Provided is a system and method that increases the functionality of input devices and control panels. A dependent relationship between n functions and n fingertips is associated with an input sensor. Including different motions for each fingertip could extend this dependent relationship and further increase functionality. A user selects only one of his/her fingertips, which then activates the input sensor (through on/off activation and/or motion). The selected fingertip is the only fingertip that is required to activate the input sensor, thereby allowing the input sensor to be arbitrary small. An imaging means is included to identify which fingertip activates the input sensor. Imaging means requires the acquisition of at least one image of a part of the user's hand large enough to identify the selected fingertip activating the input sensor. A processing means is included to determine from data of the input sensor and acquired images which function is selected.

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
