(54) **SYSTEM FOR DELIVERING WEB CONTENT TO FUEL DISPENSER**

(57) **ABSTRACT**

(76) **Inventor: Dave Dodson, Virginia Beach, VA (US)**

A system implements a communications protocol in connection with a refueling environment coupled to a remote facility. The remote facility is disposed apart from the fuel dispenser locations and is connected to a network such as the World Wide Web of the Internet. Regarding a customer at one of the fuel dispenser locations, a user identification such as credit card account information is sent to the remote facility. The remote facility then establishes an access connection with a network node such as a server, on behalf of the customer. The network communications follow a client-server session format and are correlated to the user ID. The remote facility sends a cookie element to the server that was previously set by the server during an initial Web site visit. The cookie contains state information such as a unique identification number generated by the server. The remote facility associates the unique identification number with the relevant user ID. The server uses the received cookie element to identify the corresponding user profile record maintained at the server side. The server generates customized content from the retrieved user profile record and sends it to the customer.

# Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

## Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

## Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

## Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

## API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

## LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

## FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

## E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
