

Under the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number.

**DECLARATION (37 CFR 1.63) FOR UTILITY OR DESIGN APPLICATION USING AN APPLICATION DATA SHEET (37 CFR 1.76)**

<b>Title of Invention</b>	<b>EXCLUSIVE DELIVERY OF CONTENT WITHIN GEOGRAPHIC AREAS</b>
---------------------------	--

As the below named inventor, I hereby declare that:

This declaration is directed to:  The attached application, or  
 United States application or PCT international application number \_\_\_\_\_  
filed on \_\_\_\_\_.

The above-identified application was made or authorized to be made by me.

I believe that I am the original inventor or an original joint inventor of a claimed invention in the application.

I hereby acknowledge that any willful false statement made in this declaration is punishable under 18 U.S.C. 1001 by fine or imprisonment of not more than five (5) years, or both.

**WARNING:**

Petitioner/applicant is cautioned to avoid submitting personal information in documents filed in a patent application that may contribute to identity theft. Personal information such as social security numbers, bank account numbers, or credit card numbers (other than a check or credit card authorization form PTO-2038 submitted for payment purposes) is never required by the USPTO to support a petition or an application. If this type of personal information is included in documents submitted to the USPTO, petitioners/applicants should consider redacting such personal information from the documents before submitting them to the USPTO. Petitioner/applicant is advised that the record of a patent application is available to the public after publication of the application (unless a non-publication request in compliance with 37 CFR 1.213(a) is made in the application) or issuance of a patent. Furthermore, the record from an abandoned application may also be available to the public if the application is referenced in a published application or an issued patent (see 37 CFR 1.14). Checks and credit card authorization forms PTO-2038 submitted for payment purposes are not retained in the application file and therefore are not publicly available.

## **EXCLUSIVE DELIVERY OF CONTENT WITHIN GEOGRAPHIC AREAS**

### CROSS REFERENCE TO RELATED APPLICATIONS

**[0001]** This application is a continuation of U.S. Patent Application Ser. No. 12/434,094, filed May 1, 2009, entitled “EXCLUSIVE DELIVERY OF CONTENT WITHIN GEOGRAPHIC AREAS,” the subject matter of which is herein incorporated by reference in its entirety.

### FIELD

**[0002]** This disclosure relates generally to delivery of content, and more particularly to delivery of content within reserved geographic areas.

### BACKGROUND

10 **[0003]** Advertisements can be delivered to various devices, including mobile devices, within communications range of areas transmitters or other information providers. For example, advertisements can be delivered to cellular phones within range of a particular cellular phone provider’s network area. Furthermore, advertisements can be delivered using digital billboards, or via the Internet, based on user interactions and preferences.

15 **[0004]** When delivering advertisements and other content to some mobile devices, currently available technologies can broadcast the content to all devices equipped to receive them. In some cases, advertisements are broadcast to any mobile device within a city, or a similar area. When delivering non-broadcast content, for example via the Internet, it is common to deliver the content in response to a request, received from the receiving device. In some cases, push  
20 technology can be used to deliver content to multiple users concurrently.

**[0005]** In each of these cases, a mobile device can usually receive content from multiple different content providers. Current technologies are, therefore, less than perfect.

## SUMMARY

- [0006]** Various embodiments disclosed herein include registering an application program for use with a content delivery platform, establishing multiple perimeters defining respective geographic areas, and maintaining records associating sponsors with particular geographic areas.
- 5 The content delivery platform can receive a request from a registered application program for content to be displayed on a mobile device, and the request can be used to determine a target location. In some embodiments, a sponsor is selected based on a relationship between the target location and one or more reserved geographic areas. Content is then provided to the application program.
- 10 **[0007]** In some embodiments, the content delivery platform can record a request identifier associated with a received request, and provide the request identifier to the mobile device to assist in tracking future actions relating to the request for content. The content delivery platform can also receive information related to user interaction with the provided content, including the request identifier, and provide additional content in response to the received information.
- 15 **[0008]** Content can be delivered to a mobile device running a registered application if a target location is at least partially within a predetermined radial distance of a geographical area associated with a sponsor; if the mobile device is not located within the predetermined radial distance, the radial distance can be increased. In some embodiments, content is delivered if the target location, e.g. the location of the mobile device or another location of interest, is located
- 20 entirely within a geographic area exclusively reserved by a particular sponsor. In some embodiments, the content delivery platform can select from among several sponsors in deciding which content to deliver to a mobile device.
- [0009]** In at least one embodiment, the content delivery system reserves exclusive interests in geographic areas for particular sponsors based on the sponsors' requests, and store a record of
- 25 that interest. In some embodiments, the content delivery system receives, from a sponsor, content to be delivered to mobile devices based on a target location being positioned within particular geographic areas. The content delivery system can also reserve an interest in

geographic areas that remain unreserved by other sponsors. Furthermore, some embodiments include time based restrictions.

5 [0010] Various embodiments can be implemented as a system that includes memory, a communications interface, and a processor that cooperate to store and execute a program of instructions implementing various methods and techniques described herein. Furthermore, some embodiments can be implemented as a computer readable medium tangibly embodying a program of instructions.

#### BRIEF DESCRIPTION OF THE DRAWINGS

10 [0011] FIG. 1 is an abstract representation of exclusive content delivery to particular reserved areas according to various embodiments of the present disclosure;

[0012] FIG. 2 is a diagram illustrating a target location other than the location of the mobile device executing a registered application, according to embodiments of the present disclosure;

15 [0013] FIG. 3 is a graph representing expanded search areas to determine which content is delivered according to various embodiments of the present disclosure;

[0014] FIG. 4 is a flowchart illustrating a method of reserving a geographic area according to embodiments of the present disclosure;

[0015] FIG. 5 is a flowchart illustrating registration of an application for content delivery according to embodiments of the present disclosure;

20 [0016] FIG. 6 is a flowchart illustrating delivery of content to particular applications in a reserved area according to embodiments of the present disclosure;

[0017] FIG. 7 is a diagram illustrating a processing system according to embodiments of the present disclosure.

## DETAILED DESCRIPTION

**[0018]** Various embodiments of the present disclosure provide for delivering content, such as advertising, to registered applications being run on any of various mobile electronic devices configured to be readily moved, carried, or otherwise transported between different various geographic areas defined by perimeters. Sponsors can reserve an exclusive interest, or in some  
5       embodiments a semi-exclusive interest, in a geographic area, so that other sponsors' advertisements are excluded from being broadcast or otherwise provided to a registered program being executed on a mobile device located within a reserved geographic area.

**[0019]** Referring first to Figure 1, system 100, is illustrated. System 100 can provide for  
10       exclusive delivery of advertising or other content to registered applications running on mobile devices located within a particular proximity to a reserved geographic area. System 100, as illustrated, includes content delivery platform 112, which is in communication with developer platform 108, and systems or individuals operating under control of sponsor A 121, sponsor C 123, and sponsor B 125. Content delivery platform 112 receives a request from developer  
15       platform 108 to register a program or other application for use on mobile devices. Content delivery platform 112 can use the registered application program to provide selected content to mobile devices.

**[0020]** In some embodiments, a registered application program is provided to mobile devices by developer platform 108, content delivery platform 112, one of sponsor A 121, sponsor C 123,  
20       or sponsor B 125, or by another desired delivery mechanism. In some embodiments, registering the application program with content delivery platform 112 allows developer 108 to receive revenue from sponsor A 121, sponsor C 123, or sponsor B 125 for content displayed on a mobile device located within, or in proximity to, a geographical area reserved by one or more of the sponsors.

**[0021]** Sponsor A 121, sponsor C 123, or sponsor B 125 can reserve an exclusive interest in a  
25       particular geographic area by sending a request to content delivery platform 112. In some embodiments, the request can be for exclusive delivery of content to mobile devices running any registered application within given geographic areas, or for content to be delivered to particular

registered applications based on a target location. The request can also include time limitations, limitations based on the length of time a mobile device remains within a given geographic area, or other desired limitations. Furthermore, the reserved interest can be either completely exclusive, or semi-exclusive.

5 **[0022]** System 100 can include a network, for example Internet 131, through which content delivery platform 112, can communicate to other networked devices; and communication towers 144, which can include AM or FM broadcast towers, mobile telephone stations, or other suitable communication infrastructure, including satellites (not illustrated) that might be useful in providing content based on a target location. Content delivery platform 112 can use this  
10 communication infrastructure to communicate with various computing devices, including portable computer 179, which may include laptop computers, desktop computers, palmtop computers, tablet computers, digital video recorders (DVRs), television set-top boxes, or any of various general or dedicated purpose computers that can be carried or transported; wireless device 177, which can include personal digital assistants (PDAs), cellular telephones, personal  
15 communication system (PCS) devices, music players, video players, gaming consoles, or portable televisions; or any of various devices that may be included in, or carried by, motor vehicles 171, 173, or 175, including navigation systems, satellite radios, or the like. It should be noted that the term "mobile device" can include all computing devices as listed above that can communicate with content delivery platform 112, that the above listing of devices is not  
20 exhaustive, and that a device that qualifies as one type of device may also be considered to be of another type. For example, a mobile phone may also be a general purpose computing device, a radio, a television, and a navigation system.

**[0023]** Still referring to Figure 1, consider first motor vehicle 171, which is located within sponsor A's reserved geographic area 143. A driver of first motor vehicle 171 can receive  
25 advertisements or other content from Sponsor A via a registered application running on a radio, a PDA, a cellular telephone, a laptop, or a global positioning navigation device (none of which are specifically illustrated). In this example, because first motor vehicle 171 is located within sponsor A's reserved geographic area 143, content delivery platform 121 provides content

exclusively related to sponsor A 121; advertisements or other content from sponsor C 123 and sponsor B 125 can be excluded.

5 **[0024]** Portable computer 179 can be connected to Internet 131 via a hardwired network connection, a Wi-Fi connection or other suitable communication connection. In some embodiments, if portable computer 179 is running a registered program application, the user of portable computer 179 will receive content related exclusively to sponsor A as long as he is within sponsor A's reserved geographic area 143. In some embodiments, the driver of first motor vehicle 171 and the user of laptop 179 will still be able to receive advertisements from other sponsors through devices not running a program that has been registered on content  
10 delivery platform 112, or through non-registered programs running on the same device.

**[0025]** In some embodiments, the location of mobile devices, or another target location, can be determined using various suitable methods. For example, a mobile device running a registered application can provide location information to content delivery platform 112 in the form of latitude or longitude coordinates, raw or processed GPS data, or other location information  
15 received and recorded by either the device itself or another device. In some embodiments, a target location, e.g. the location of a mobile device, can be determined based on signals received from cellular transmission towers, satellites, or methods such as triangulation or dead reckoning, or by IP address. Content delivery platform 112 can receive the location of mobile devices from a third source, for example a location provider, a cellular telephone network provider, or a third  
20 party tracking source, rather than from the mobile device itself. Thus, the location of a mobile device can be received from the mobile device, determined by content delivery platform 112, received from a third-party source, or determined based on a combination of these or other methods.

**[0026]** Sponsor A's reserved geographic area 143 illustrates an embodiment in which a  
25 perimeter can be defined by streets, county boundaries, city boundaries, landmarks, or other features commonly found on maps. In contrast, sponsor B's reserved geographic area 145 can be an ellipse, circle, oval, or other geometric shape that can be determined, at least in part, based on a radius.

**[0027]** In this example, both second motor vehicle 173 and wireless device 177 are located within sponsor B's reserved geographic area 145. The driver of second motor vehicle 173 and the user of wireless device 177 can receive advertisements or other content via towers 144. For example, if the driver of second motor vehicle 173 is operating a navigation device executing an application program registered by developer 108, advertisements and other content received on the navigation device can be determined based on the location within sponsor B's reserved geographic area 145. Likewise, the user of wireless device 177 will receive advertisements related to sponsor B from within a registered application. In some embodiments, content delivery platform 112 can prevent content from sponsor A 121 and sponsor C 123 from being delivered to a mobile device carried by second motor vehicle 173 and wireless device 177, because both motor vehicle 173 and wireless device 177 are located in sponsor B's reserved geographic area 145.

**[0028]** Turning next to sponsor A and sponsor C's reserved geographic area 147, note that the perimeter is a square, rectangle or similarly shaped. In some embodiments, the perimeter may be defined entirely by longitude and latitude lines and/or coordinates that constitute an area. In other embodiments, sponsor A and sponsor C's reserved geographic area 147 can be partially bounded by a longitude or latitude line, a road, river, railway, county, state, parish, city, locality, or other desired boundary. In some embodiments, the perimeter of a sponsor A and sponsor C's reserved geographic area 147 can be defined by a combination of longitude or latitude lines, with one or more remaining boundaries defined based on radius or diameter.

**[0029]** Because third motor vehicle 175 is within sponsor A and sponsor C's reserved geographic area 147, a mobile device carried by third motor vehicle 175 can receive advertising content from either or both sponsor A and sponsor C. In some embodiments, the interest in sponsor A and sponsor C's reserved geographic area 147 can be equally divided between sponsor A 121 and sponsor C 123, while in other embodiments one of sponsor A 121 and sponsor C 123 can have an interest superior to that of the other. In some embodiments, content delivery platform 112 can deliver advertisements or other content related to Sponsor A at selected times, while content related to Sponsor C is delivered at other times. Additionally, content related to sponsor A may be delivered via a first registered application, while content related to sponsor C

can be delivered via a second registered application. Thus, sponsors can advertise or provide other content to members of particular demographics based on a type of application a particular demographic is more likely to use.

5 **[0030]** Referring next to Figure 2, a target location other than a mobile device in a system 200 is illustrated according to embodiments of the present disclosure. As shown in Figure 2, a user of registered application 231 is located within the perimeter defining first sponsor's reserved area 207. Object of interest 233 is located in second sponsor's reserved area 205. In some embodiments, object of interest 233 can be any type of object of interest to the user of registered application 231. For example, object of interest 233 could be a friend of the user of registered application 231, and this friend may be employing a mobile phone, a laptop, a kiosk computer, a PDA, or any other device capable of sending location information 216 directly or indirectly to registered application 231. In some embodiments, target location information 216 can be any type of information that can be used to determine the location of the object of interest 233. In at least one embodiment, target location information 216 may be a geocoded twitter message. In 10 another example, object of interest 233 could be an end destination on a map, and the location information 216 of this end destination can be sent to registered application 231.

**[0031]** In response to receiving the target location information 216 from object of interest 233, registered application 231 can send a request 213 to content delivery platform 212. The request can include, but is not limited to, information indicating the location of object of interest 233, a request for content, information indicating the location of registered application 231, information 20 indicating the identity of the registered application 231, and a previously received request identifier.

**[0032]** Content delivery platform 212 can receive and process request 213 to identify the location of registered application 231 and the location of object of interest 233. In some 25 embodiments, both locations need not be identified. Furthermore, in some embodiments the specific location need not be identified, as long as a determination that object of interest 233 is located within a given proximity of second sponsor's reserved area 205, or that registered application 231 is located within first sponsor's reserved area 207.

**[0033]** Content delivery platform 212 can provide registered application information 217 to second sponsor 225 to allow second sponsor 225 to deliver second sponsor's content 214 to registered application 231. The registered application information 217 can be an application identifier, a request identifier, a target location, a communications address, or other information that can be utilized by second sponsor 225. In some embodiments, application information 217 need not be provided to second sponsor 225, but instead can be processed internally by content delivery platform 212, and a determination can be made for second sponsor's content 214 to be delivered directly to application 231 from content delivery platform 212, or a third party (not illustrated).

10 **[0034]** Note that in the illustrated embodiment, despite the fact that registered application 231 is located within first sponsor's reserved area 207, the information delivered to registered application 231 can be content related exclusively to second sponsor's reserved area 205, in which object of interest 233 is located. This is because, in the illustrated embodiment, the target location is the location of object of interest 233, rather than the location of a mobile device  
15 executing registered application 231.

