(57) **ABSTRACT**

A barrier system comprises a first and second upright support legs and a laterally extending vision barrier. The support legs may include a pair of telescoping leg support portions. The laterally extending vision barrier comprises a vision barrier screen having slits spaced therein and has at least one fastener for facilitating attachment to one of the support legs. In one form, the first support leg may comprise an outer housing and an internal reel. The vision barrier is deployed on the reel.
