Waste of Money

Linda Weaver on **Jan 26, 2022**

I bought these eye drops when Target was out of Lumify. What a waste of money; they did not work at all. Made my eyes burn and feel even dryer! Would not recommend!

Rohtos does it again!

Rick Nasty on **Nov 21, 2021**

I use Rohto faithfully because it is by far the best eye drops. The Optic Glow not only did everything it said it would do on the label, such as soothe the eland clear up the redness, it also made my eyes feel so good I swear I could see better after using it. These are the best so far AND my new favorite!