**[0035]** In some embodiments, information from the first sponsor can also be delivered to registered application 231, because the locations of the device running registered application 231 and object of interest 233 are both considered target locations. Furthermore, in some  
20 embodiments content need not be delivered directly from second sponsor 225, but instead can be provided by content delivery platform 212, or a third party (not illustrated).

**[0036]** Referring next to Figure 3, a graph showing various geographic areas with reference to longitude and latitude is illustrated according to some embodiments of the present disclosure. The geographic areas in Figure 3 are for illustration only and carry no particular significance with respect to their geometric shapes. Graph 300 includes a triangular area 320, reserved for  
25 sponsor A; pentagonal area 371, reserved for sponsor G; and octagonal area 330, also reserved for sponsor G. In the illustrated example, sponsor G has two physical addresses: G1 327, which lies within sponsor G's reserved octagonal area 330, and G2 328 which, lies within sponsor A's reserved triangular area 320. Furthermore, in the illustrated embodiment, sponsor A does not

have a physical location within sponsor A's reserved triangular area 320. These examples help illustrate that there is not necessarily a correlation between a sponsor's physical address and a reserved geographic area, although in some embodiments there may be such a correlation.

5 **[0037]** As illustrated by Figure 3, a single target location F 333 is located within sponsor G's reserved octagonal area 330, and target location F 333 can be a mobile device running a registered application, or target location F 333 can represent a target location other than the location of a mobile device, as illustrated in Figure 2. In some embodiments, the mobile device with target location F 333 receives advertising exclusively from advertiser G.

10 **[0038]** As further illustrated by Figure 3, there are four target locations: target location A 321, target location B 323, target location C 325, and target location G 392 within advertiser A's reserved triangular area 320. Note also, however, that target location G 392 also lies within one of sponsor G's reserved geographic areas, pentagonal area 371. Consider the following example in which target location A 321 and target location B 323 each are mobile devices executing a first application registered with a content delivery platform, such as content delivery platform  
15 112, of Figure 1. Further assume, for purposes of this example, that target location C 325 is a mobile device executing a second, different application, which is also registered with the content delivery platform. Because both the first and second applications are registered with the content delivery platform, each of the three devices, with target location A 321 target location B 323 and target location C 325 can receive advertisements or other content from within their respective  
20 applications. In this example, the content delivered to all three devices can be related exclusively to sponsor A, regardless of which registered application is being executed, because sponsor A has the only reserved interest in the portions of triangular area 320 occupied by mobile devices having target locations A 321 B 323 and C 325.

25 **[0039]** In some embodiments, target location G 392 can be a mobile device running two or more registered applications, and can receive content related to sponsor A, because the mobile device lies within triangular area 320. But, target location G 392 also lies within pentagonal area 371, and the mobile device can therefore receive content associated with sponsor G. In some embodiments, content related to sponsor A can be delivered via one of the registered

applications, while another registered application receives and displays content related to sponsor G. In other embodiments, one of sponsor A or sponsor G can have a superior interest to the other, and a preference can be given to that sponsor's content for delivery. For example, sponsor G may have a superior interest in pentagonal area 371, which also forms part of triangular area 5 320. In such a case, if content related to sponsor G is available for delivery to the application on the mobile device with target location G 392, that content will be delivered in preference to content related to sponsor A. However, if there is no high priority content related to sponsor G to be delivered, content related to sponsor A may be provided in its stead. Various other priority and time sharing mechanisms and methods can be implemented according to the teachings set 10 forth herein. Note that in some embodiments, multiple registered applications are not required to implement priority and time sharing mechanisms.

**[0040]** In some instances, a mobile device can have target locations, such as target location D 324 or target location E 356, located outside of areas reserved by sponsors. In such a case, a check can be made to determine if either target location D 340 or target location E 356 are 15 located within a given proximity of a sponsor-reserved area such as triangular area 320 or octagonal area 330. So, for example, a check can be made to determine whether any reserved areas lie within a given radius of target location D 340, defining a search area 341, or within a given radius of target location E 356, defining a search area 351. In some embodiments, if no sponsor reserved area intersects an area within an initially small radius, further checks can be 20 performed by incrementally increasing the radius. So, for example, after a first check finds no advertiser reserved areas within search areas 341 or 351, the search areas can be increased to encompass areas 343 and 353, respectively.

**[0041]** In the illustrated example, there is no reserved area intersecting search area 353, but sponsor H 357 has a physical address within area 353. In some embodiments, once it is 25 determined that a registered sponsor has a physical address location within a search radius, but there are no sponsor reserved geographic areas in proximity to or encompassing a target location, an advertisement or other content can be delivered to a mobile device, such as the device with target location 356.

**[0042]** Another situation arises when there are no sponsor reserved geographic areas intersecting a search area, but there are multiple sponsor physical locations within a given radius. Consider area 343, which contains sponsor E's location 349, and sponsor F's location 347. Because neither sponsor E nor sponsor F has established a reserved area that intersects with search area 343, a random choice can be made between these two sponsors to determine which sponsor's content to provide to the registered application on the device with target location D 340. In other embodiments, preference may be given to one of sponsor E's location 349 and sponsor F's location 347 based on each physical locations' proximity to target location D 340, based on a travel time between the device with target location D 340 and the sponsors' locations, or based on some other desired parameter. In further embodiments, if no sponsor's reserved geographic area intersects any portion of area 343, no content is sent to mobile device D with target location 340, despite the fact that location sponsor E's location 359, and sponsor F's location 347 are both within the perimeter defining search area 343.

**[0043]** In some embodiments, the search radius can continue to be expanded until a search area 345 intersects with a sponsor reserved geographic area. In the illustrated embodiment, search area 345 intersects sponsor A's reserved triangular area 320. Note that sponsor G2's physical location 328 is also located within search area 345. In some embodiments, content from either sponsor A or sponsor G can be selected using any of various processes, because target location D 340 is not located entirely within triangular area 320. In some embodiments, however, because the expanded search area 345 encompasses even a portion of sponsor A's reserved triangular area 320, content related to sponsor G will be excluded, and content related to sponsor A will be exclusively provided to mobile device with target location D 340. In some embodiments, because target location D 340 is not located within sponsor A's reserved triangular area 320, content related to sponsor A will be excluded, and content related to sponsor G will be exclusively provided to mobile device with target location D 340.

**[0044]** Additional techniques accounting for the proximity of exclusively reserved advertising areas and sponsor's physical locations with respect to mobile device locations can be implemented according to the teaching set forth herein. For example, in some embodiments, sponsors may obtain an interest in all otherwise unreserved geographic areas. For example, a

content delivery system can deliver content from a “default” sponsor, if it is determined that no other content is to be delivered to a mobile device.

**[0045]** Referring next to Figure 4, a method 400 for allowing sponsors to reserve particular geographic areas will be discussed according to embodiments of the present disclosure. Method 400 begins, as illustrated by block 401. As illustrated by block 403, a content delivery platform, for example content delivery platform 112 as illustrated in Figure 1, can receive a request for sponsor registration, which can also include receiving physical address location from the sponsor. As illustrated by block 405, the sponsor can establish perimeters defining geographic areas of exclusive or semi-exclusive control. These geographic areas are areas the sponsor wishes to reserve for delivery of his own advertisements or other content controlled by the sponsor.

**[0046]** The perimeters established can be based on map features, such as streets, rivers, landmarks, or any of the other various map features. The perimeters can also be defined by latitude and longitude, or various geometric constructs having a given relative position to either a point location, a map location, a physical address, or otherwise. Some embodiments allow for establishing perimeters defining areas based on a combination of the various types of constructs. So, for example, latitude, longitude and map features may be used to establish the reserved area, or a combination of coordinates and geometric constructs can be used in conjunction with other suitable boundary identifiers to establish an area that may be reserved specifically for content related to a particular advertiser or sponsor.

**[0047]** In some embodiments, the perimeters may be generated interactively, using sponsor established perimeter definitions, or other unique sponsor requests. Some embodiments employ pre-defined areas, or allow selection of areas based on predetermined factors, and present sponsors a choice from among previously established options.

**[0048]** As illustrated by block 407, a sponsor’s request for a selected area is received. As illustrated by block 409, a check is made to determine if the selected area, or a portion of the selected area, has already been reserved by another sponsor. If the area selected by the sponsor is already owned or is otherwise unavailable, method 400 may return to block 407, and the

sponsor can choose another area. In some embodiments, overlap of various sponsor areas may be allowed based on type of business, type of application used to deliver the content, or otherwise.

5 **[0049]** As illustrated by block 411, if an area selected for exclusive or semi-exclusive content delivery is available, the selected geographic area can be reserved for the sponsor. And as illustrated by block 413, the sponsor can be notified that an interest in the geographic area has been reserved for him.

10 **[0050]** A sponsor can provide content for delivery to mobile devices having target locations contained within its reserved area, as illustrated by block 415. This content can include advertisements, still image content, animated content, video content, audio content, alphanumeric identifiers, or other content suitable for delivery to mobile devices via registered applications. As illustrated by block 417, the content received from the sponsor can be stored for later delivery to registered applications running on mobile devices having target locations that exist within the sponsor's reserved area, which such target locations may include, but are not limited to, when the mobile device or target location physically enters or remains within the sponsor's reserved area for a desired length of time. In some embodiments, content can be delivered to a mobile device by the sponsor or another party in response to a notification that the mobile device or target location has entered or is contained within the sponsor's reserved area. Method 400 ends, as illustrated at block 419.

20 **[0051]** Referring next to Figure 5, a method 500 of registering an application program for use in conjunction with a content delivery platform is illustrated according to various embodiments of the present disclosure. Method 500 begins as illustrated by block 501. As illustrated by block 503, an application can be registered on a content delivery platform in response to a request by a developer, for example developer 108 as illustrated in Figure 1. As illustrated by block 505, a request for content can be received from a device running a registered application. In some embodiments, the same registered application may be executed on any of various mobile devices, including mobile telephones, personal digital assistants, laptops, and the like. Furthermore, multiple devices may execute copies of the same registered application, multiple

different registered applications may be executed on a single mobile device, and multiple different registered applications may be executed on multiple devices.

5 **[0052]** As illustrated by block 507 a determination is made as to whether the application sending the request for content has a target location that is located within a sponsor's reserved geographic area. In some embodiments, the target location may be the location of the device. In some embodiments, the target location may be a location other than the location of the device, as illustrated in Figure 2. As illustrated by block 509, if the target location is located within a sponsor's reserved area, content from the corresponding sponsor can be chosen for delivery to the mobile device. The content can be chosen based on a number of different parameters or  
10 combinations of parameters. In some embodiments, different sponsors may designate particular content to be provided on different days of the week or at different times of day. Some such embodiments allow a single geographic area to be shared by different advertisers or sponsors. For example, content associated with a first sponsor may be selected for delivery in a particular geographic area during the lunch hour, while content related to a second sponsor is selected for  
15 delivery in that same geographic area between the hours of midnight and 2 am.

**[0053]** In some embodiments, content from one sponsor can be selected for delivery in a particular geographic area in specific situations, even though a different sponsor has generally reserved that same geographic area. For example, content from a first sponsor can be delivered during a football game to mobile devices located in a geographic area normally reserved by a  
20 second sponsor, effectively trumping content related to the second sponsor that would otherwise be delivered. In some embodiments, additional criteria can be applied to determine which sponsors' content will be provided to mobile devices in a particular geographic area.

**[0054]** As illustrated by block 511, selected content can be provided to an application for display on a mobile device. In at least one embodiment, different content from the same sponsor  
25 can be provided to the same device for display within different applications, or the same content from the same sponsor can be displayed for all mobile devices running all registered applications that have target locations within the delivery area for the content. For example, a first program run on a mobile device may display a first advertisement within that program while a second

program running on the same device may display a second advertisement, which is different from the first advertisement. In some embodiments in which an interest in a particular geographic area is shared between multiple sponsors, a primary sponsor's content can be exclusively displayed via a first registered application running on a particular mobile device, while content from other sponsors can be displayed via a second and subsequent applications running on the same mobile device.

5  
10  
15  
20  
25

**[0055]** As illustrated by block 513, if the target location is not within a sponsor's reserved area, a determination can be made regarding whether at least one sponsor's presence is within a first predetermined radius of the target location. In some embodiments, a determination is made regarding whether a sponsor's physical location is within a predetermined radius of the target location. In some embodiments, a determination is made regarding whether a sponsor's geographic area, or a portion of a sponsor's geographic area, is contained within a predetermined radius of the target location. If at least one sponsor's presence is within a predetermined radius of the target location, a sponsor is chosen from a random or pseudo-random process, as illustrated by block 519. Content is then selected for delivery, as illustrated by block 509. As illustrated by block 515, if a sponsor's presence is not within a predetermined radius of the target location, the search radius can be increased. As illustrated by block 517, a check can be made to determine whether any more increases should be made. In some embodiments, the search radius can continue to be increased incrementally, in a logarithmic manner, or otherwise, until at least a portion of a sponsor's reserved area intersects the search area defined by the search radius. In some embodiments, the search radius can be increased a predetermined number of times, or can be limited based on system resources, time constraints, or other desired parameters. The processes illustrated by blocks 513, 515, and 517 can be repeated until a positive indication is produced by the process at block 517.

25

**[0056]** As illustrated by block 519, content from a randomly or pseudo-randomly selected sponsor can be delivered to a mobile device if the target location is not within a desired proximity to a sponsor's reserved area. In some embodiments, rather than delivering content randomly, content selections can be made based on desired criteria. Content related to a sponsor that reserved all otherwise unallocated space can be delivered to a mobile device executing a

registered application. In some such embodiments, if any particular geographic areas have not yet been reserved, or if any device requesting content does not have a target location contained within a reserved geographic area, the default sponsor's content can be delivered to the mobile device. Method 500 ends as illustrated by block 521.

5 **[0057]** Preferring next to Figure 6, a method of interaction between a mobile device and a content providing platform is illustrated according to various embodiments of the present disclosure. Method 600 begins as illustrated by block 601. As illustrated by block 603 an application platform key can be provided to a developer in response to the developer registering an application for use on the application platform. The developer can, in turn, provide the key to  
10 mobile devices on which the registered application is installed. As illustrated by block 605, when a mobile device requests content from the content providing platform, the mobile device can send the key along with its request. As illustrated by block 607, the content providing platform can verify that the key matches a valid key stored in its database, or elsewhere, before providing content to the application.

15 **[0058]** In some embodiments, key verification can be performed by an entity other than the content providing platform. As illustrated by block 627, if a verification check on the key fails, no content is provided to the requesting application, and the method 600 ends.

**[0059]** As illustrated by block 609, if the key is validated a session can be initiated between the application on the mobile device, and the content delivery platform. As illustrated by block 611  
20 in at least one embodiment, the application running on the mobile device sends the mobile device's location, or another target location, to the content delivery platform. However, in some embodiments the actual location is not sent by the device, but may be provided to the content delivery platform from another source. Furthermore, the content delivery platform, or a subsystem of a communications system employed by the content delivery platform, can  
25 determine the location of the mobile device based on raw, partially, or completely processed information received from the mobile device or from another source. For example, the mobile device can forward information associated with a target location to the content delivery platform, or the content delivery server can obtain location information from a third party application or

device, from a home location register (HLR), from a visiting location register (VLR), from raw, differential, processed or semi-processed GPS data, from power signals used in code-division multiple access (CDMA) or other wireless communications systems, or otherwise.

