

## Soft Housing

Design Beyond East & West

The main idea of soft housing is to provide a flexible, inventive relationship between the open gathering space of the family and the private rooms for sleep, study, contemplation and play. The bedrooms, private rooms, are soft, flexible honeycomb structures, each made from 500 layers of a light, strong, white paper like material (see report for description). This soft relationship allows for making the most of space, energy and material resources.
