**ABSTRACT**

In a mobile radio communication system, a base station is provided for executing radio communication with a radio communication apparatus. The radio communication apparatus includes a signal transmitting/receiving apparatus for mobile communication, which transmits and receives a signal to and from the base station. The apparatus also includes a Bluetooth unit for short-range radio data communication using relatively weak radio waves. When the radio communication apparatus is located at a distance communicable with a stationary station based on the Bluetooth system, the radio communication apparatus can acquire, from the stationary station, position information indicative of its position, and shop information related to the position information, etc. Thus, the short-range radio data communication system using weak radio waves enables the mobile radio communication system for mobile phones to calculate the position of the user of the radio communication apparatus, and also to distribute information relevant to the position.

# Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

## Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

## Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

## Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

## API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

## LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

## FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

## E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
