

UNITED STATES PATENT AND TRADEMARK OFFICE

BEFORE THE PATENT TRIAL AND APPEAL BOARD

NIANTIC, INC.,
Petitioner

v.

NANT HOLDINGS IP, LLC, and
NANTWORKS, LLC
Patent Owners

U.S. Patent No. 10,664,518
Title: Wide Area Augmented Reality Location-Based
Services

DECLARATION OF DR. MICHAEL ZYDA

Table of Contents

	Page
I. INTRODUCTION AND QUALIFICATIONS.....	1
A. Qualifications and Experience	1
1. Curriculum Vitae.....	4
B. Materials Considered.....	5
II. PERSON OF ORDINARY SKILL IN THE ART (“POSITA”).....	9
III. LEGAL PRINCIPLES USED IN THE ANALYSIS	11
A. Prior Art.....	11
B. Claim Construction	12
C. Legal Standards for Obviousness.....	14
D. Reasonable Expectation of Success	19
IV. RELEVANT TECHNOLOGY BACKGROUND	19
A. Introduction to Augmented Reality.....	19
B. History of Augmented Reality	22
C. Location-Based Tracking in AR Systems.....	26
D. Object Recognition in AR Systems.....	32
E. Augmented Reality Gaming.....	35
V. THE ’518 PATENT	40
A. Overview of the Specification.....	40
B. Overview of the Challenged Claims	44
C. Agreed Claim Terms	44
D. Disputed Claim Terms	45
VI. APPLICATION OF THE PRIOR ART TO THE CHALLENGED CLAIMS OF THE ’518 PATENT	46
A. Brief Description and Summary of the Prior Art.....	47
1. Altman – U.S. Pat. App. Pub. No. 2008/0132251 [Ex. 1003]	47
2. Langseth – U.S. Pat. Pub. No. 2013/0178257 (Ex. 1006)	49

Table of Contents
(continued)

	Page
3. CaveLie – U.S. Pat. App. Pub. No. 2013/0124563 [Ex. 1004]	53
4. Gelfand – U.S. Pat. Pub. No. 2008/0268876 [Ex. 1005].....	56
5. Sterkel – U.S. Pat. No. 8,762,047 [Ex. 1007].....	59
B. Ground 1: Obviousness of Claims 1-9, 11-14, 18-20, 23-32, and 34-36 Over Altman in View of Langseth.....	63
1. Independent claim 1	63
a. Preamble	63
b. Manner, Rationale, and Motivation to Combine Altman with Langseth	80
c. “at least one sensor, including a location sensor;” (1[a])	85
d. “a display;” (1[b]).....	89
e. “a non-transitory computer readable memory storing software instructions; and” (1[c]).....	91
f. “at least one processor coupled with the non-transitory computer readable memory, the at least one sensor, and the display; and, upon execution of the software instructions, is configurable to:” (1[d])	95
g. “obtain sensor data from the at least one sensor wherein the sensor data includes a device location obtained from the location sensor;” (1[d][i]).....	98
h. “obtain an area of interest via an area database based on at least the device location within the sensor data;” (1[d][ii])	99
i. “access an area tile map of the area of interest, the area tile map represented by a set of tile subareas that includes one or more tessellated tiles from a tessellated tile map;” (1[d][iii])	116

Table of Contents
(continued)

Page

j.	“identify a tile subarea from the set of tile subareas based at least in part on the device location relative to one or more locations of tile subareas from the set of tile subareas, wherein the identified tile subarea covers at least a portion of the area of interest, and wherein one or more tessellated tiles within the identified tile subarea are associated with one or more AR content objects;” (1[d][iv]).....	126
k.	“populate the non-transitory computer readable memory with at least one of the one or more AR content objects associated with the one or more tessellated tiles corresponding with the identified tile subarea; and” (1[d][v])	141
l.	“render the at least one of the one or more AR content objects that is associated with the identified tile subarea on the display based on a view of interest.” (1[d][vi])	149
2.	Claim 2: “The device of claim 1, wherein the location sensor comprises at least one of the following location sensors: a global positioning system (GPS) sensor, an image sensor, and a wireless sensor.”.....	153
3.	Claim 3: “The device of claim 1, wherein the device location includes at least one of the following: a global positioning system (GPS) location, a wireless signal location, a depth of field location, and an image-based simultaneous location and mapping (SLAM) location.”	153
4.	Claim 4: “The device of claim 1, wherein the at least one sensor further includes one or more of the following: a camera, an accelerometer, and a gyroscope.”	154
5.	Claim 5: “The device of claim 1, wherein the sensor data further includes at least one of device position data and device orientation data.”	157

Table of Contents
(continued)

	Page
6. Claim 6: “The device of claim 5, wherein the at least one of the one or more AR content objects is rendered based on the view of interest, wherein the view of interest is derived from at least one of the device position data and the device orientation data.”	159
7. Claim 7: “The device of claim 1, wherein the at least one of the one or more AR content objects is rendered on the display as an overlay of an image related to the real-world.”	161
8. Claim 8: “The device of claim 1, wherein the area of interest comprises one of the following: a landmark, user-defined boundaries, state-defined boundaries, natural boundaries, a city, a country, a business, a shopping center, a warehouse, a stadium, a wilderness area, a road, a garden, a zoo, an amusement park, a beach and a building.”	165
9. Claim 9: “The device of claim 1, wherein the area of interest comprises a restaurant.”	167
10. Claim 11: “The device of claim 1, wherein the area of interest comprises an outdoor setting.”	170
11. Claim 12: “The device of claim 1, wherein the device communicatively couples with the area database over a network.”	171
12. Claim 13: “The device of claim 1, wherein the at least one of the one or more AR content objects is obtained from an AR content database.”	172
13. Claim 14: “The device of claim 13, wherein the device is communicatively coupled with the AR content database over a network.”	174
14. Claim 18: “The device of claim 1, wherein the at least one of the one or more AR content objects comprises a game object.”	176

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
