A computing device includes a memory configured to store digital images. The computing device also includes a processor configured to execute instructions to perform a method that includes receiving a collection of digital images in which one or more of the digital images has an associated location. The method also includes displaying a digital map that is defined by a geographic area that includes the associated locations of the digital images. The method further includes annotating the digital map to include one or more identifiers. One or more of the identifiers represents a group of the associated locations as determined from a scale associated with the digital map.
