A universal keyless entry transmitter for sending signals to multiple keyless entry systems. It includes a means for selecting any of several controlled devices and a means for entering transmission codes for each of those devices. In this embodiment, the transmitter is a key chain fob with buttons (26) for all the standard commands typically found on keyless entry systems, especially vehicle security systems. The device has a switch (22) for selecting which device is to be controlled, a fingerprint reader (32) for user identification and a programmable microprocessor (49) for storing user information and signal information for controlling devices. It contains an output display (24), and a menu system for programming signal information and user authorizations.
