2

- A. Yes.
- Q. And Tesonet, founders of Oxylabs, please tell the jury
- 4 how you came up with the name Tesonet.
- 5 A. So, you know, when I've -- with my business partner, we
- 6 met -- we knew each other when we were little, and we
- 7 came -- we had -- just a company, and we had some very fancy
- name. I don't remember, but it was very, very something about
- 9 group global, something like that.
- And when we came to register it, it was a very rainy day
- 11 | in Lithuania. And we stand in the line, and they said this is
- 12 taken, you have to, you know, figure out or go back into the
- 13 line.
- So we did, you know, the old-fashioned way, how we can
- 15 | call it. We came up with Tomas, Eimantas Sabaliauskas, which
- 16 | is his last name, and my last name Okmanas, Teso, and net as
- 17 | internet. Tesonet.
- MR. GOVETT: Now, you can take that down, please?
- 19 Q. (BY MR. GOVETT) How did you meet Mr. Sabaliauskas?
- 20 | A. So I met him actually online in internet. He was from a
- 21 \mid small village in Lithuania, and I was from Vilnius. And from
- 22 | my early days, I was spending time online and we chatted. I
- 23 | think we chatted for the first six years. We met in person
- 24 only after he came to Vilnius to study in Vilnius University
- 25 as well.

- Q. And did -- what did you do together? Did you eventually get work together?
- A. Yeah. He -- his background is in computer science, so his bachelor degree is in computer science. But he is a marketing guy.

And I, over the years in internet service provider, taught myself. And I was very passionate about computers.

And I taught myself about network, about servers, about computers in general.

And we thought our, you know, strengths and weaknesses cover each other and his marketing knowledge, even though with computer science background, and my technical knowledge with business would be a good and powerful combination.

- Q. And how many projects did the two of you end up working on?
- A. So we did -- until we found the right one, we calculated that it was 34 projects or products that we did until we found the right one.
- Q. And in those 30-some-odd products or projects, did you have any failures?
- 21 A. We don't call it failures. We never call anything a failures.
- 23 Q. What do you call it?
- A. We call it divots, because you fail when you stop, and we never stopped.

14

15

- 1 Q. Now, how did Teso start?
- 2 A. So Teso started in my mom's and dad's apartment in
- 3 | Vilnius. And we've been doing those products. But in 2012 or
- 4 | early '13, a lot of things changed.
- 5 Q. And what is Tesonet today?
- 6 A. So currently we -- our -- the biggest tech employer in
- 7 Lithuania. We are a company that has 2,000 people. We are
- 8 one of the biggest taxpayers in the country. We are a big
- 9 technology company.
- 10 Q. Who owns Tesonet?
- 11 A. From the start until today, the company is owned by a
- 12 | Eimantas, myself, and all the employees are shareholders as
- 13 well.
- 14 | Q. Is there any other ownership other than Mr. Sabaliauskas,
- 15 yourself, and the employees?
- 16 A. No. It's just us.
- 17 Q. Now, what products does Tesonet have?
- 18 A. Currently we have two products. One is in cyber security
- 19 space. Another is Oxylabs.
- 20 Q. And what companies does Tesonet have?
- 21 A. We have in terms of legal entities or --
- 22 Q. Yes, sir.
- 23 A. So we have Teso LT, Metacluster, you know, Core Cigna,
- 24 and like Core 200 and many others.
- 25 THE COURT: Be sure to speak up so our reporter can

hear you.

1

4

7

2 THE WITNESS: I'm sorry.

3 THE COURT: That's okay.

- Q. (BY MR. GOVETT) How does Oxylabs relate to Teso?
- 5 A. So Oxylabs is just a Tesonet product.
- 6 Q. How does Metacluster relate to Teso?
 - A. Metacluster is Oxylabs' legal entity's name.
- 8 Q. Has Oxylabs grown in the last few years?
- 9 A. Yes, it did.
- 10 Q. Tell us what it's like to work at Oxylabs.
- 11 A. You know, people say that to work to do -- at work we're
- 12 | family, but we really mean it, because one of the first
- employees, you know, team members that joined and still is, is
- 14 my wife. She works at HR.
- Eimantas' wife works in marketing. All of my, you know,
- 16 best friends work at the company. My classmates work at the
- 17 | company. Mr. Cerniauskas that you saw earlier who is the CEO
- 18 of Oxylabs, his sister works in the legal department of
- 19 Oxylabs, and she is -- actually she got married to the first
- 20 team member that joined, Jytautas.
- 21 So we are family. And we -- you spend so much time at
- 22 work, you have to treat them as family. So I'm not sure --
- 23 you know, we do a lot of things together, but at the company
- 24 \mid we work only four days and a half. Fridays we have off.
- We have extra health insurance. We have extra pension.

DOCKET

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time** alerts and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
