# Which ports and protocols are supported by Bright Data?

8 months ago · Updated

[Follow](#)

Ports 80 and 443 are available by default, supporting HTTP and HTTPS protocols.

The below table shows supported protocols by port:

**Port Protocol**

80 HTTP

443 HTTPS

Bright Data is able to support additional ports by request. Every request to support a new port will be followed by a dedicated and additional compliance process with the Bright Data compliance team.

For additional port permissions, contact [Bright Data Support](#).

Examples of ports that require Bright Data compliance review prior activation:

**Port Protocol**

43 WHOIS

8443 HTTP

8243 HTTPS