5 **[0060]** As illustrated by block 613, the content delivery platform records the request from the registered application in a request identifier in the platform database, or some other suitable storage location. The request identifier can be used in some embodiments to track further interaction with the registered application, or to deliver additional content to a requesting mobile device. Thus, in some embodiments, a mobile device or other target location that is only temporarily located within a particular sponsor's reserved geographic area may continue to receive information from that sponsor after the mobile device, or the target location, exits the sponsor's reserved area. In other embodiments, content related to a sponsor is discontinued in response to a mobile device exiting, or the target location losing focus within, the sponsor's reserved area.

15 **[0061]** As illustrated by block 615, the content delivery platform can deliver the request identifier to the requesting application along with the requested content. As illustrated by block 617, a user of the mobile device can interact with the provided content using any of various methods such as pressing a button, selecting a user selectable object on a graphical user interface, or otherwise. The application on the mobile device can send an indication of the interaction to the content delivery platform via the same communication channel used to send the request, or via a different communications channel.

20 **[0062]** As illustrated by block 619, a registered application running on a mobile device can send an additional information request to the platform using the previously assigned request identifier. In some embodiments, using the previously assigned platform request identifier permits tracking of a series of interactions between a particular application and the content delivery platform. Furthermore, using the request identifier can allow individualized content to be delivered to different registered applications which may or may not be running on the same mobile device.

5 **[0063]** As illustrated by block 621, a determination is made regarding whether a request identifier sent in conjunction with a request for further information is maintained in the platform database or other suitable storage. As illustrated by block 623, if the request identifier is contained in the database or other storage area, the content delivery platform can update a request identifier record as being complete. And as illustrated by block 625, the content delivery platform can deliver more content to the requesting application. As illustrated by block 627, method 600 can proceed to end after delivering the additional content.

10 **[0064]** The methods and processes discussed previously, as well as other embodiments, may be implemented in a processing system executing a set of instructions stored in memory, or on a removable computer readable medium. An example of a system according to some embodiments is illustrated in Figure 7. Referring now to Figure 7, a high-level block diagram of a processing system is illustrated and discussed. Processing system 700 includes one or more central processing units, such as CPU A 705 and CPU B 707, which may be conventional microprocessors interconnected with various other units via at least one system bus 710. CPU A  
15 705 and CPU B 707 may be separate cores of an individual, multi-core processor, or individual processors connected via a specialized bus 711. In some embodiments, CPU A 705 or CPU B 707 may be a specialized processor, such as a graphics processor, other co-processor, or the like.

20 **[0065]** Processing system 700 includes random access memory (RAM) 720; read-only memory (ROM) 715, wherein the ROM 715 could also be erasable programmable read-only memory (EPROM) or electrically erasable programmable read-only memory (EEPROM); and input/output (I/O) adapter 725, for connecting peripheral devices such as disk units 730, optical drive 736, or tape drive 737 to system bus 710; a user interface adapter 740 for connecting keyboard 745, mouse 750, speaker 755, microphone 760, or other user interface devices to system bus 710; communications adapter 765 for connecting processing system 700 to an  
25 information network such as the Internet or any of various local area networks, wide area networks, telephone networks, or the like; and display adapter 770 for connecting system bus 710 to a display device such as monitor 775. Mouse 750 has a series of buttons 780, 785 and may be used to control a cursor shown on monitor 775.

**[0066]** It will be understood that processing system 700 may include other suitable data processing systems without departing from the scope of the present disclosure. For example, processing system 700 may include bulk storage and cache memories, which provide temporary storage of at least some program code in order to reduce the number of times code must be  
5 retrieved from bulk storage during execution.

**[0067]** Various disclosed embodiments can be implemented in hardware, software, or a combination containing both hardware and software elements. In one or more embodiments, the invention is implemented in software, which includes but is not limited to firmware, resident software, microcode, etc. Some embodiments may be realized as a computer program product,  
10 and may be implemented as a computer-usable or computer-readable medium embodying program code for use by, or in connection with, a computer, a processor, or other suitable instruction execution system.

**[0068]** For the purposes of this description, a computer-usable or computer readable medium can be any apparatus that can contain, store, communicate, propagate, or transport the program  
15 for use by or in connection with the instruction execution system, apparatus, or device. By way of example, and not limitation, computer readable media may comprise any of various types of computer storage media, including volatile and non-volatile, removable and non-removable media implemented in any suitable method or technology for storage of information such as computer readable instructions, data structures, program modules, or other data. Computer  
20 storage media include, but are not limited to, RAM, ROM, EEPROM, flash memory or other memory technology, CD-ROM, digital versatile disks (DVD) or other optical storage, magnetic cassettes, magnetic tape, magnetic disk storage or other magnetic storage devices, or any other medium which can be used to store the desired information and which can be accessed by a computer. Data structures and transmission of data (including wireless transmission) particular to  
25 aspects of the disclosure are also encompassed within the scope of the disclosure.

**[0069]** Various embodiments have been described for delivering content related to a commercial media program. Other variations and modifications of the embodiments disclosed

may be made based on the description provided, without departing from the scope of the invention as set forth in the following claims.

WHAT IS CLAIMED IS:

1 1. A method comprising:  
2 registering a plurality of application programs for use with a content delivery platform, wherein  
3 the plurality of registered application programs are each associated for use with a  
4 navigation system;  
5 establishing a plurality of perimeters defining a plurality of geographic areas;  
6 reserving delivery of content from a plurality of sponsors to the plurality of registered application  
7 programs on the basis of a geographic area associated with each of the plurality of  
8 registered application programs;  
9 receiving, from a registered application program, a request for content to be used within the  
10 registered application program;  
11 in response to receiving the request:  
12 selecting content from at least one sponsor to be delivered to the registered application  
13 program, subject to the reserving; and  
14 providing the content from the at least one sponsor to the registered application program.

1 2. The method of Claim 1, further comprising:  
2 recording a request identifier associated with the request; and  
3 providing the request identifier to the registered application program.

1 3. The method of Claim 2, further comprising:  
2 receiving information related to user interaction with the provided content, the information  
3 including the request identifier; and  
4 providing additional content to the registered application in response to the received information.

1 4. The method of Claim 1, further comprising:  
2 determining whether at least one of the plurality of sponsors is associated with a geographical  
3 representation lying at least partially within a predetermined radial distance of a target  
4 location;

5 in response to a negative determination, increasing the predetermined radial distance.

1 5. The method of Claim 1, further comprising:  
2 receiving, from a sponsor, a request to obtain an interest in a selected one of the plurality of  
3 geographic areas;  
4 providing the sponsor a response to the request; and  
5 storing a record of the interest in the selected one of the plurality of geographic areas.

1 6. The method of Claim 5, further comprising:  
2 receiving, from the sponsor, content to be delivered to registered application programs having  
3 target locations contained within a selected one of the plurality of geographic areas.

1 7. The method of Claim 1, further comprising:  
2 reserving a specific one of the plurality of geographic areas for exclusive delivery of content  
3 associated with a particular one of the plurality of sponsors to registered application  
4 programs and having a target location contained within the specific one of the plurality of  
5 geographic areas.

1 8. A system comprising:  
2 memory;  
3 a communications interface operably coupled to the memory; and  
4 at least one processor operably coupled to the memory and the communications interface, the  
5 processor configured to execute a program of instructions, the program of instructions  
6 comprising:  
7 at least one instruction to register a plurality of application programs for use with a  
8 content delivery platform, wherein the plurality of registered application programs  
9 are each associated for use with a navigation system;  
10 at least one instruction to establish a plurality of perimeters defining a plurality of  
11 geographic areas;

12 at least one instruction to maintain at least one record indicating content delivery  
13 reservations associating each of a plurality of sponsors with at least one of the  
14 plurality of geographic areas;  
15 at least one instruction to receive a request from a registered application program for  
16 content to be used within the registered application program;  
17 at least one instruction to select content associated with at least one of the plurality of  
18 sponsors to be delivered to the registered application program in accordance with  
19 a content delivery reservation associating the at least one sponsor with a  
20 geographic area; and  
21 at least one instruction to provide the selected content to the registered application  
22 program.

1 9. The system of Claim 8, wherein the program of instructions further comprises:  
2 at least one instruction to record a request identifier associated with the request; and  
3 at least one instruction to provide the request identifier to the registered application program.

1 10. The system of Claim 9, wherein the program of instructions further comprises:  
2 at least one instruction to receive information related to user interaction with the provided  
3 content, the information including the request identifier; and  
4 at least one instruction to provide additional content to the registered application in response to  
5 the received information.

1 11. The system of Claim 8, wherein the program of instructions further comprises:  
2 at least one instruction to determine whether at least one of the plurality of sponsors is associated  
3 with a geographical representation lying at least partially within a predetermined radial  
4 distance of a target location; and  
5 at least one instruction to increase the predetermined radial distance in response to the at least  
6 one instruction to determine.

1 12. The system of Claim 8, wherein the program of instructions further comprises:  
2 at least one instruction to receive, from a sponsor, a request to obtain an interest in a selected one  
3 of the plurality of geographic areas;  
4 at least one instruction to provide the sponsor a response to the request; and  
5 at least one instruction to store a record of the interest in the selected one of the plurality of  
6 geographic areas.

1 13. The system of Claim 12, wherein the program of instructions further comprises:  
2 at least one instruction to receive, from the sponsor, content to be delivered to registered  
3 application programs having target locations contained within the selected one of the  
4 plurality of geographic areas.

1 14. The system of Claim 8, wherein the program of instructions further comprises:  
2 at least one instruction to reserve a specific one of the plurality of geographic areas for exclusive  
3 delivery of content associated with a particular one of the plurality of sponsors to  
4 registered application programs and having a target location contained within the specific  
5 one of the plurality of geographic areas.  
6

7 15. A non-transitory computer readable medium tangibly embodying a program of computer  
8 executable instructions, the program of instructions comprising:  
9 at least one instruction to register a plurality of application programs for use with a content  
10 delivery platform, wherein the plurality of registered application programs are each  
11 associated for use with a navigation system;  
12 at least one instruction to establish a plurality of perimeters defining respective geographic areas;  
13 at least one instruction to maintain at least one record indicating content delivery reservations  
14 associating each of a plurality of sponsors with at least one of the plurality of geographic  
15 areas;  
16 at least one instruction to receive a request from a registered application program for content to  
17 be used within the registered application program;

18 at least one instruction to select content associated with at least one of the plurality of sponsors to  
19 be delivered to the registered application program in accordance with a content delivery  
20 reservation associating the at least one sponsor with a geographic area; and  
21 at least one instruction to provide the selected content to the registered application program.

1 16. The non-transitory computer readable medium of Claim 15, wherein the program of  
2 instructions further comprises:  
3 at least one instruction to record a request identifier associated with the request; and  
4 at least one instruction to provide the request identifier to the registered application program.

1 17. The non-transitory computer readable medium of Claim 16, wherein the program of  
2 instructions further comprises:  
3 at least one instruction to receive information related to user interaction with the provided  
4 content, the information including the request identifier; and  
5 at least one instruction to provide additional content to the registered application in response to  
6 the received information.

1 18. The non-transitory computer readable medium of Claim 15, wherein the program of  
2 instructions further comprises:  
3 at least one instruction to determine whether at least one of the plurality of sponsors is associated  
4 with a geographical representation lying at least partially within a predetermined radial  
5 distance of a target location; and  
6 at least one instruction to increase the predetermined radial distance in response to a negative  
7 determination.

1 19. The non-transitory computer readable medium of Claim 15, wherein the program of  
2 instructions further comprises:  
3 at least one instruction to receive, from a sponsor, a request to obtain an interest in a selected one  
4 of the plurality of geographic areas;

5 at least one instruction to provide the sponsor a response to the request;  
6 at least one instruction to store a record of the interest in the selected one of the plurality of  
7 geographic area; and  
8 at least one instruction to receive, from the sponsor, content to be delivered to application  
9 programs having target locations contained within the selected one of the plurality of  
10 geographic areas.

1 20. The non-transitory computer readable medium of Claim 15, wherein the program of  
2 instructions further comprises:  
3 at least one instruction to reserve a specific one of the plurality of geographic areas for exclusive  
4 delivery of content associated with a particular one of the plurality of sponsors to  
5 application programs and having a target location contained within the specific one of the  
6 plurality of geographic areas.

## **EXCLUSIVE DELIVERY OF CONTENT WITHIN GEOGRAPHIC AREAS**

### ABSTRACT

Application developers can request to have their applications registered for use with a  
5 content delivery platform. The operator of the content delivery platform establishes perimeters  
defining geographic areas, and maintains records reserving particular areas for delivery of  
content associated with particular sponsors. Registered applications running on mobile devices  
can request content from the content delivery platform. Based at least in part on the request, the  
content delivery platform can identify a target location, which may be the location of the mobile  
10 device, or some other location indicated in the request. A mobile device can be provided content  
based on the relationship of the target location to the geographic areas, so that a registered  
application running on a mobile device with a target location contained within a geographic area  
assigned to a particular sponsor will receive content related to that sponsor.

### Foreign Priority Information:

This section allows for the applicant to claim priority to a foreign application. Providing this information in the application data sheet constitutes the claim for priority as required by 35 U.S.C. 119(b) and 37 CFR 1.55(d). When priority is claimed to a foreign application that is eligible for retrieval under the priority document exchange program (PDX) the information will be used by the Office to automatically attempt retrieval pursuant to 37 CFR 1.55(h)(1) and (2). Under the PDX program, applicant bears the ultimate responsibility for ensuring that a copy of the foreign application is received by the Office from the participating foreign intellectual property office, or a certified copy of the foreign priority application is filed, within the time period specified in 37 CFR 1.55(g)(1).

### Statement under 37 CFR 1.55 or 1.78 for AIA (First Inventor to File) Transition Applications

This application (1) claims priority to or the benefit of an application filed before March 16, 2013 and (2) also contains, or contained at any time, a claim to a claimed invention that has an effective filing date on or after March 16, 2013.

### Authorization to Permit Access:

Authorization to Permit Access to the Instant Application by the Participating Offices

Under the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it contains a valid OMB control number.

<b>Application Data Sheet 37 CFR 1.76</b>		Attorney Docket Number	0075652.00002
		Application Number	
Title of Invention	EXCLUSIVE DELIVERY OF CONTENT WITHIN GEOGRAPHIC AREAS		

If checked, the undersigned hereby grants the USPTO authority to provide the European Patent Office (EPO), the Japan Patent Office (JPO), the Korean Intellectual Property Office (KIPO), the World Intellectual Property Office (WIPO), and any other intellectual property offices in which a foreign application claiming priority to the instant patent application is filed access to the instant patent application. See 37 CFR 1.14(c) and (h). This box should not be checked if the applicant does not wish the EPO, JPO, KIPO, WIPO, or other intellectual property office in which a foreign application claiming priority to the instant patent application is filed to have access to the instant patent application.

In accordance with 37 CFR 1.14(h)(3), access will be provided to a copy of the instant patent application with respect to: 1) the instant patent application-as-filed; 2) any foreign application to which the instant patent application claims priority under 35 U.S.C. 119(a)-(d) if a copy of the foreign application that satisfies the certified copy requirement of 37 CFR 1.55 has been filed in the instant patent application; and 3) any U.S. application-as-filed from which benefit is sought in the instant patent application.

In accordance with 37 CFR 1.14(c), access may be provided to information concerning the date of filing this Authorization.

## Applicant Information:

Providing assignment information in this section does not substitute for compliance with any requirement of part 3 of Title 37 of CFR to have an assignment recorded by the Office.				
<b>Applicant 1</b>				<input type="button" value="Remove"/>
If the applicant is the inventor (or the remaining joint inventor or inventors under 37 CFR 1.45), this section should not be completed. The information to be provided in this section is the name and address of the legal representative who is the applicant under 37 CFR 1.43; or the name and address of the assignee, person to whom the inventor is under an obligation to assign the invention, or person who otherwise shows sufficient proprietary interest in the matter who is the applicant under 37 CFR 1.46. If the applicant is an applicant under 37 CFR 1.46 (assignee, person to whom the inventor is obligated to assign, or person who otherwise shows sufficient proprietary interest) together with one or more joint inventors, then the joint inventor or inventors who are also the applicant should be identified in this section.

