70M+ residential proxies from all around the world

The most stable and continuously growing residential IP pool to fit any customer's web scraping needs on a large scale. Any Oxylabs residential IP can be filtered by a precise variable. Simply add specific parameters to your username, then filter residential IPs by country, city or ASN - this guarantees residential proxies meeting the most diverse business requirements.

Let go of captchas and IP bans

Receive either rotating residential proxies or rotating mobile IPs and stay confident when achieving high success rates. Each Oxylabs residential proxy is selected from a reliable source to

using our proxies for:

Why you should start using Oxylabs' residential proxies

1. One of the most common applications for any residential IP is to **scrape flight prices**, as travel sites are very cautious with the traffic they get, meaning if they notice that the traffic isn't organic, they will block you. **Residential proxies** come in handy here, as they **allow you to imitate a genuine internet user**. Such traffic is highly unlikely to be classified as a bot-like activity, therefore, ensuring high success rates.
2. Another use case for residential IPs is **ad verification**. For ad verification to be effective, it is essential to use a sizeable residential proxy pool as verifying ads requires flexibility in resources. Good thing Oxylabs residential proxies have an **extensive pool of proxies** on a **global scale**, and **accurate IP locations** (from country to ASN providers), this way making it impossible for ad fraudsters to detect traffic that is verifying ads.
3. Oxylabs' residential IPs have an enhanced public API, allowing you to manage your residential proxies solution via backend services without the need to log into the dashboard. With **Oxylabs residential proxy API**, you're able to create, update, set traffic limits, or delete sub-users, as well as get statistics on your users' traffic usage. More features will be added soon as we continually improve our service for the benefit of our clients.

Added benefits of using Oxylabs' residential proxies

High proxy speeds and performance metrics

Any residential proxy has to meet the right requirements for speed and performance, to perfectly function during large-scale web scraping jobs. Oxylabs' residential proxies not only reach the necessary limits but exceed over them, reaching **up to 90% success rates**, making them one of the fastest and highest-performing proxies on the market.

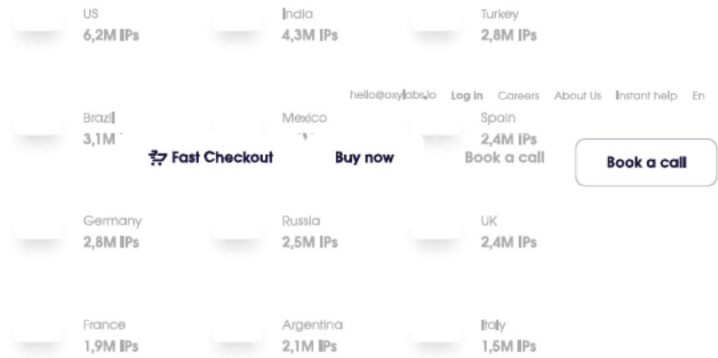

Handy all-in-one self-service dashboard

As with any Oxylabs proxy product, residential proxies can be easily managed via our dashboard. With **Oxylabs residential proxy dashboard**, you'll be able to see detailed proxy usage statistics, create sub-users, whitelist your IPs, and manage your account. You'll also be able to contact support via **live chat**, or your dedicated Account Manager quickly and conveniently.

24/7 support and know-how sharing

Whether you're just browsing in search of the best residential IP on the market and have a few questions in mind, or you're a recurring customer that needs an immediate response at 2 AM – we got you covered. We provide our clients with **24/7 support** and **important know-how** at any given moment for the most urgent necessities.

Check out our other scraping solutions

Next-Gen Residential Proxies

Data gathering solution with advanced AI-based anti-captcha.

HTTP proxies

Effortless communication with websites via an HTTP protocol.

Rotating proxies

Harder to detect and ideal for challenging targets.

Gabriele Amirzian

Account Manager @ Oxylabs

If your data sources are scattered around the globe, a wide range of localized IPs is exactly what you need. Our residential proxies offer unmatched flexibility when choosing any location globally.

Rokas Brazinskas

Account Manager @ Oxylabs

Using residential proxies is paramount not only due to a broad and precise spectrum of locations but also because targets will identify the incoming requests as originating from organic users. Such traffic is highly unlikely to be detected as automated.

A word from your dedicated account manager

By choosing to work with our residential proxies, you will get your very own dedicated account manager.

We have worked with Oxylabs for almost 4 years, and the experience is great. Many years of excellent service, great proxies. Not just their tech services, but also their customer service - they always are very helpful and polite.

4.8 out of 5

Oxylabs 10/10

Great customer service, truly 24/7 support, Great documentation along with competitive pricing, The proxies work as described and have never had any problems with them.

- Oliver Robertson

Oxylabs is an excellent company

The Oxylabs company is excellent! I have been using their services for the last 3 months and I have never had a second of downtime, The customer support is one of the better I have seen with companies that sell bandwidth.

- Rafael Pampulha

Great partner

Oxylabs provides customers with very high quality and efficient service, they are the partner worthy of long term cooperation and trust.

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
