**Amazing results**

**Debra Sams on Mar 30, 2022**

I work on the computer 8 plus hours a day. I first tried Digi Eye for dry eyes and it work very good. Now I use it daily to reduce the strain on my eyes and am truly thankful I found this medication. I had several other bottles of the competitor's drops and threw them all away. Thanks Digi Eye for my amazing results!

**Definitely the best**

**Ben barrett on Dec 30, 2021**

I spend copious amounts of time using my phone and gaming. Digi eyes have made my life so much easier. I normally get headaches from the strain on my eyes but since I've started using these I'm finally able to enjoy all things digital.

**A++**

**Nate D on Sep 19, 2021**

As a 10+ year rohto veteran, I'm always excited to try new variants of my favorite eye drops! And man these did not disappoint. I love that they still act as normal rohtos and have superb redness relief abilities. The B12 is a nice touch of class, and I feel that's what's really helping with the strain caused from the screens. I would recommend these to absolutely everyone who spends multiple hours more than necessary staring into the internet void!

**So far, so good**

**Harper on Jul 24, 2021**

I have issues with my eyes burning, idk if it's caused by dryness but... These have been the only drops that make my eyes feel hydrated at the end of the day. Most drops make my eyes feel drier and drier the more I use them, but these do not, it has helped with headaches from eye strain as well.

**Love it**

**Sandra Acosta on Jun 15, 2021**

I like this one. Feel fresh.