This collection of information is required by 37 CFR 1.76. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.14. This collection is estimated to take 23 minutes to complete, including gathering, preparing, and submitting the completed application data sheet form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. **SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.**

## Privacy Act Statement

The Privacy Act of 1974 (P.L. 93-579) requires that you be given certain information in connection with your submission of the attached form related to a patent application or patent. Accordingly, pursuant to the requirements of the Act, please be advised that: (1) the general authority for the collection of this information is 35 U.S.C. 2(b)(2); (2) furnishing of the information solicited is voluntary; and (3) the principal purpose for which the information is used by the U.S. Patent and Trademark Office is to process and/or examine your submission related to a patent application or patent. If you do not furnish the requested information, the U.S. Patent and Trademark Office may not be able to process and/or examine your submission, which may result in termination of proceedings or abandonment of the application or expiration of the patent.

The information provided by you in this form will be subject to the following routine uses:

1. The information on this form will be treated confidentially to the extent allowed under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C. 552a). Records from this system of records may be disclosed to the Department of Justice to determine whether the Freedom of Information Act requires disclosure of these records.
2. A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.
3. A record in this system of records may be disclosed, as a routine use, to a Member of Congress submitting a request involving an individual, to whom the record pertains, when the individual has requested assistance from the Member with respect to the subject matter of the record.
4. A record in this system of records may be disclosed, as a routine use, to a contractor of the Agency having need for the information in order to perform a contract. Recipients of information shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).
5. A record related to an International Application filed under the Patent Cooperation Treaty in this system of records may be disclosed, as a routine use, to the International Bureau of the World Intellectual Property Organization, pursuant to the Patent Cooperation Treaty.
6. A record in this system of records may be disclosed, as a routine use, to another federal agency for purposes of National Security review (35 U.S.C. 181) and for review pursuant to the Atomic Energy Act (42 U.S.C. 218(c)).
7. A record from this system of records may be disclosed, as a routine use, to the Administrator, General Services, or his/her designee, during an inspection of records conducted by GSA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with the GSA regulations governing inspection of records for this purpose, and any other relevant (i.e., GSA or Commerce) directive. Such disclosure shall not be used to make determinations about individuals.
8. A record from this system of records may be disclosed, as a routine use, to the public after either publication of the application pursuant to 35 U.S.C. 122(b) or issuance of a patent pursuant to 35 U.S.C. 151. Further, a record may be disclosed, subject to the limitations of 37 CFR 1.14, as a routine use, to the public if the record was filed in an application which became abandoned or in which the proceedings were terminated and which application is referenced by either a published application, an application open to public inspections or an issued patent.
9. A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local law enforcement agency, if the USPTO becomes aware of a violation or potential violation of law or regulation.

## SCORE Placeholder Sheet for IFW Content

Application Number: 13856392

Document Date: 04/03/2013

The presence of this form in the IFW record indicates that the following document type was received in electronic format on the date identified above. This content is stored in the SCORE database.

- Drawings – Other than Black and White Line Drawings

Since this was an electronic submission, there is no physical artifact folder, no artifact folder is recorded in PALM, and no paper documents or physical media exist. The TIFF images in the IFW record were created from the original documents that are stored in SCORE.

To access the documents in the SCORE database, refer to instructions developed by SIRA.

At the time of document entry (noted above):

- Examiners may access SCORE content via the eDAN interface.
- Other USPTO employees can bookmark the current SCORE URL (<http://es/ScoreAccessWeb/>).
- External customers may access SCORE content via the Public and Private PAIR interfaces.

FILING RECEIPT

Ryan Hardin
P.O. Box 271861
Houston, TX 77277

Date Mailed: 05/23/2013

Receipt is acknowledged of this non-provisional patent application. The application will be taken up for examination in due course. Applicant will be notified as to the results of the examination. Any correspondence concerning the application must include the following identification information: the U.S. APPLICATION NUMBER, FILING DATE, NAME OF APPLICANT, and TITLE OF INVENTION. Fees transmitted by check or draft are subject to collection. Please verify the accuracy of the data presented on this receipt. If an error is noted on this Filing Receipt, please submit a written request for a Filing Receipt Correction. Please provide a copy of this Filing Receipt with the changes noted thereon. If you received a "Notice to File Missing Parts" for this application, please submit any corrections to this Filing Receipt with your reply to the Notice. When the USPTO processes the reply to the Notice, the USPTO will generate another Filing Receipt incorporating the requested corrections

**Statement under 37 CFR 1.55 or 1.78 for AIA (First Inventor to File) Transition Applications: No****PROTECTING YOUR INVENTION OUTSIDE THE UNITED STATES**

Since the rights granted by a U.S. patent extend only throughout the territory of the United States and have no effect in a foreign country, an inventor who wishes patent protection in another country must apply for a patent in a specific country or in regional patent offices. Applicants may wish to consider the filing of an international application under the Patent Cooperation Treaty (PCT). An international (PCT) application generally has the same effect as a regular national patent application in each PCT-member country. The PCT process **simplifies** the filing of patent applications on the same invention in member countries, but **does not result** in a grant of "an international patent" and does not eliminate the need of applicants to file additional documents and fees in countries where patent protection is desired.

Almost every country has its own patent law, and a person desiring a patent in a particular country must make an application for patent in that country in accordance with its particular laws. Since the laws of many countries differ in various respects from the patent law of the United States, applicants are advised to seek guidance from specific foreign countries to ensure that patent rights are not lost prematurely.

Applicants also are advised that in the case of inventions made in the United States, the Director of the USPTO must issue a license before applicants can apply for a patent in a foreign country. The filing of a U.S. patent application serves as a request for a foreign filing license. The application's filing receipt contains further information and guidance as to the status of applicant's license for foreign filing.

Applicants may wish to consult the USPTO booklet, "General Information Concerning Patents" (specifically, the section entitled "Treaties and Foreign Patents") for more information on timeframes and deadlines for filing foreign patent applications. The guide is available either by contacting the USPTO Contact Center at 800-786-9199, or it can be viewed on the USPTO website at <http://www.uspto.gov/web/offices/pac/doc/general/index.html>.

For information on preventing theft of your intellectual property (patents, trademarks and copyrights), you may wish to consult the U.S. Government website, <http://www.stopfakes.gov>. Part of a Department of Commerce initiative, this website includes self-help "toolkits" giving innovators guidance on how to protect intellectual property in specific countries such as China, Korea and Mexico. For questions regarding patent enforcement issues, applicants may call the U.S. Government hotline at 1-866-999-HALT (1-866-999-4158).

**LICENSE FOR FOREIGN FILING UNDER**  
**Title 35, United States Code, Section 184**  
**Title 37, Code of Federal Regulations, 5.11 & 5.15**

**GRANTED**

The applicant has been granted a license under 35 U.S.C. 184, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" followed by a date appears on this form. Such licenses are issued in all applications where the conditions for issuance of a license have been met, regardless of whether or not a license may be required as set forth in 37 CFR 5.15. The scope and limitations of this license are set forth in 37 CFR 5.15(a) unless an earlier license has been issued under 37 CFR 5.15(b). The license is subject to revocation upon written notification. The date indicated is the effective date of the license, unless an earlier license of similar scope has been granted under 37 CFR 5.13 or 5.14.

This license is to be retained by the licensee and may be used at any time on or after the effective date thereof unless it is revoked. This license is automatically transferred to any related applications(s) filed under 37 CFR 1.53(d). This license is not retroactive.

The grant of a license does not in any way lessen the responsibility of a licensee for the security of the subject matter as imposed by any Government contract or the provisions of existing laws relating to espionage and the national security or the export of technical data. Licensees should apprise themselves of current regulations especially with respect to certain countries, of other agencies, particularly the Office of Defense Trade Controls, Department of State (with respect to Arms, Munitions and Implements of War (22 CFR 121-128)); the Bureau of Industry and Security, Department of Commerce (15 CFR parts 730-774); the Office of Foreign Assets Control, Department of Treasury (31 CFR Parts 500+) and the Department of Energy.

**NOT GRANTED**

No license under 35 U.S.C. 184 has been granted at this time, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" DOES NOT appear on this form. Applicant may still petition for a license under 37 CFR 5.12, if a license is desired before the expiration of 6 months from the filing date of the application. If 6 months has lapsed from the filing date of this application and the licensee has not received any indication of a secrecy order under 35 U.S.C. 181, the licensee may foreign file the application pursuant to 37 CFR 5.15(b).

**Publication No.**US-2013-0226705-A1

**Publication Date:**08/29/2013

**NOTICE OF PUBLICATION OF APPLICATION**

The above-identified application will be electronically published as a patent application publication pursuant to 37 CFR 1.211, et seq. The patent application publication number and publication date are set forth above.

The publication may be accessed through the USPTO's publically available Searchable Databases via the Internet at [www.uspto.gov](http://www.uspto.gov). The direct link to access the publication is currently <http://www.uspto.gov/patft/>.

The publication process established by the Office does not provide for mailing a copy of the publication to applicant. A copy of the publication may be obtained from the Office upon payment of the appropriate fee set forth in 37 CFR 1.19(a)(1). Orders for copies of patent application publications are handled by the USPTO's Office of Public Records. The Office of Public Records can be reached by telephone at (703) 308-9726 or (800) 972-6382, by facsimile at (703) 305-8759, by mail addressed to the United States Patent and Trademark Office, Office of Public Records, Alexandria, VA 22313-1450 or via the Internet.

In addition, information on the status of the application, including the mailing date of Office actions and the dates of receipt of correspondence filed in the Office, may also be accessed via the Internet through the Patent Electronic Business Center at [www.uspto.gov](http://www.uspto.gov) using the public side of the Patent Application Information and Retrieval (PAIR) system. The direct link to access this status information is currently <http://pair.uspto.gov/>. Prior to publication, such status information is confidential and may only be obtained by applicant using the private side of PAIR.

Further assistance in electronically accessing the publication, or about PAIR, is available by calling the Patent Electronic Business Center at 1-866-217-9197.

**NOTICE FOR EXAMINER**

Date: 20 September 2013

Commissioner for Patents  
 P.O. Box 1450  
 Alexandria, VA 22313-1450

Dear Sir:

The Examiner should be advised that the U.S. Utility Application listed above (hereinafter in this Notice For Examiner referred to as "This Application") having U.S. Application No. 13/856,392, filed April 3, 2013, currently pending, claims priority to Application No. 12/434,094, filed May 1, 2009, entitled "EXCLUSIVE DELIVERY OF CONTENT WITHIN GEOGRAPHIC AREAS", now U.S. Patent No. 8,433,296. This Notice For Examiner is being filed prior to the mailing of a first office action on the merits with regard to This Application.

The claims presented in This Application may have similar structure and/or terminology as claims in one or more other applications claiming priority to the above-referenced application(s).

The Examiner is advised that the prior art cited in one or more of the other application(s) claiming priority to the above-referenced applications(s) may need to be visited in the examination of the pending claims in This Application.

The Examiner should also be advised that any disclaimer that may be made in This Application should not be read into or against the one or more other application(s) claiming priority to the above-referenced application(s). The Examiner should also be advised that any disclaimer that may be made in the one or more other application(s) claiming priority to the above-referenced application(s) should not be read into or against This Application.

**INFORMATION DISCLOSURE STATEMENT**

---

Date: 20 September 2013

Commissioner for Patents  
P.O. Box 1450  
Alexandria, VA 22313-1450

Dear Sir:

In compliance with the duty of candor and good faith to disclose all information known to be material to patentability under 37 C.F.R. § 1.56, the Examiner is requested to consider the references submitted herewith in accordance with 37 CFR §§ 1.97-1.98 and make them of record in the above-referenced application ("The Instant Application"). It should be noted that The Instant Application relies on a parent case for an earlier effective filing date under 35 U.S.C. 120, the parent case being properly identified as U.S. Application No. 12/434,094, filed May 1, 2009, entitled "EXCLUSIVE DELIVERY OF CONTENT WITHIN GEOGRAPHIC AREAS", now U.S. Patent No. 8,433,296, and the information disclosure statement submitted in the aforementioned parent case complies with 37 CFR § 1.98(a) through 37 CFR § 1.98(c); therefore, pursuant to 37 CFR § 1.98(d), a copy of any patent, publication, pending U.S. application or other information as specified in CFR § 1.98(a) previously submitted to, or cited

by, the Office in the aforementioned parent case that is listed herewith is not provided herewith. This Information Disclosure Statement is being filed prior to the mailing of a first office action on the merits.

In accordance with 37 CFR § 1.97(g), this Information Disclosure Statement is not intended and should not be considered as a representation that a search has been made or that no other material information as defined in 37 CFR § 1.56(b) exists.

Similarly, in accordance with 37 CFR § 1.97(h), this Information Disclosure Statement is not intended and should not be considered to be an admission that the information cited herein is, or is considered to be, material to patentability as defined in 37 CFR § 1.56(b).

It is believed that no fee is required for this submission. However, if Applicant is mistaken or any fee is required, the Commissioner or the Office may notify Applicant of the amount due using the contact information as provided below so that Applicant may then send the appropriate fee.

**RESPECTFULLY SUBMITTED,**

By: /Ryan J. Hardin/  
Ryan J. Hardin

**CERTIFICATION STATEMENT**

Please see 37 CFR 1.97 and 1.98 to make the appropriate selection(s):

That each item of information contained in the information disclosure statement was first cited in any communication from a foreign patent office in a counterpart foreign application not more than three months prior to the filing of the information disclosure statement. See 37 CFR 1.97(e)(1).

**OR**

That no item of information contained in the information disclosure statement was cited in a communication from a foreign patent office in a counterpart foreign application, and, to the knowledge of the person signing the certification after making reasonable inquiry, no item of information contained in the information disclosure statement was known to any individual designated in 37 CFR 1.56(c) more than three months prior to the filing of the information disclosure statement. See 37 CFR 1.97(e)(2).

See attached certification statement.

The fee set forth in 37 CFR 1.17 (p) has been submitted herewith.

A certification statement is not submitted herewith.

**SIGNATURE**

A signature of the applicant or representative is required in accordance with CFR 1.33, 10.18. Please see CFR 1.4(d) for the form of the signature.

## Privacy Act Statement

The Privacy Act of 1974 (P.L. 93-579) requires that you be given certain information in connection with your submission of the attached form related to a patent application or patent. Accordingly, pursuant to the requirements of the Act, please be advised that: (1) the general authority for the collection of this information is 35 U.S.C. 2(b)(2); (2) furnishing of the information solicited is voluntary; and (3) the principal purpose for which the information is used by the U.S. Patent and Trademark Office is to process and/or examine your submission related to a patent application or patent. If you do not furnish the requested information, the U.S. Patent and Trademark Office may not be able to process and/or examine your submission, which may result in termination of proceedings or abandonment of the application or expiration of the patent.

