Learn Mac OS X Snow Leopard

You're smart and savvy, but also busy. This comprehensive guide to Apple's latest version of Mac OS X 10.6, Snow Leopard, gives you everything you need to know to live a happy, productive Mac life. *Learn Mac OS X Snow Leopard* will have you up and connected lickity–split. With a minimum of overhead and a maximum of useful information, you'll cover a lot of ground in the time it takes other books to get you plugged in.

If this isn't you're first experience with Mac OS X, skip right to the "What's New in Snow Leopard" sections. You may also find yourself using this book as a quick refresher course or a way to learn new Mac skills you've never tried before.

What you'll learn

- Discover all the ins and outs of the Finder and Snow Leopard's streamlined workflow.
- Use the latest features of Apple's built–in applications, including Mail, Safari, iCal, Address Book, iChat, Preview, and more.
- Learn about Snow Leopard's improved security and reliability, and how to take full advantage of the connected world and a wealth of new mobile devices.
- Administer your computer and network for yourself, your family, or your business.
- Work with add–on devices via direct connection or wirelessly.
- Master effective strategies for data backup, recovery, and security.
- Explore all of Apple's improved iLife applications, including iTunes, iPhoto, and iMovie.
- Delve into more advanced topics, such as how to take advantage of the Darwin subsystem in Leopard, how to run multiple operating systems on your Mac, and how to cooperate with other operating systems (and help them cooperate with you).
- Get started with your own Mac OS X development in Snow Leopard

Who is this book for?

New Mac users, existing Mac users upgrading from older versions of Mac OS X, and PC users making the switch to Macs. These people share a common desire to learn stuff fast and keep learning! Because this book goes into greater depth than your average Mac OS X guide, it is also excellent for small business owners, user support personnel, and system administrators. There's even an introduction to Mac OS X development for nascent programmers and the DIY crowd.

Author Information

Scott Meyers

Scott Meyers has worked in and around the computer industry, beginning as an Apple Sales Specialist and Consultant over 12 years ago, he has since moved on to various other jobs including Web Design and Development, Editing books on Web Development, Open Source and Apple Technology, and Marketing. He is a Select ADC (Apple Developers Connection) Member and a huge fan of Mac OS X which brings together his love of the Apple's traditionally best of class GUI and applications with the unrivaled power of Unix and Open Source technologies and applications.

Scott lives outside of Indianapolis, Indiana with his wife, two kids, and a cat and a dog. When not working or writing he enjoys photography, playing guitar, and building amplifiers.

DOCKET ALARM

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS
Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS
Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS
Sync your system to PACER to automate legal marketing.
