CLAIMS

1. (Previously Presented) A method, comprising:

accepting user input, from a user of a mobile application user interface of a user carried mobile data processing system, for configuring a user specified location based event configuration to be monitored and triggered by the mobile data processing system wherein the mobile data processing system uses the user specified location based event configuration to perform mobile data processing system operations comprising:

accessing at least one memory storing a first identifier and a second identifier and a third identifier wherein each identifier is determined by the mobile data processing system for at least one location based condition monitored by the mobile data processing system for the mobile data processing system triggering a location based action, the location based action performed by the mobile data processing system upon the mobile data processing system determining the at least one location based condition including whether identifier data determined by the mobile data processing system for a wireless data record received for processing by the mobile data processing system matches the third identifier and at least one of the first identifier and the second identifier, the wireless data record corresponding to a beacons broadcast wireless data transmission that is beacons outbound from an originating data processing system to a destination data processing system, the first identifier indicative of the mobile data processing system of the mobile application user interface for use by the mobile data processing system in comparing the first identifier to the identifier data determined by the mobile data processing system for the wireless data record received for processing by the mobile data processing system, the second identifier indicative of originating data processing system identity data of the wireless data record received for processing for use by the mobile data processing system in comparing the second identifier to the identifier data determined by the mobile data processing system for the wireless data record received for processing by the mobile data processing system, the third identifier indicative of the originating data processing system of the wireless data record received for processing wherein the third identifier is monitored by the mobile data processing system for use by the mobile data processing system in comparing the third identifier to the wireless data record received for processing by the mobile data processing system;

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