The information provided by you in this form will be subject to the following routine uses:

1. The information on this form will be treated confidentially to the extent allowed under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C. 552a). Records from this system of records may be disclosed to the Department of Justice to determine whether the Freedom of Information Act requires disclosure of these records.
2. A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.
3. A record in this system of records may be disclosed, as a routine use, to a Member of Congress submitting a request involving an individual, to whom the record pertains, when the individual has requested assistance from the Member with respect to the subject matter of the record.
4. A record in this system of records may be disclosed, as a routine use, to a contractor of the Agency having need for the information in order to perform a contract. Recipients of information shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).
5. A record related to an International Application filed under the Patent Cooperation Treaty in this system of records may be disclosed, as a routine use, to the International Bureau of the World Intellectual Property Organization, pursuant to the Patent Cooperation Treaty.
6. A record in this system of records may be disclosed, as a routine use, to another federal agency for purposes of National Security review (35 U.S.C. 181) and for review pursuant to the Atomic Energy Act (42 U.S.C. 218(c)).
7. A record from this system of records may be disclosed, as a routine use, to the Administrator, General Services, or his/her designee, during an inspection of records conducted by GSA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with the GSA regulations governing inspection of records for this purpose, and any other relevant (i.e., GSA or Commerce) directive. Such disclosure shall not be used to make determinations about individuals.
8. A record from this system of records may be disclosed, as a routine use, to the public after either publication of the application pursuant to 35 U.S.C. 122(b) or issuance of a patent pursuant to 35 U.S.C. 151. Further, a record may be disclosed, subject to the limitations of 37 CFR 1.14, as a routine use, to the public if the record was filed in an application which became abandoned or in which the proceedings were terminated and which application is referenced by either a published application, an application open to public inspections or an issued patent.
9. A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local law enforcement agency, if the USPTO becomes aware of a violation or potential violation of law or regulation.

PAPER

**Please find below and/or attached an Office communication concerning this application or proceeding.**

The time period for reply, if any, is set in the attached communication.

<b>Office Action Summary</b>	<b>Application No.</b> 13/856,392	<b>Applicant(s)</b> HARDIN ET AL.	
	<b>Examiner</b> BENJAMIN MORALES	<b>Art Unit</b> 2624	<b>AIA (First Inventor to File) Status</b> No

**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1)  Responsive to communication(s) filed on 04/03/2013.  
 A declaration(s)/affidavit(s) under **37 CFR 1.130(b)** was/were filed on \_\_\_\_\_.
- 2a)  This action is **FINAL**.                      2b)  This action is non-final.
- 3)  An election was made by the applicant in response to a restriction requirement set forth during the interview on \_\_\_\_\_; the restriction requirement and election have been incorporated into this action.
- 4)  Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

- 5)  Claim(s) 1-20 is/are pending in the application.  
5a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 6)  Claim(s) \_\_\_\_\_ is/are allowed.
- 7)  Claim(s) 1-20 is/are rejected.
- 8)  Claim(s) \_\_\_\_\_ is/are objected to.
- 9)  Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

\* If any claims have been determined allowable, you may be eligible to benefit from the **Patent Prosecution Highway** program at a participating intellectual property office for the corresponding application. For more information, please see [http://www.uspto.gov/patents/init\\_events/pph/index.jsp](http://www.uspto.gov/patents/init_events/pph/index.jsp) or send an inquiry to [PPHfeedback@uspto.gov](mailto:PPHfeedback@uspto.gov).

**Application Papers**

- 10)  The specification is objected to by the Examiner.
- 11)  The drawing(s) filed on 04/03/2013 is/are: a)  accepted or b)  objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).

**Priority under 35 U.S.C. § 119**

- 12)  Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).

**Certified copies:**

- a)  All    b)  Some \*    c)  None of the:
1.  Certified copies of the priority documents have been received.
  2.  Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  3.  Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

**Attachment(s)**

- 1)  Notice of References Cited (PTO-892)
- 2)  Information Disclosure Statement(s) (PTO/SB/08)  
Paper No(s)/Mail Date 09/20/2013.
- 3)  Interview Summary (PTO-413)  
Paper No(s)/Mail Date. \_\_\_\_\_.
- 4)  Other: \_\_\_\_\_.

### DETAILED ACTION

1. The present application is being examined under the pre-AIA first to invent provisions.

#### ***Double Patenting***

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory double patenting rejection is appropriate where the claims at issue are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the reference application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of

activities undertaken within the scope of a joint research agreement. A terminal disclaimer must be signed in compliance with 37 CFR 1.321(b).

The USPTO internet Web site contains terminal disclaimer forms which may be used. Please visit <http://www.uspto.gov/forms/>. The filing date of the application will determine what form should be used. A web-based e-Terminal Disclaimer may be filled out completely online using web-screens. An e-Terminal Disclaimer that meets all requirements is auto-processed and approved immediately upon submission. For more information about e-Terminal Disclaimers, refer to <http://www.uspto.gov/patents/process/file/efs/guidance/eTD-info-I.jsp>.

1. Claims 1-20 rejected on the ground of nonstatutory double patenting as being unpatentable over claims 1-15 of U.S. Patent No. 8433296 in view of Teshima (US 7103368).

US 8433296	13/856392
1. A method comprising: registering a plurality of application programs for use with a content delivery platform, wherein the plurality of registered application programs are each associated with at least one application program type; establishing a plurality of perimeters defining a plurality	1. A method comprising: registering a plurality of application programs for use with a content delivery platform, <b>wherein the plurality of registered application programs are each associated for use with a navigation system</b> ; establishing a plurality of perimeters defining a plurality of

<p>of geographic areas; reserving delivery of content from a plurality of sponsors to the plurality of registered application programs on the basis of both a geographic area and an application program type associated with each of the plurality of registered application programs; receiving, from a sponsor, a request to obtain an interest in a selected one of the plurality of geographic areas; providing the sponsor a response to the request; storing a record of the interest in the selected one of the plurality of geographic areas; receiving, from the sponsor, content to be delivered to registered application programs having target locations contained within the selected one of the plurality of geographic areas; receiving, from a registered application program, a request for content to be used within the registered application program; in response to receiving the request: selecting content from at least</p>	<p>geographic areas; reserving delivery of content from a plurality of sponsors to the plurality of registered application programs on the basis of a geographic area associated with each of the plurality of registered application programs; receiving, from a registered application program, a request for content to be used within the registered application program; in response to receiving the request: selecting content from at least one sponsor to be delivered to the registered application program, subject to the reserving; and providing the content from the at least one sponsor to the registered application program.</p>
--	---

<p>one sponsor to be delivered to the registered application program, subject to the reserving; and providing the content from the at least one sponsor to the registered application program.</p>	
<p>6. A system comprising: memory; a communications interface operably coupled to the memory; and at least one processor operably coupled to the memory and the communications interface, the processor configured to execute a program of instructions, the program of instructions comprising: at least one instruction to register a plurality of application programs for use with a content delivery platform, wherein the plurality of registered application programs are each associated with at least one application program type; at least one instruction to establish a plurality of perimeters defining a plurality of geographic areas; at least one instruction</p>	<p>8. A system comprising: memory; a communications interface operably coupled to the memory; and at least one processor operably coupled to the memory and the communications interface, the processor configured to execute a program of instructions, the program of instructions comprising: at least one instruction to register a plurality of application programs for use with a content delivery platform, <b>wherein the plurality of registered application programs are each associated for use with a navigation system</b>; at least one instruction to establish a plurality of perimeters defining a plurality of geographic areas; at least one instruction</p>

<p>to maintain at least one record indicating content delivery reservations associating each of a plurality of sponsors with specific registered application program types and at least one of the plurality of geographic areas; at least one instruction to receive, from a sponsor, a request to obtain an interest in a selected one of the plurality of geographic areas; at least one instruction to provide the sponsor a response to the request; at least one instruction to store a record of the interest in the selected one of the plurality of geographic areas; at least one instruction to receive, from the sponsor, content to be delivered to registered application programs having target locations contained within the selected one of the plurality of geographic areas; at least one instruction to receive a request from a registered application program for content to be used within the registered application program; at least</p>	<p>to maintain at least one record indicating content delivery reservations associating each of a plurality of sponsors with at least one of the plurality of geographic areas; at least one instruction to receive a request from a registered application program for content to be used within the registered application program; at least one instruction to select content associated with at least one of the plurality of sponsors to be delivered to the registered application program in accordance with a content delivery reservation associating the at least one sponsor with a geographic area; and at least one instruction to provide the selected content to the registered application program.</p>
---	---

<p>one instruction to select content associated with at least one of the plurality of sponsors, to be delivered to the registered application program of a specific type, in accordance with a content delivery reservation associating the at least one sponsor with a geographic area and a registered application program type; and at least one instruction to provide the selected content to the registered application program.</p>	
<p>11. A non-transitory computer readable medium tangibly embodying a program of computer executable instructions, the program of instructions comprising: at least one instruction to register a plurality of application programs for use with a content delivery platform, wherein the plurality of registered application programs are each associated with at least one application program type; at least one instruction to establish a plurality of</p>	<p>15. A non-transitory computer readable medium tangibly embodying a program of computer executable instructions, the program of instructions comprising: at least one instruction to register a plurality of application programs for use with a content delivery platform, <b>wherein the plurality of registered application programs are each associated for use with a navigation system</b>; at least one instruction to establish a plurality of</p>

<p>perimeters defining respective geographic areas; at least one instruction to maintain at least one record indicating content delivery reservations associating each of a plurality of sponsors with specific registered application program types and at least one of the plurality of geographic areas; at least one instruction to receive, from a sponsor, a request to obtain an interest in a selected one of the plurality of geographic areas; at least one instruction to provide the sponsor a response to the request; at least one instruction to store a record of the interest in the selected one of the plurality of geographic areas; at least one instruction to receive, from the sponsor, content to be delivered to application programs having target locations contained within the selected one of the plurality of geographic areas; at least one instruction to receive a request from a registered application program for</p>	<p>perimeters defining respective geographic areas; at least one instruction to maintain at least one record indicating content delivery reservations associating each of a plurality of sponsors with at least one of the plurality of geographic areas; at least one instruction to receive a request from a registered application program for content to be used within the registered application program; at least one instruction to select content associated with at least one of the plurality of sponsors to be delivered to the registered application program in accordance with a content delivery reservation associating the at least one sponsor with a geographic area; and at least one instruction to provide the selected content to the registered application program.</p>
---	---

<p>content to be used within the registered application program; at least one instruction to select content associated with at least one of the plurality of sponsors to be delivered to the registered application program of a specific type, in accordance with a content delivery reservation associating the at least one sponsor with a geographic area and a registered application program type; and at least one instruction to provide the selected content to the registered application program.</p>	
--	--

As seen in the above table all the limitations in this application are on the claims of 8433296 and the only difference is that the application program type on 13/856392 is associated with a navigation system which it's not specified on claim 1 on 8433296 even though the application itself receives location information which should be associated with some kind of location identification system but it's not mentioned on the claim.

However Teshima in the other hand teaches "wherein the plurality of registered application programs are each associated for use with a navigation system" (abstract

Figure 5 column 16 lines 22-47 where the advertisements are sent to be displayed on a navigation system).

Therefore it would have been obvious to a person with ordinary skill in the art at the time of the invention to provide the teachings described above from Teshima's invention 8433296 invention in order to effectively deliver advertisement information to travelers both walkers and drivers.

Furthermore, there is no apparent reason why applicant was prevented from presenting claims corresponding to those of the instant application during prosecution of the application which matured into a patent. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.

### ***Claim Rejections - 35 USC § 103***

2. The following is a quotation of pre-AIA 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-3, 8-10 and 15-17 are rejected under pre-AIA 35 U.S.C. 103(a) as being unpatentable over Gupta et al (US 20100312646; hereinafter Gupta) in view of Khivesara et al (US 2008/0098420 hereinafter Khivesara) .

As per claim 1, Gupta teaches "A method comprising: registering application programs for use with a content delivery platform" (paragraph [0049], [0026], [0029], [0079] Discloses the registering of the client that could be an applications), wherein the plurality of registered application programs are each associated for use with a navigation system (paragraph [0040] the registered application uses the GPS or navigational system coordinated to identify the user location and that is used on the process for the distribution of geographical related content); establishing a plurality of perimeters defining a plurality of geographic areas (paragraph [0035],[0047]); reserving delivery of content from a plurality of sponsors to the plurality of registered application programs on the basis of a geographic area associated with each of the plurality of registered application programs (paragraph [0018], [0019], [0020], [0070], [0080]); receiving, from a registered application program, a request for content to be used within the registered application program (paragraph [0026],[0030][0004] Figure 8 and 9 the content is being displayed writhing the application program); in response to receiving the request: selecting content from at least one sponsor to be delivered to the registered application program, subject to the reserving (paragraph [0039], [0020]); and providing the content from the at least one sponsor to the registered application program"(paragraph [0035], [0039]).

Gupta is not specific about "registering a **plurality** of application programs for use with a content delivery platform".

However Khivesara in the other hand discloses ""registering a plurality of application programs for use with a content delivery platform" (paragraph [0168] more than one application gets registered to receive the advertisement).

Therefor it would have been obvious to a person with ordinary skill in the art at the time of the invention to provide the teachings described above from Khivesara's invention to Gupta's invention in order to be able to provide the advertisement with context to the application being used.

As per claim 2, Gupta teaches "further comprising: recording a request identifier associated with the request (paragraph [0004] Fig. 5 article 550); and providing the request identifier to the registered application program paragraph [0004][0040];the request identifier is being provided to the registered application so that it can request the advertisement to be displayed).

As per claim 3, Gupta "further comprising: receiving information related to user interaction with the provided content (paragraph [0029]), the information including the request identifier (paragraph [0029]); and providing additional content to the registered application in response to the received information (paragraph [0037], [0038] additional content is being provided).

As per claim 8, Gupta teaches " A system comprising: memory (Fig. 10 article 1004, abstract, paragraphs [0004], [0055],[0056]); "a communications interface operably coupled to the memory"(paragraph [0056] Fig. 10);; and at least one processor operably coupled to the memory and the communications interface (paragraph [0056] Fig. 10), the processor configured to execute a program of instructions, the program of instructions (paragraph [0056] fig.10 article 1002 contains article 1024 which are the instructions) comprising: at least one instruction to register application programs for use with a content delivery platform (paragraph [0049],[0026],[0029],[0079] Discloses the registering), wherein the registered application programs are each associated for use with a navigation system (paragraph [0040] the registered application uses the GPS or navigational system coordinated to identify the user location and that is used on the process for the distribution of geographical related content); at least one instruction to establish a plurality of perimeters defining a plurality of geographic areas (paragraph [0035],[0047]); at least one instruction to maintain at least one record indicating content delivery reservations associating each of a plurality of sponsors with at least one of the plurality of geographic areas (paragraph [0018], [0019], [0020], [0070], [0080]); at least one instruction to receive a request from a registered application program for content to be used within the registered application program (paragraph [0026],[0029-0030][0043]); at least one instruction to select content associated with at least one of the plurality of sponsors to be delivered to the registered application program in accordance with a content delivery reservation associating the at least one sponsor with

a geographic area (paragraph [0039], [0020]); and at least one instruction to provide the selected content to the registered application program "(paragraph [0035], [0039]).

Gupta is not specific about "least one instruction to register a **plurality** of application programs for use with a content delivery platform".

However Khivesara in the other hand discloses "least one instruction to register a plurality of application programs for use with a content delivery platform" (paragraph [0168] more than one application gets registered to receive the advertisement).

Therefore it would have been obvious to a person with ordinary skill in the art at the time of the invention to provide the teachings described above from Khivesara's invention to Gupta's invention in order to be able to provide the advertisement with context to the application being used.

As per claims 9 and 10, since they are system claims of claims 2 and 3 respectively representing the same limitations as claims 2 and 3, they are rejected for the same basis as claims 2-3.

As per claim 15, Gupta teaches "A non-transitory computer readable medium tangibly embodying a program of computer executable instructions (paragraph [0098]), the program of instructions comprising: at least one instruction to register a application programs for use with a content delivery platform(paragraph [0049],[0026],[0029],[0079] Discloses the registering) , wherein the registered application programs are each

associated for use with a navigation system (paragraph [0040] the registered application uses the GPS or navigational system coordinated to identify the user location and that is used on the process for the distribution of geographical related content); at least one instruction to establish a plurality of perimeters defining respective geographic areas (paragraph [0035],[0047]); at least one instruction to maintain at least one record indicating content delivery reservations associating each of a plurality of sponsors with at least one of the plurality of geographic areas (paragraph [0039], [0020]); at least one instruction to receive a request from a registered application program for content to be used within the registered application program (paragraph [0026],[0029-0030][0043]); at least one instruction to select content associated with at least one of the plurality of sponsors to be delivered to the registered application program in accordance with a content delivery reservation associating the at least one sponsor with a geographic area (paragraph [0039], [0020]); and at least one instruction to provide the selected content to the registered application program"(paragraph [0035], [0039]).

