United States Patent [19] Bilgic

[11] Patent Number: **5,819,041**
[45] Date of Patent: **Oct. 6, 1998**

[54] **COMPUTER PROGRAM HAVING PLURALITY OF SUBTASKS FOR USE IN BASE STATION AND EACH SUBTASK CAPABLE OF BEING MODIFIED TO ALTER THE FUNCTIONALITY OF THE PROGRAM**

[75] Inventor: **Murat I. Bilgic**, Colorado Springs, Colo.

[73] Assignee: **Omnipoint Corporation**, Bethesda, Md.

[21] Appl. No.: **823,026**

[22] Filed: **Mar. 20, 1997**

[51] Int. Cl.⁶ **G06F 13/00**

[52] U.S. Cl. **395/200.51**; 395/677; 455/418

[57] **ABSTRACT**

A computer program for a base station in a wireless communication system to communicate on the system. The communication protocol embodied in the computer program enables the base station to help users of the communication system to acquire a channel on the base station, for communications with the base station. The communication protocol embodied in the computer program also enables the base station to register a user on the system. The communication protocol embodied in the computer program also enables the base station to page a user, and then establish a call link on the system for the user, for a call to the user. The communication protocol embodied in the computer program enables the base station to establish a call link on the system for a call initiated by the user. The communication protocol embodied in the computer program also allows the base station to accept a handover of an established call link on the communication system, from another base station in the system.

The computer program is comprised of a main controller task, an LPI task, and various other tasks, also called subtasks. The main controller task directs the various other tasks to perform discrete communication protocol functions for the base station. The LPI task is the base station's interface task with the backhaul interface.

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
