(57) **ABSTRACT**

Disclosed herein is a picture display controlling apparatus capable of improving the user's ease of operation upon selecting picture data on a small-size screen of digital cameras or the like. Picture data items held in a data holding unit (310) are sorted into picture groups. The location of the picture data item most recently displayed from any of the picture groups is held as a picture resume pointer in a resume pointer holding unit (320). With an operation input accepted from the user by an operation inputting device (340), a display controlling unit (390) causes a displaying unit (350) to display the picture designated by the operation input while effecting transition from the current display status retained in a status holding unit (330). If the operation input designates transition from a first picture group to a second picture group, the location of the picture data item currently displayed from the first picture group is placed into the resume pointer holding unit (320), and the location of the picture data item to be displayed anew from the second picture group is retrieved from the resume pointer holding unit (320).

DOCKET A L A R M

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