Gupta is not specific about "least one instruction to register a **plurality** of application programs for use with a content delivery platform".

However Khivesara in the other hand discloses "least one instruction to register a plurality of application programs for use with a content delivery platform" (paragraph [0168] more than one application gets registered to receive the advertisement).

Therefore it would have been obvious to a person with ordinary skill in the art at the time of the invention to provide the teachings described above from Khivesara's

invention to Gupta's invention in order to be able to provide the advertisement with context to the application being used.

As per claims 16 and 17, since they are computer readable claims representing the same limitations as claims 2 and 3, they are rejected for the same basis as claims 2 and 3.

4. Claim 4, 11 and 18 are rejected under pre-AIA 35 U.S.C. 103(a) as being unpatentable over Gupta et al (US 20100312646; hereinafter Gupta) in view of Khivesara et al (US 2008/0098420 hereinafter Khivesara) in further view of Sato (US 20040253965).

As per claim 4, Gupta teaches "determining whether at least one of the plurality of sponsors is associated with a geographical representation lying at least partially within a predetermined radial distance of the target location" (paragraph [0039]).

Gupta/Khivesara is silent about "in response to a negative determination, increasing the predetermined radial distance" (Sato paragraph [0126], [0129], [0131], and [0132]).

However Sato, in the other hand teaches "in response to a negative determination, increasing the predetermined radial distance" (Sato paragraph [0126], [0129], [0131], and [0132]).

Therefore it would have been obvious to a person with ordinary skill in the art at the time of the invention to provide the teachings described above from Sato's invention to Gupta/Khivesara's invention in order to help increase the chance that a user visits the closest sponsors business.

As per claim 11, Gupta teaches "determining whether at least one of the plurality of sponsors is associated with a geographical representation lying at least partially within a predetermined radial distance of the target location" (paragraph [0039]).

Gupta/Khivesara does not specifically teach "in response to a negative determination, increasing the predetermined radial distance.

However Sato, in the other hand teaches "in response to a negative determination, increasing the predetermined radial distance" (Sato paragraph [0126], [0129], [0131], and [0132]).

Therefore it would have been obvious to a person with ordinary skill in the art at the time of the invention to provide the teachings described above from Sato's invention to Gupta/Khivesara 's invention in order to help increase the chance that a user visits the closest sponsors business.

As per claim 18, since is the computer readable medium claim representing the same limitation as in claim 11, it is rejected for the same basis as claim 11.

5. Claims 5-7, 12-14 and 19-20 are rejected under pre-AIA 35 U.S.C. 103(a) as being unpatentable over Gupta et al (US 20100312646; hereinafter Gupta) in view of Khivesara et al (US 2008/0098420 hereinafter Khivesara) in further view of Guido (US 7814106) .

As per claim 5, Gupta do not specifically teach "receiving, from a sponsor, a request to obtain an interest in a selected one of the plurality of geographic areas" "providing the sponsor a response to the request " " storing a record of the interest in the selected one of the plurality of geographic areas".

However Guido, in the other hand teaches "receiving, from a sponsor, a request to obtain an interest in a selected one of the plurality of geographic areas" (column 8 lines 22-39 column 4 lines 65-67 column 5 lines 1-10); "providing the sponsor a response to the request" (column 8 lines 10-53) "storing a record of the interest in the selected one of the plurality of geographic areas" (column 8 lines 40-53).

Therefor it would have been obvious to a person with ordinary skill in the art at the time to provide the teachings described above from Guido's invention to Gupta/Khivesara's invention in order to help the advertiser pull more customers in the define area.

As per claim 6, Gupta teaches " further comprising: receiving, from the sponsor, content to be delivered to registered application programs having target locations contained within a selected one of the plurality of geographic areas (paragraphs

[0019],[0020]).

As per claim 7, Gupta teaches "having a target location contained within the specific one of the plurality of geographic areas" (paragraph [0040]).

Gupta does not specifically teach "reserving a specific one of the plurality of geographic areas for exclusive delivery of content associated with a particular one of the plurality of sponsors to registered applications programs"

However Guido in the other hand teaches "reserving a specific one of the plurality of geographic areas for exclusive delivery of content associated with a particular one of the plurality of sponsors to registered applications programs" (column 8 lines 22-39 column 4 lines 65-67 column 5 lines 1-10).

Therefor it would have been obvious to a person with ordinary skill in the art at the time of the invention provide the teachings described above from Guido's invention to Gupta/Khivesara's invention in order to help the advertiser pull more customers in the define area.

As per claim 12, since it is a system claim representing the same limitation as in claim 5, it is rejected for the same basis as claim 5.

As per claim 13, since it is a system claim representing the same limitation as in claim 6, it is rejected for the same basis as claim 6.

As per claim 14 since it is the computer readable medium claim representing the same limitation as in claim 7, it is rejected for the same basis as claim 7.

As per claim 19, since it is a computer readable medium claim representing the same limitations as in claims 5-6, it is rejected for the same basis as claims 5-6.

As per claim 20 is since it is the computer readable medium claim representing the same limitation as in claim 7, it is rejected for the same basis as claim 7.

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to BENJAMIN MORALES whose telephone number is (571)270-5797. The examiner can normally be reached on 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kent Chang can be reached on (571) 272-7667. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.

Commissioner for Patents  
 P.O. Box 1450  
 Alexandria, VA 22313-1450

Dear Sir:

In compliance with the duty of candor and good faith to disclose all information known to be material to patentability under 37 C.F.R. § 1.56, the Examiner is requested to consider the references submitted herewith in accordance with 37 CFR §§ 1.97-1.98 and make them of record in the above-referenced application ("The Instant Application"). It should be noted that The Instant Application relies on a parent case for an earlier effective filing date under 35 U.S.C. 120, the parent case being properly identified as U.S. Application No. 12/434,094, filed May 1, 2009, entitled "EXCLUSIVE DELIVERY OF CONTENT WITHIN GEOGRAPHIC AREAS", now U.S. Patent No. 8,433,296, and the information disclosure statement submitted in the aforementioned parent case complies with 37 CFR § 1.98(a) through 37 CFR § 1.98(c); therefore, pursuant to 37 CFR § 1.98(d), a copy of any patent, publication, pending U.S. application or other information as specified in CFR § 1.98(a) previously submitted to, or cited

Docket No. 0075652.00002

by, the Office in the aforementioned parent case that is listed herewith is not provided herewith. This Information Disclosure Statement is being filed prior to the mailing of a first office action on the merits.

In accordance with 37 CFR § 1.97(g), this Information Disclosure Statement is not intended and should not be considered as a representation that a search has been made or that no other material information as defined in 37 CFR § 1.56(b) exists.

Similarly, in accordance with 37 CFR § 1.97(h), this Information Disclosure Statement is not intended and should not be considered to be an admission that the information cited herein is, or is considered to be, material to patentability as defined in 37 CFR § 1.56(b).

It is believed that no fee is required for this submission. However, if Applicant is mistaken or any fee is required, the Commissioner or the Office may notify Applicant of the amount due using the contact information as provided below so that Applicant may then send the appropriate fee.

**RESPECTFULLY SUBMITTED,**

**CERTIFICATION STATEMENT**

Please see 37 CFR 1.97 and 1.98 to make the appropriate selection(s):

That each item of information contained in the information disclosure statement was first cited in any communication from a foreign patent office in a counterpart foreign application not more than three months prior to the filing of the information disclosure statement. See 37 CFR 1.97(e)(1).

**OR**

That no item of information contained in the information disclosure statement was cited in a communication from a foreign patent office in a counterpart foreign application, and, to the knowledge of the person signing the certification after making reasonable inquiry, no item of information contained in the information disclosure statement was known to any individual designated in 37 CFR 1.56(c) more than three months prior to the filing of the information disclosure statement. See 37 CFR 1.97(e)(2).

- See attached certification statement.
- The fee set forth in 37 CFR 1.17 (p) has been submitted herewith.
- A certification statement is not submitted herewith.

**SIGNATURE**

A signature of the applicant or representative is required in accordance with CFR 1.33, 10.18. Please see CFR 1.4(d) for the form of the signature.

This collection of information is required by 37 CFR 1.97 and 1.98. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.14. This collection is estimated to take 1 hour to complete, including gathering, preparing and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.

### Privacy Act Statement

The Privacy Act of 1974 (P.L. 93-579) requires that you be given certain information in connection with your submission of the attached form related to a patent application or patent. Accordingly, pursuant to the requirements of the Act, please be advised that: (1) the general authority for the collection of this information is 35 U.S.C. 2(b)(2); (2) furnishing of the information solicited is voluntary; and (3) the principal purpose for which the information is used by the U.S. Patent and Trademark Office is to process and/or examine your submission related to a patent application or patent. If you do not furnish the requested information, the U.S. Patent and Trademark Office may not be able to process and/or examine your submission, which may result in termination of proceedings or abandonment of the application or expiration of the patent.

The information provided by you in this form will be subject to the following routine uses:

1. The information on this form will be treated confidentially to the extent allowed under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C. 552a). Records from this system of records may be disclosed to the Department of Justice to determine whether the Freedom of Information Act requires disclosure of these records.
2. A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.
3. A record in this system of records may be disclosed, as a routine use, to a Member of Congress submitting a request involving an individual, to whom the record pertains, when the individual has requested assistance from the Member with respect to the subject matter of the record.
4. A record in this system of records may be disclosed, as a routine use, to a contractor of the Agency having need for the information in order to perform a contract. Recipients of information shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).
5. A record related to an International Application filed under the Patent Cooperation Treaty in this system of records may be disclosed, as a routine use, to the International Bureau of the World Intellectual Property Organization, pursuant to the Patent Cooperation Treaty.
6. A record in this system of records may be disclosed, as a routine use, to another federal agency for purposes of National Security review (35 U.S.C. 181) and for review pursuant to the Atomic Energy Act (42 U.S.C. 218(c)).
7. A record from this system of records may be disclosed, as a routine use, to the Administrator, General Services, or his/her designee, during an inspection of records conducted by GSA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with the GSA regulations governing inspection of records for this purpose, and any other relevant (i.e., GSA or Commerce) directive. Such disclosure shall not be used to make determinations about individuals.
8. A record from this system of records may be disclosed, as a routine use, to the public after either publication of the application pursuant to 35 U.S.C. 122(b) or issuance of a patent pursuant to 35 U.S.C. 151. Further, a record may be disclosed, subject to the limitations of 37 CFR 1.14, as a routine use, to the public if the record was filed in an application which became abandoned or in which the proceedings were terminated and which application is referenced by either a published application, an application open to public inspections or an issued patent.
9. A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local law enforcement agency, if the USPTO becomes aware of a violation or potential violation of law or regulation.

Serial No.: 13/856,392 : Group Art Unit: 2624

Filed: April 3, 2013 :

Title: **EXCLUSIVE DELIVERY OF CONTENT WITHIN GEOGRAPHIC  
AREAS**

EFS-Web  
Commissioner for Patents  
P.O. Box 1450  
Alexandria, VA 22313-1450

Examiner Fernandez:

This is a response to an Office Action mailed November 20, 2013 by the United States Patent And Trademark Office (the Office). The Applicants request reconsideration of the above-identified application in view of the remarks presented herein.

**Amendment of the Claims** begin on page 2 of this correspondence;

**Remarks** begin on page 13 of this correspondence; and

**Conclusions** begin on page 22 of this correspondence.

**AMENDMENTS - IN THE CLAIMS**

Please amend the claims as follows. This listing of the claims will replace all prior versions, and listings, of the claims in the Application.

1. (currently amended) A method comprising:

~~registering a plurality of application programs for use with a content delivery platform, wherein the plurality of registered application programs are each associated for use with a navigation system;~~  
~~establishing a plurality of perimeters defining a plurality of geographic areas;~~  
receiving, from one or more sponsors, at least one request to obtain an interest in a designated geographic area;  
determining if the interest in the designated geographic area is to be provided to the one or more sponsors;  
in response to determining that the interest in the designated geographic area is to be provided to the one or more sponsors, restricting content delivered to one or more instances of an application program to being from the one or more sponsors after it is determined that a target location has entered the designated geographic area ~~reserving for delivery of content from a plurality of sponsors to the plurality of registered application programs on the basis of a geographic area associated with each of the plurality of registered application programs;~~  
receiving, from the one or more sponsors, content to be delivered to at least one of the one or more instances of the application program after it is determined that the target location has entered the designated geographic area; and  
~~receiving, from a registered application program, a request for content to be used within the registered application program;~~  
~~in response to receiving the request:~~

~~selecting content from at least one sponsor to be delivered to the registered application program, subject to the reserving; and providing, after it is determined that the target location has entered the designated geographic area, at least a portion of the content received from the one or more at least one sponsors to at least one of the one or more instances of the registered application program.~~

2. (currently amended) The method of claim 1 wherein:

receiving the at least one request to obtain the interest in the designated geographic area includes receiving sponsor established perimeter definitions; and the sponsor established perimeter definitions at least partially define the designated geographic area, further comprising: recording a request identifier associated with the request; and providing the request identifier to the registered application program.

3. (currently amended) The method of claim 1 [[2]] wherein:

receiving the at least one request to obtain the interest in the designated geographic area includes receiving a first request from a first sponsor and receiving a second request from a second sponsor; restricting the content delivered to the one or more instances of the application program includes restricting content delivered to one or more instances of the application program to be from the first one of the sponsors during a first period of time and to be from the second one of the sponsors during a second period of time; receiving content to be delivered to the one or more instances of the application program includes receiving content from the first sponsor and receiving content from the second sponsor; and providing the at least a portion of the content to the one or more instances of the application program includes providing at least a portion of the content received from the first sponsor to an instance of the application program during the first period of time and providing at least a portion of the content received from the

~~second sponsor to the instance of the application program during the second period of time, further comprising:  
receiving information related to user interaction with the provided content, the information including the request identifier; and  
providing additional content to the registered application in response to the received information.~~

4. (currently amended) The method of claim 1 wherein the one or more sponsors is at least one of the one or more instances of the application program, ~~further comprising:  
determining whether at least one of the plurality of sponsors is associated with a geographical representation lying at least partially within a predetermined radial distance of a target location; and  
in response to a negative determination, increasing the predetermined radial distance.~~
5. (currently amended) The method of claim 1, further comprising:  
~~receiving, from a sponsor, a request to obtain an interest in a selected one of the plurality of geographic areas;  
providing the one or more sponsors a response to the request in response to determining that the interest in the designated geographic area is to be provided to the one or more sponsors; and  
storing a record of the interest in the designated selected one of the plurality of geographic area[[s]] in response to determining that the interest in the designated geographic area is to be provided to the one or more sponsors.~~
6. (currently amended) The method of claim 5 wherein the one or more sponsors is at least one of the one or more instances of the application program, ~~further comprising:  
receiving, from the sponsor, content to be delivered to registered application programs having target locations contained within a selected one of the plurality of geographic areas.~~

