Methods and systems for improving the end-user experience by reducing the latency of data access across networks by accessing peer browser caches are disclosed. In one embodiment, a method of accessing a web data element includes: transmitting a first request for the web data element from a first browser to a home location of the web data element; transmitting a second request for the web data element from the first browser to one or more hosts including a second browser accessible by the first browser; receiving a cached copy of the web data element by the first browser from the second browser; and displaying the cached copy of the web data element. In another embodiment, a method of improving access to a web data element, includes: receiving a copy of the web data element at a first browser in response to a first request initiated from the first browser; storing the copy of the web data element in a cache controlled by the first browser as a cached web data element; receiving a request for the web data element from a second browser; and providing a copy of the cached web data element to the second browser.

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
