, comprising:” .....	82

# Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

## Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

## Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

## Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

## API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

## LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

## FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

## E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
