(57) **ABSTRACT**

Creation of web pages on hand-held devices such as digital cameras and personal digital assistants (PDAs) is made feasible by a system for generating mark-up language based on a compact template mapping file created on the hand-held device. Through a user interface, a user of the hand-held device creates the template mapping file, which associates a selected one of the templates stored on the host computer with one or more source files, which may include text, image and audio files. HTML templates (files containing the actual and usually lengthy formatting commands that accomplish the style selected by the user) and other large files needed to create compelling web pages reside on the host computer, not on the hand-held device. In a synchronization operation, where the hand-held computer is operably connected to the host computer, the source files are merged with the selected style templates according to mapping information in the template mapping file. The invention is especially applicable to digital cameras having features of a PDA and provides users with the capability to remotely create their own websites which incorporate images they have obtained with the digital camera.

# Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

## Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

## Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

## Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

## API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

## LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

## FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

## E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
