(57) **ABSTRACT**

A novel method for using product identifiers includes capturing a product identifier identifying a product, selecting one of a plurality of queries, transmitting the product identifier and the selected query to a data provider, and receiving a response to the selected query from the data provider. The method is performed on a personal data device (e.g., a camera phone, PDA, tablet PC et.), which includes a network interface, a scanner operative to capture the product identifier, a user interface operative to receive the query selection, and an application program interface operative to associate the product identifier and the selected query, transmit the product identifier and the selected query to the data provider via the network interface, and to receive the response to the identifier and query from the data provider via the network interface. A method for the data providers to use the product identifiers is also disclosed, and includes receiving a request from a consumer including a unique product identifier and data indicative of the type of information requested, retrieving the type of requested information associated with the particular product from a database, and transmitting the retrieved information to the consumer. The data provider includes a database associating the product identifiers with information corresponding thereto, and means for the providing the associated information to the requesting consumer.

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
