(57) **ABSTRACT**

User interface changes related to moving items in a user interface are disclosed. An operation (e.g., a drag operation) can be initiated on selected items by moving a cursor or pointing device in the user interface, and an animation can be presented illustrating representations of the selected items moving from their respective original locations toward a current location of the cursor or pointing device and forming a cluster in proximity to the current location of the cursor or pointing device. As the cluster of items is moved over a container object in the user interface, the representations of the items can adopt the appearance style defined by that container object. The representations of the items can also be shown to depart from the cluster and move toward anticipated locations of the items in the container object as a preview of a drop operation into the container object.

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
