I. INTRODUCTION

Petitioner Apple, Inc. (“Petitioner”) has not met its burden in demonstrating that U.S. Patent No. 9,088,868 (“the ‘868 patent”) is more likely than not invalid, and, as such, institution should be denied.

Petitioner’s contention that the challenged claims of the ‘868 patent are invalid as obvious lacks merit. Petitioner relies on one primary prior art reference—U.S. Patent Application Publication US 2005/0096044 A1 to Haberman (Ex. 1004). The Petition is facially defective in that it fails to demonstrate “a reasonable likelihood that the Petitioner would prevail with respect to at least one of the claims challenged in the petition” under 35 U.S.C. § 314(a).

Petitioner’s obviousness arguments fail because none of the cited references teach or suggest the recited “the first identifier indicative of the mobile data processing system of the mobile application user interface”. Petitioner twice attempts to equate an address with this feature. However, the addresses in Haberman and Boger that Petitioner attempts to utilize are no more “indicative of” the “**system**” at that address in each reference than a given street address is “indicative of” whether or what structure is located on that piece of land.

Neither the Petition, nor the declaration submitted by Petitioner’s expert, provide an articulated reasoning with a rational underpinning to support a legal conclusion of obviousness. *KSR Int’l Co. v. Teleflex, Inc.*, 550 U.S. 398, 418 (2007),

quoting *In re Kahn*, 441 F.3d 977, 988 (Fed. Cir. 2006). The Petition only provides “mere conclusory statement[s]” (*id.*) that the claims are obvious, and lacks cogent reasoning as to why a person of ordinary skill in the art would modify or combine the cited references in the specific manner that is recited in each of the challenged claims.

Petitioner’s expert declaration (Ex. 1002) merely repeats the attorney arguments in the Petition (often verbatim).

In summary, the IPR Petition fails to show a reasonable likelihood that at least one of the challenged claims of the ‘868 patent is unpatentable. The Board should not institute *inter partes* review of the ‘868 patent and should deny the Petition in its entirety.

II. ALLEGED GROUNDS OF UNPATENTABILITY

Petitioner alleges the following grounds of unpatentability under 35 U.S.C. § 103 against independent claims 1 and 24 and dependent claims 2, 5, 20, 25, 28, and 43. Pet. 4. All are deficient in meeting the challenged claims.¹

	Grounds	Reference(s)	Challenged Claims
1.	§ 103	Haberman	1, 2, 5, 20, 24, 25, 28, and 43
2.	§ 103	Haberman in view of Boger	1, 2, 5, 20, 24, 25, 28, and 43
3.	§ 103	Haberman in view of Evans	1, 2, 5, 20, 24, 25, 28, and 43
4.	§ 103	Haberman in view of Boger and Evans	1, 2, 5, 20, 24, 25, 28, and 43

III. THE '868 PATENT

The '868 Patent enables the configuration and performance of location based conditions. The claimed methods and systems recite accepting user input, from a user of a mobile application user interface of a user carried mobile data processing system, for configuring a user specified location based event configuration to be monitored and triggered by the mobile data processing system. The mobile data

¹ Patent Owner appreciates Petitioner's recognition that the claims "should be interpreted according to their plain and ordinary meaning." Pet. 6.

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
