Soft Housing

Design Beyond East & West

The main idea of soft housing is to provide a flexible, inner-gathering space of the family and the private rooms for sleep/bedrooms/private rooms are soft, flexible honeycomb structure light, strong, white paper-like material (see report for details) making the most of space, energy and material resources.

Plan views of model showing transformations in the space layout

ACI Children

- 1 Integral bed frame with firm mattress rests on honeycomb structure
- 2 Facings of framed rigid honeycomb with sliding folding door
- 3 Integral lounge chair
- 4 Niches and alcove storage areas which combine with honeycomb matrix, under beds and under lounge
- 5 Digital space: pull out plywood desk
- 6 Physical cabinet with space for computer, clothes, etc. The honeycomb structure is anchored to this cabinet
- 7 Framed regulation with for shoes, bags, etc.
