Usage Note The word *envelope* was borrowed into English from French during the early 18th century, and the first syllable acquired the pronunciation (ōn) as an approximation to the nasalized French pronunciation. Gradually the word has become anglicized further and is now most commonly pronounced (ēn'va-lōp'). The earlier pronunciation is still considered acceptable, however. A recent survey reveals that the (ōn'-) pronunciation for the word *envelope* is used by 30 percent of the Usage Panel and is recognized as an acceptable variant by about 20 percent of those Panelists who normally use the (ēn'-) pronunciation. Other similar words borrowed from French in the modern period include *envoy* (17th century), *encore*, *ennui*, *ensemble*, *entree* (18th century), *entourage*, and *entrepreneur* (19th century).
