Claim Rejections - 35 USC § 102

In the event the determination of the status of the application as subject to AIA 35 U.S.C. 102 and 103 (or as subject to pre-AIA 35 U.S.C. 102 and 103) is incorrect, any correction of the statutory basis for the rejection will not be considered a new ground of rejection if the prior art relied upon, and the rationale supporting the rejection, would be the same under either status.

The following is a quotation of the appropriate paragraphs of pre-AIA 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim(s) 1, 6-8, 10, and 15-24 is/are rejected under pre-AIA 35 U.S.C. 102(b) as being anticipated by US 6,795,848 B1 (herein *Border*).

Consistent with the Request for Reexamination of 10/05/2021, the claim language is viewed using the broadest reasonable interpretation. In the case of a “client device”, the broadest reasonable interpretation is a device that acts, at least at some point, as a client. And in the case of a “server”, the broadest reasonable interpretation is a device that acts, at least at some point, as a server.

<i>Claim 1</i>	<i>Border</i>
A method for use with a web server that responds to Hypertext Transfer Protocol (HTTP) requests and stores a first content identified by a first content identifier, the method by a first client device comprising:	<i>Border</i> shows “a web server” (<i>Border: figure 1, element 109</i>), “first content” (<i>Border: column 3, lines 34-46, at least “web content” and/or “URL content”</i>), “a first content identifier” (<i>Border: at least requested “URL”</i>), and “a first client device” (<i>Border: figure 1, element 107, “upstream server”</i>).
