

DECLARATION OF MARIANNE TIND

1. My name is Marianne Tind. I am over the age of 18, have personal knowledge of the facts set forth herein, and am competent to testify to the same.

2. I am currently a librarian at Det Kgl. Bibliotek in Aarhus, Denmark. I earned a Librarian DB from the The Royal School of Librarianship, Aalborg in 1997. I have over 25 years of experience in the library/information science field.

3. I am familiar through my training and job as a librarian in Denmark with the cataloguing process at the Royal Danish Library, which is known in Danish as Det Kgl. Bibliotek. The Royal Danish Library is the national library of Denmark and is the national depository library in Denmark.

4. Specifically, when we receive a book, we catalog it, based on the DanMarc2 rules in our library catalog/library system. We place a bar code on the book, which is used in connection with loan registration. We also put on a registration code, so that we can track down the book on the shelves. Every night the catalog is synchronized, and the book is now visible in the library catalog (front end) and can be located by the users of the library. When cataloging new books, we describe them with bibliographic information like author, title, subtitle, number of pages, publication year, publisher. We also include keywords. This descriptive information can be used, when trying to locate relevant materials for research purpose. All information put in the library catalog is searchable.

5. I have reviewed the book entitled “Reference Guide for the Beologic salesPLUS Product Configurator C Language API,” as checked out from the lending library of the Royal Danish Library. The book states “Copyright © 1995 Beologic A/S.” The front cover, forward matter, and last page of this book is attached to my declaration. The copy of the book I have reviewed has a sticker that says Statsbiblioteket on the front cover with item number 400005454601.

6. The records of the Royal Danish Library state that this book was catalogued and joined the holdings of the Royal Danish Library on or before 24 December 1999. This is the date on which the record data of this book were migrated from the earlier RCLib software system to the Horizon software system. In all likelihood, the book was available before that date but the exact date is no longer available from the records. However, at the latest as of 24 December 1999, this book was listed in the library’s catalog, could be located in the library’s catalog by a member of the public, and the book could be checked out by a member of the public.

7. I understand that this book will be used as an exhibit, Exhibit 1005, in a U.S. legal proceeding.

8. I hereby declare that all statements made are of my own knowledge are true and that all statements made on information and belief are believed to be true. I further declare that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or

both, under Section 1001 of the Title 18 of the United States Code. I declare under penalty of perjury under the laws of the United States of America that the foregoing is true and correct.

Executed this June 1st, 2021.

Marianne Tind

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
