## **I. Introduction**

The Petition challenges claims 17-23 of U.S. Patent No. 8,596,550 (Ex. 1001) under two grounds of unpatentability.

However, this challenge demonstrates a fundamental misunderstanding of the Ehlers '330 reference and its teachings regarding thermal gain. Thermal gain is the addition of thermal heat, not the increase of an inside temperature. Thus, the Ehlers '330 reference and its system teach away from the claimed invention of the '550 patent. Petitioner and its expert ignore this, and instead use improper hindsight to create the claims of the '550 patent out of the prior art.

With respect to Ground 1, Petitioner and its expert further fail to show that the combination of Ehlers '330 and Wruck teaches calculating automated setpoints. Ehlers '330 shows ramping and recovery time, but not calculating automated setpoints. Petitioner and its expert fail to map what in Ehlers '330 they consider the "automated setpoint at a first time" as claimed by the '550 patent. Further, there is no comparison of setpoints in Ehlers '330 or Wruck. Because this comparison is the reason for allegedly combining Ehlers '330 and Wruck, Petitioner has failed to provide a motivation to combine these two references.

With respect to Ground 2, Petitioner fails to show a motivation to combine Ols and Boait. Further, the combination of Ols and Boait does not disclose (1), predicting a rate of change of inside temperatures in response to changes in outside

# Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

## Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

## Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

## Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

## API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

## LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

## FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.