7. (currently amended) The method of claim 6[[1]] wherein:
- receiving the at least one request to obtain the interest in the designated geographic area includes receiving sponsor established perimeter definitions; and
  - the sponsor established perimeter definitions at least partially define the designated geographic area, further comprising:
  - ~~reserving a specific one of the plurality of geographic areas for exclusive delivery of content associated with a particular one of the plurality of sponsors to registered application programs and having a target location contained within the specific one of the plurality of geographic areas.~~
8. (currently amended) A system comprising:
- memory;
  - a communications interface operably coupled to the memory; and
  - at least one processor operably coupled to the memory and the communications interface, the processor configured to execute a program of instructions, the program of instructions comprising:
    - at least one instruction for receiving, from one or more sponsors, at least one request to obtain an interest in a designated geographic area;
    - at least one instruction for determining if the interest in the designated geographic area is to be provided to the one or more sponsors;
    - at least one instruction for restricting content delivered to one or more instances of an application program to being from the one or more sponsors after it is determined that a target location has entered the designated geographic area and in response to determining that the interest in the designated geographic area is to be provided to the one or more sponsors;
    - at least one instruction for receiving, from the one or more sponsors, content to be delivered to at least one of the one or more instances of the application program after it is determined that the target location has entered the designated geographic area; and
    - at least one instruction for providing, after it is determined that the target location has entered the designated geographic area, at least a portion of

~~the content received from the one or more sponsors to at least one of the one or more instances of the application program at least one instruction to register a plurality of application programs for use with a content delivery platform, wherein the plurality of registered application programs are each associated for use with a navigation system; at least one instruction to establish a plurality of perimeters defining a plurality of geographic areas; at least one instruction to maintain at least one record indicating content delivery reservations associating each of a plurality of sponsors with at least one of the plurality of geographic areas; at least one instruction to receive a request from a registered application program for content to be used within the registered application program; at least one instruction to select content associated with at least one of the plurality of sponsors to be delivered to the registered application program in accordance with a content delivery reservation associating the at least one sponsor with a geographic area; and at least one instruction to provide the selected content to the registered application program.~~

9. (currently amended) The system of claim 8[[,]] wherein ~~the program of instructions further comprises:~~

~~receiving the at least one request to obtain the interest in the designated geographic area includes receiving sponsor established perimeter definitions; and the sponsor established perimeter definitions at least partially define the designated geographic area at least one instruction to record a request identifier associated with the request; and at least one instruction to provide the request identifier to the registered application program.~~

10. (currently amended) The system of claim 8[[9,]] wherein ~~the program of instructions further comprises:~~

receiving the at least one request to obtain the interest in the designated geographic area includes receiving a first request from a first sponsor and receiving a second request from a second sponsor;

restricting the content delivered to the one or more instances of the application program includes restricting content delivered to one or more instances of the application program to be from the first one of the sponsors during a first period of time and to be from the second one of the sponsors during a second period of time;

receiving content to be delivered to the one or more instances of the application program includes receiving content from the first sponsor and receiving content from the second sponsor; and

providing the at least a portion of the content to the one or more instances of the application program includes providing at least a portion of the content received from the first sponsor to an instance of the application program during the first period of time and providing at least a portion of the content received from the second sponsor to the instance of the application program during the second period of time~~at least one instruction to receive information related to user interaction with the provided content, the information including the request identifier; and~~

~~at least one instruction to provide additional content to the registered application in response to the received information.~~

11. (currently amended) The system of claim 8[[,]] wherein the one or more sponsors is at least one of the one or more instances of the application program~~the program of instructions further comprises:~~

~~at least one instruction to determine whether at least one of the plurality of sponsors is associated with a geographical representation lying at least partially within a predetermined radial distance of a target location; and~~

~~at least one instruction to increase the predetermined radial distance in response to the at least one instruction to determine.~~

12. (currently amended) The system of claim 8[[,]] wherein the program of instructions further comprises:
- ~~at least one instruction to receive, from a sponsor, a request to obtain an interest in a selected one of the plurality of geographic areas;~~
  - at least one instruction to provide for providing the one or more sponsors a response to the request in response to determining that the interest in the designated geographic area is to be provided to the one or more sponsors; and
  - at least one instruction ~~to store~~for storing a record of the interest in the designated selected one of the plurality of geographic area[[s]] in response to determining that the interest in the designated geographic area is to be provided to the one or more sponsors.
13. (currently amended) The system of claim 12[[,]] wherein the one or more sponsors is at least one of the one or more instances of the application program~~the program of instructions further comprises:~~
- ~~at least one instruction to receive, from the sponsor, content to be delivered to registered application programs having target locations contained within the selected one of the plurality of geographic areas.~~
14. (currently amended) The system of claim [[8,]]13 wherein ~~the program of instructions further comprises:~~
- receiving the at least one request to obtain the interest in the designated geographic area includes receiving sponsor established perimeter definitions; and
  - the sponsor established perimeter definitions at least partially define the designated geographic area~~at least one instruction to reserve a specific one of the plurality of geographic areas for exclusive delivery of content associated with a particular one of the plurality of sponsors to registered application programs and having a target location contained within the specific one of the plurality of geographic areas.~~

15. (currently amended) A non-transitory computer readable medium tangibly embodying a program of computer executable instructions, the program of instructions comprising:
- at least one instruction for receiving, from one or more sponsors, at least one request to obtain an interest in a designated geographic area;
  - at least one instruction for determining if the interest in the designated geographic area is to be provided to the one or more sponsors;
  - at least one instruction for restricting content delivered to one or more instances of an application program to being from the one or more sponsors after it is determined that a target location has entered the designated geographic area and in response to determining that the interest in the designated geographic area is to be provided to the one or more sponsors;
  - at least one instruction for receiving, from the one or more sponsors, content to be delivered to at least one of the one or more instances of the application program after it is determined that the target location has entered the designated geographic area; and
  - at least one instruction for providing, after it is determined that the target location has entered the designated geographic area, at least a portion of the content received from the one or more sponsors to at least one of the one or more instances of the application program~~at least one instruction to register a plurality of application programs for use with a content delivery platform, wherein the plurality of registered application programs are each associated for use with a navigation system;~~
  - ~~at least one instruction to establish a plurality of perimeters defining respective geographic areas;~~
  - ~~at least one instruction to maintain at least one record indicating content delivery reservations associating each of a plurality of sponsors with at least one of the plurality of geographic areas;~~
  - ~~at least one instruction to receive a request from a registered application program for content to be used within the registered application program;~~
  - ~~at least one instruction to select content associated with at least one of the plurality of sponsors to be delivered to the registered application program in accordance~~

~~with a content delivery reservation associating the at least one sponsor with a geographic area; and  
at least one instruction to provide the selected content to the registered application program.~~

16. (currently amended) The non-transitory computer readable medium of claim 15[[,]]  
wherein ~~the program of instructions further comprises:~~

receiving the at least one request to obtain the interest in the designated geographic area includes receiving sponsor established perimeter definitions; and  
the sponsor established perimeter definitions at least partially define the designated geographic area~~at least one instruction to record a request identifier associated with the request; and  
at least one instruction to provide the request identifier to the registered application program.~~

17. (currently amended) The non-transitory computer readable medium of claim [[16,]]15  
wherein ~~the program of instructions further comprises:~~

receiving the at least one request to obtain the interest in the designated geographic area includes receiving a first request from a first sponsor and receiving a second request from a second sponsor;  
restricting the content delivered to the one or more instances of the application program includes restricting content delivered to one or more instances of the application program to be from the first one of the sponsors during a first period of time and to be from the second one of the sponsors during a second period of time;  
receiving content to be delivered to the one or more instances of the application program includes receiving content from the first sponsor and receiving content from the second sponsor; and  
providing the at least a portion of the content to the one or more instances of the application program includes providing at least a portion of the content received from the first sponsor to an instance of the application program during the first period of time and providing at least a portion of the content received from the

~~second sponsor to the instance of the application program during the second period of time at least one instruction to receive information related to user interaction with the provided content, the information including the request identifier; and  
at least one instruction to provide additional content to the registered application in response to the received information.~~

18. (currently amended) The non-transitory computer readable medium of claim 15[[,]] wherein the one or more sponsors is at least one of the one or more instances of the application program~~the program of instructions further comprises:~~  
~~at least one instruction to determine whether at least one of the plurality of sponsors is associated with a geographical representation lying at least partially within a predetermined radial distance of a target location; and  
at least one instruction to increase the predetermined radial distance in response to a negative determination.~~

19. (currently amended) The non-transitory computer readable medium of claim 15, wherein the program of instructions further comprises:  
~~at least one instruction to receive, from a sponsor, a request to obtain an interest in a selected one of the plurality of geographic areas;~~  
at least one instruction ~~to provide~~for providing the one or more sponsors a response to the request in response to determining that the interest in the designated one or more of the plurality of geographic areas is to be provided to the one or more sponsors; and  
at least one instruction ~~to store~~for storing a record of the interest in the designated selected one of the plurality of geographic area[[s]] in response to determining that the interest in the designated geographic area is to be provided to the one or more sponsors; and  
~~at least one instruction to receive, from the sponsor, content to be delivered to application programs having target locations contained within the selected one of the plurality of geographic areas.~~

20. (currently amended) The non-transitory computer readable medium of claim [[15,]]19 wherein ~~the program of instructions further comprises:~~

receiving the at least one request to obtain the interest in the designated geographic area includes receiving sponsor established perimeter definitions; and  
the sponsor established perimeter definitions at least partially define the designated geographic area~~at least one instruction to reserve a specific one of the plurality of geographic areas for exclusive delivery of content associated with a particular one of the plurality of sponsors to application programs and having a target location contained within the specific one of the plurality of geographic areas.~~

**REMARKS**

The Application has been reviewed in light of the Office Action mailed November 20, 2013. At the time of this Office Action, Claims 1-20 were pending in the Application. The following actions were taken or matters raised: (I) Claims 1-20 were rejected on the grounds of nonstatutory double patenting as being unpatentable over one or more claims of U.S. Patent No. 8,433,296 in view of U.S. Patent No. 7,103,368; (II) Claims 1-3, 8-10, and 15-17 were rejected under pre-AIA 35 USC U.S.C. 103(a) as being unpatentable over Gupta et al. (US 2010/00312646) in view of Khivesara et al. (US 2008/0098420); (III) Claims 4, 11, and 18 were rejected under pre-AIA 35 USC U.S.C. 103(a) as being unpatentable over Gupta et al. (US 2010/00312646) in view of Khivesara et al. (US 2008/0098420) in further view of Sato (US 2004/0253965); and (IV) Claims 5-7, 12-14, and 19-20 were rejected under pre-AIA 35 USC U.S.C. 103(a) as being unpatentable over Gupta et al. (US 2010/00312646) in view of Khivesara et al. (US 2008/0098420) in further view of Guido (US 7814106). In order to advance prosecution of this case by overcoming the rejections asserted by the Office and/or characterizing the Applicant's claimed invention (i.e., the invention) with greater specificity, certain claims have been amended. The Applicants submit that the amendments made herein do not involve the introduction of any new matter. Accordingly, the Applicants respectfully request reconsideration and favorable action in this case.

**Double Patenting Rejection**

With respect to the rejection of claims 1-20 on the grounds of nonstatutory double patenting, the Applicants request reconsideration in view of the scope of amended claims 1-20.

**Rejection of the Claims 1, 8 and 15 under pre-AIA 35 USC 103(a)**

The Office has rejected independent Claims 1, 8 and 15 under pre-AIA 35 U.S.C. § 103(a) as being unpatentable over Gupta et al. (US 2010/00312646) in view of Khivesara et al. (US 2008/0098420). The Applicants submit that the present invention as recited in amended independent Claims 1, 8, and 15 and all claims dependent thereon are distinguished from the disclosures of Gupta and Khivesara, individually and in any combination thereof, and that the present invention provides advantageous, useful and non-obvious functionality with respect to Gupta and Khivesara. Accordingly, the Applicants submit that the rejection under pre-AIA 35 U.S.C. § 103(a) applied to independent Claims 1, 8, and 15 have been overcome, and respectfully requests the Office to withdraw such rejections to independent Claims 1, 8, and 15 as well as all claims dependent thereon.

Independent claims 1, 8, and 15 have each been amended to recite:

1.) receiving, from one or more sponsors, at least one request to obtain an interest in a designated geographic area; *[This recited language finds support in the specification of the Applicant's as-filed application at least at paragraphs 0009, 0018, 0021, 0044 and 0048]*

2.) determining if the interest in the designated geographic area is to be provided to the one or more sponsors; *[This recited language finds support in the specification of the Applicant's as-filed application at least at paragraphs 0009 and 0049]*

3.) restricting content delivered to one or more instances of an application program to being from the one or more sponsors after it is determined that a target location has entered the designated geographic area and in response to determining that the interest in the designated geographic area is to be provided to the one or more sponsors; *[This recited language finds*

*support in the specification of the Applicant's as-filed application at least at paragraphs 0019-0021, 0023, 0027, 0050 ]*

4.) receiving, from the one or more sponsors, content to be delivered to at least one of the one or more instances of the application program after it is determined that the target location has entered the designated geographic area; *[This recited language finds support in the specification of the Applicant's as-filed application at least at paragraphs 0008, 0009, 0029, 0035, 0044 and 0050]* and

5.) providing, after it is determined that the target location has entered the designated geographic area, at least a portion of the content received from the one or more sponsors to at least one of the one or more instances of the application program. *[This recited language finds support in the specification of the Applicant's as-filed application at least at paragraphs 0006, 0019, 0021, 0029, 0034 and 0038]*

The cited prior art references, individually or in combination, do not disclose or suggest the claimed invention as recited in amended independent Claims 1, 8 and 15.

**Rejection of the Claims 2, 7, 9, 14, 16 and 20 under pre-AIA 35 USC 103(a)**

The Office has rejected dependent Claims 2, 9, and 16 under pre-AIA 35 U.S.C. § 103(a) as being unpatentable over Gupta et al. (US 2010/00312646) in view of Khivesara et al. (US 2008/0098420). The Office has rejected dependent Claims 7, 14, and 20 under pre-AIA 35 U.S.C. § 103(a) as being unpatentable over Gupta et al. (US 2010/00312646) in view of Khivesara et al. (US 2008/0098420) in further view of Guido (US 7814106). The Applicants submit that the present invention as recited in amended dependent Claims 2, 7, 9, 14, 16 and 20 and all claims dependent thereon are distinguished from the disclosures of Gupta,

Khivesara, and Guido, individually and in any combination thereof, and that the present invention provides advantageous, useful and non-obvious functionality with respect to Gupta, Khivesara and Guido. Accordingly, the Applicants submit that the rejection under pre-AIA 35 U.S.C. § 103(a) applied to dependent Claims 2, 7, 9, 14, 16 and 20 have been overcome, and respectfully requests the Office to withdraw such rejections to dependent Claims 2, 7, 9, 14, 16 and 20 as well as all claims dependent thereon.

Dependent claims 2, 7, 9, 14, 16 and 20 have each been amended to recite:

1.) receiving the at least one request to obtain the interest in the designated geographic area includes receiving sponsor established perimeter definitions; *[This recited language finds support in the specification of the Applicant's as-filed application at least at paragraphs 0045-0047]* and

2.) the sponsor established perimeter definitions at least partially define the designated geographic area. *[This recited language finds support in the specification of the Applicant's as-filed application at least at paragraphs 0045-0047]*

The cited prior art references, individually or in combination, do not disclose or suggest the claimed invention as recited in amended dependent Claims 2, 7, 9, 14, 16 and 20.

**Rejection of the Claims 3, 10, and 17 under pre-AIA 35 USC 103(a)**

The Office has rejected dependent Claims 3, 10, and 17 under pre-AIA 35 U.S.C. § 103(a) as being unpatentable over Gupta et al. (US 2010/00312646) in view of Khivesara et al. (US 2008/0098420). The Applicants submit that the present invention as recited in amended dependent Claims 3, 10, and 17 and all claims dependent thereon are distinguished from the

disclosures of Gupta and Khivesara, individually and in any combination thereof, and that the present invention provides advantageous, useful and non-obvious functionality with respect to Gupta and Khivesara. Accordingly, the Applicants submit that the rejection under pre-AIA 35 U.S.C. § 103(a) applied to dependent Claims 3, 10, and 17 have been overcome, and respectfully requests the Office to withdraw such rejections to dependent Claims 3, 10, and 17 as well as all claims dependent thereon.

