victim. For examples, *see* MAIL BOMBING; PING FLOODING. *See also* COMPUTER SECURITY.

DES (Digital Encryption Standard) an encryption system using 56-bit keys in a complicated 16-round substitution process. It has been a federal standard since 1976.

FIGURE 72. DESCENDERS

descender the part of a character that extends below the baseline. For instance, the letter *p* has a descender; the letter *o* does not. *See* ASCENDER; TYPEFACE.

deselect to tell the computer you do not want to work with a particular object. There are minor differences in how different software does this, but clicking on the background or another object will usually deselect the current object. If you want to select multiple objects, you can hold down Ctrl while clicking on the desired objects. This allows you to select as many items as you want. To deselect just one item of a group, click on it again while continuing to hold Ctrl. If you are choosing between mutually exclusive options in a dialog box, choosing one button will clear the others (*see* RADIO BUTTONS; OPTION BUTTONS).

Hint: If you wish to select all but one or two objects in a drawing, the fastest way is to “Select All” (either by using the edit menu option or by MARQUEE SELECT), and then deselect the unwanted objects.

desk accessory a small, useful program that is meant to be always at hand while you are working at your computer. Examples include the clock, calculator, Character Map (KeyCaps for Mac users) and the Control Panel. All Macintosh programs provide access to the Desk Accessories under the Apple menu. Windows desk accessories are found in the Accessories program group.

deskew to straighten; to undo the effects of a SKEW command.

desktop the whole computer screen, representing your workspace. You manipulate objects (ICONS) with the mouse in much the same way that you work with papers and other objects on your physical desktop.

On the Macintosh and in OS/2, the desktop is also a special file containing information about the arrangement of icons, the programs you are using, and the like. This information is saved whenever you

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