Dependent claims 3, 10, and 17 have each been amended to recite:

1.) receiving the at least one request to obtain the interest in the designated geographic area includes receiving a first request from a first sponsor and receiving a second request from a second sponsor; *[This recited language finds support in the specification of the Applicant's as-filed application at least at paragraphs 0009, 0018, 0021, 0044 and 0048]*

2.) restricting the content delivered to the one or more instances of the application program includes restricting content delivered to one or more instances of the application program to be from the first one of the sponsors during a first period of time and to be from the second one of the sponsors during a second period of time; *[This recited language finds support in the specification of the Applicant's as-filed application at least at paragraphs 0009, 0029 and 0052]*

3.) receiving content to be delivered to the one or more instances of the application program includes receiving content from the first sponsor and receiving content from the second sponsor; *[This recited language finds support in the specification of the Applicant's as-filed application at least at paragraphs 0008, 0009, 0029, 0035, 0044 and 0050]* and

4.) providing the at least a portion of the content to the to the one or more instances of the application program includes providing at least a portion of the content received from

the first sponsor to an instance of the application program during the first period of time and providing at least a portion of the content received from the second sponsor to the instance of the application program during the second period of time the sponsor established perimeter definitions at least partially define at least one of the designated geographic areas. *[This recited language finds support in the specification of the Applicant's as-filed application at least at paragraphs 0009, 0029 and 0052]*

The cited prior art references, individually or in combination, do not disclose or suggest the claimed invention as recited in amended dependent Claims 3, 10 and 17.

**Rejection of the Claims 4, 6, 11, 13 and 18 under pre-AIA 35 USC 103(a)**

The Office has rejected dependent Claims 4, 11, and 18 under pre-AIA 35 USC U.S.C. 103(a) as being unpatentable over Gupta et al. (US 2010/00312646) in view of Khivesara et al. (US 2008/0098420) in further view of Sato (US 2004/0253965). The Office has rejected dependent Claims 6 and 13 under pre-AIA 35 USC U.S.C. 103(a) as being unpatentable over Gupta et al. (US 2010/00312646) in view of Khivesara et al. (US 2008/0098420) in further view of Guido (US 7814106). The Applicants submit that the present invention as recited in amended dependent Claims 4, 6, 11, 13 and 18 and all claims dependent thereon are distinguished from the disclosures of Gupta, Khivesara, Guido and Sato, individually and in any combination thereof, and that the present invention provides advantageous, useful and non-obvious functionality with respect to Gupta, Khivesara, Guido and Sato. Accordingly, the Applicants submit that the rejection under pre-AIA 35 U.S.C. § 103(a) applied to dependent Claims 4, 6, 11, 13 and 18 have been overcome, and respectfully requests the Office to

withdraw such rejections to dependent Claims 4, 6, 11, 13 and 18 as well as all claims dependent thereon.

Dependent claims 4, 6, 11, 13 and 18 have each been amended to recite:

1.) the one or more sponsors is at least one of the one or more instances of the application program. *[This recited language finds support in the specification of the Applicant's as-filed application at least at paragraphs 0019, 0067 and 0068]*

The cited prior art references, individually or in combination, do not disclose or suggest the claimed invention as recited in amended dependent Claims 4, 6, 11, 13 and 18.

**Rejection of the Claims 5, 12, and 19 under pre-AIA 35 USC 103(a)**

The Office has rejected dependent Claims 5, 12, and 19 under pre-AIA 35 USC U.S.C. 103(a) as being unpatentable over Gupta et al. (US 2010/00312646) in view of Khivesara et al. (US 2008/0098420) in further view of Guido (US 7814106). The Applicants submit that the present invention as recited in amended dependent Claims 5, 12, and 19 and all claims dependent thereon are distinguished from the disclosures of Gupta, Khivesara and Guido, individually and in any combination thereof, and that the present invention provides advantageous, useful and non-obvious functionality with respect to Gupta, Khivesara and Guido. Accordingly, the Applicants submit that the rejection under pre-AIA 35 U.S.C. § 103(a) applied to dependent Claims 5, 12, and 19 have been overcome, and respectfully requests the Office to withdraw such rejections to dependent Claims 5, 12, and 19 as well as all claims dependent thereon.

Dependent claims 5, 12, and 19 have each been amended to recite:

- 1.) providing the one or more sponsors a response to the request after determining that the interest in the designated geographic area is to be provided to the one or more sponsors; *[This recited language finds support in the specification of the Applicant's as-filed application at least at paragraphs 0009]* and
- 2.) storing a record of the interest in the designated geographic area after determining that the interest in the designated geographic area is to be provided to the one or more sponsors. *[This recited language finds support in the specification of the Applicant's as-filed application at least at paragraphs 0009 and 0033]*

The cited prior art references, individually or in combination, do not disclose or suggest the claimed invention as recited in amended dependent Claims 5, 12 and 19.

**Allowable Subject Matter In Parent Application**

In an Examiner's Amendment in the Notice of Allowance mailed 14-January 2013 in parent application serial no. 12/434,094, the following language was amended into independent Claims 1, 8 and 15:

receiving, from a sponsor, a request to obtain an interest in a selected one of the plurality of geographic areas;  
providing the sponsor a response to the request;

storing a record of the interest in the selected one of the plurality of geographic areas;  
and  
receiving, from the sponsor, content to be delivered to registered application programs  
having target locations contained within a selected one of the plurality of  
geographic areas.

The Applicants submit that these same limitations are expressly and/or effectively  
presented in one or more of the as-amended claims presented herein, as indicated below:

- 1.) receiving, from a sponsor, a request to obtain an interest in a selected one of the  
plurality of geographic areas; *[clause 1 of independent claims 1, 8 and 15]*
- 2.) providing the sponsor a response to the request; *[clause 1 of independent claims 5,  
12 and 19]*
- 3.) storing a record of the interest in the selected one of the plurality of geographic  
areas; *[clause 1 of independent claims 5, 12 and 19]* and
- 4.) receiving, from the sponsor, content to be delivered to registered application  
programs having target locations contained within a selected one of the plurality  
of geographic areas. *[clause 4 of independent claims 1, 8 and 15]*

**CONCLUSION**

The Applicants have made an earnest attempt to place this case in condition for allowance. For the foregoing reasons, and for reasons clearly apparent, the Applicants respectfully requests full allowance of all pending claims. If there are any matters that can be discussed by telephone to further the prosecution of the Application, the Applicants invite the Examiner to contact the undersigned at 512-345-9767 at the Examiner's convenience.

Respectfully Submitted,

A handwritten signature in black ink that reads "David O. Simmons". The signature is written in a cursive style with a horizontal line extending from the end.

## Privacy Act Statement

The **Privacy Act of 1974 (P.L. 93-579)** requires that you be given certain information in connection with your submission of the attached form related to a patent application or patent. Accordingly, pursuant to the requirements of the Act, please be advised that: (1) the general authority for the collection of this information is 35 U.S.C. 2(b)(2); (2) furnishing of the information solicited is voluntary; and (3) the principal purpose for which the information is used by the U.S. Patent and Trademark Office is to process and/or examine your submission related to a patent application or patent. If you do not furnish the requested information, the U.S. Patent and Trademark Office may not be able to process and/or examine your submission, which may result in termination of proceedings or abandonment of the application or expiration of the patent.

The information provided by you in this form will be subject to the following routine uses:

1. The information on this form will be treated confidentially to the extent allowed under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C. 552a). Records from this system of records may be disclosed to the Department of Justice to determine whether disclosure of these records is required by the Freedom of Information Act.
2. A record in this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.
3. A record in this system of records may be disclosed, as a routine use, to a Member of Congress submitting a request involving an individual, to whom the record pertains, when the individual has requested assistance from the Member with respect to the subject matter of the record.
4. A record in this system of records may be disclosed, as a routine use, to a contractor of the Agency having need for the information in order to perform a contract. Recipients of information shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).
5. A record related to an International Application filed under the Patent Cooperation Treaty in this system of records may be disclosed, as a routine use, to the International Bureau of the World Intellectual Property Organization, pursuant to the Patent Cooperation Treaty.
6. A record in this system of records may be disclosed, as a routine use, to another federal agency for purposes of National Security review (35 U.S.C. 181) and for review pursuant to the Atomic Energy Act (42 U.S.C. 218(c)).
7. A record from this system of records may be disclosed, as a routine use, to the Administrator, General Services, or his/her designee, during an inspection of records conducted by GSA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with the GSA regulations governing inspection of records for this purpose, and any other relevant (*i.e.*, GSA or Commerce) directive. Such disclosure shall not be used to make determinations about individuals.
8. A record from this system of records may be disclosed, as a routine use, to the public after either publication of the application pursuant to 35 U.S.C. 122(b) or issuance of a patent pursuant to 35 U.S.C. 151. Further, a record may be disclosed, subject to the limitations of 37 CFR 1.14, as a routine use, to the public if the record was filed in an application which became abandoned or in which the proceedings were terminated and which application is referenced by either a published application, an application open to public inspection or an issued patent.
9. A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local law enforcement agency, if the USPTO becomes aware of a violation or potential violation of law or regulation.

## TRANSMITTAL FOR POWER OF ATTORNEY TO ONE OR MORE REGISTERED PRACTITIONERS

**NOTE:** This form is to be submitted with the Power of Attorney by Applicant form (PTO/AIA/82B) to identify the application to which the Power of Attorney is directed, in accordance with 37 CFR 1.5, unless the application number and filing date are identified in the Power of Attorney by Applicant form. If neither form PTO/AIA/82A nor form PTO/AIA/82B identifies the application to which the Power of Attorney is directed, the Power of Attorney will not be recognized in the application.

Application Number	13/856,392
Filing Date	04/03/2013
First Named Inventor	Ryan Hardin
Title	EXCLUSIVE DELIVERY OF CONTENT WITHIN GEOGRAPHIC AREAS
Art Unit	2624
Examiner Name	Benjamin Morales Fenandez
Attorney Docket Number	0075652-00002

SIGNATURE of Applicant or Patent Practitioner			
Signature		Date (Optional)	4/19/2014
Name	David G. Simmons	Registration Number	43124
Title (if Applicant is a juristic entity)			
Applicant Name (if Applicant is a juristic entity)			
<b>NOTE:</b> This form must be signed in accordance with 37 CFR 1.33. See 37 CFR 1.4(d) for signature requirements and certifications. If more than one applicant, use multiple forms.			
<input checked="" type="checkbox"/> *Total of 2 forms are submitted.			

This collection of information is required by 37 CFR 1.131, 1.32, and 1.33. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.11 and 1.14. This collection is estimated to take 3 minutes to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450. **DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.**

*If you need assistance in completing the form, call 1-800-PTO-9199 and select option 2*

## POWER OF ATTORNEY BY APPLICANT

I hereby revoke all previous powers of attorney given in the application identified in either the attached transmittal letter or the boxes below.

Application Number	Filing Date

(Note: The boxes above may be left blank if information is provided on form PTO/AIA/82A.)

- I hereby appoint the Patent Practitioner(s) associated with the following Customer Number as my/our attorney(s) or agent(s), and to transact all business in the United States Patent and Trademark Office connected therewith for the application referenced in the attached transmittal letter (form PTO/AIA/82A) or identified above: 41468
- OR**
- I hereby appoint Practitioner(s) named in the attached list (form PTO/AIA/82C) as my/our attorney(s) or agent(s), and to transact all business in the United States Patent and Trademark Office connected therewith for the patent application referenced in the attached transmittal letter (form PTO/AIA/82A) or identified above. (Note: Complete form PTO/AIA/82C.)

**Please recognize or change the correspondence address for the application identified in the attached transmittal letter or the boxes above to:**

- The address associated with the above-mentioned Customer Number
- OR**
- The address associated with Customer Number:
- OR**

Firm or Individual Name			
Address			
City	State	Zip	
Country

### Warnings:

### Information:

This Acknowledgement Receipt evidences receipt on the noted date by the USPTO of the indicated documents, characterized by the applicant, and including page counts, where applicable. It serves as evidence of receipt similar to a Post Card, as described in MPEP 503.

**New Applications Under 35 U.S.C. 111**

If a new application is being filed and the application includes the necessary components for a filing date (see 37 CFR 1.53(b)-(d) and MPEP 506), a Filing Receipt (37 CFR 1.54) will be issued in due course and the date shown on this Acknowledgement Receipt will establish the filing date of the application.

**National Stage of an International Application under 35 U.S.C. 371**

If a timely submission to enter the national stage of an international application is compliant with the conditions of 35 U.S.C. 371 and other applicable requirements a Form PCT/DO/EO/903 indicating acceptance of the application as a national stage submission under 35 U.S.C. 371 will be issued in addition to the Filing Receipt, in due course.

**New International Application Filed with the USPTO as a Receiving Office**

If a new international application is being filed and the international application includes the necessary components for an international filing date (see PCT Article 11 and MPEP 1810), a Notification of the International Application Number and of the International Filing Date (Form PCT/RO/105) will be issued in due course, subject to prescriptions concerning national security, and the date shown on this Acknowledgement Receipt will establish the international filing date of the application.

Under the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number.

PAPER

**Please find below and/or attached an Office communication concerning this application or proceeding.**

The time period for reply, if any, is set in the attached communication.

<b>Office Action Summary</b>	<b>Application No.</b> 13/856,392	<b>Applicant(s)</b> HARDIN ET AL.	
	<b>Examiner</b> BENJAMIN MORALES	<b>Art Unit</b> 2624	<b>AIA (First Inventor to File) Status</b> No

**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 2 MONTHS FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1)  Responsive to communication(s) filed on 04/19/2014.  
 A declaration(s)/affidavit(s) under **37 CFR 1.130(b)** was/were filed on \_\_\_\_\_.
- 2a)  This action is **FINAL**.                      2b)  This action is non-final.
- 3)  An election was made by the applicant in response to a restriction requirement set forth during the interview on \_\_\_\_\_; the restriction requirement and election have been incorporated into this action.
- 4)  Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims\***

- 5)  Claim(s) 1-20 is/are pending in the application.  
5a) Of the above claim(s) 1-20 is/are withdrawn from consideration.
- 6)  Claim(s) \_\_\_\_\_ is/are allowed.
- 7)  Claim(s) \_\_\_\_\_ is/are rejected.
- 8)  Claim(s) \_\_\_\_\_ is/are objected to.
- 9)  Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

\* If any claims have been determined allowable, you may be eligible to benefit from the **Patent Prosecution Highway** program at a participating intellectual property office for the corresponding application. For more information, please see [http://www.uspto.gov/patents/init\\_events/pph/index.jsp](http://www.uspto.gov/patents/init_events/pph/index.jsp) or send an inquiry to [PPHfeedback@uspto.gov](mailto:PPHfeedback@uspto.gov).

**Application Papers**

- 10)  The specification is objected to by the Examiner.
- 11)  The drawing(s) filed on \_\_\_\_\_ is/are: a)  accepted or b)  objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).

**Priority under 35 U.S.C. § 119**

- 12)  Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).

**Certified copies:**

- a)  All    b)  Some\*\*    c)  None of the:
1.  Certified copies of the priority documents have been received.
  2.  Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  3.  Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\*\* See the attached detailed Office action for a list of the certified copies not received.

**Attachment(s)**

- 1)  Notice of References Cited (PTO-892)
- 2)  Information Disclosure Statement(s) (PTO/SB/08a and/or PTO/SB/08b)  
Paper No(s)/Mail Date \_\_\_\_\_.
- 3)  Interview Summary (PTO-413)  
Paper No(s)/Mail Date. \_\_\_\_\_.
- 4)  Other: \_\_\_\_\_.

### **DETAILED ACTION**

1. The present application is being examined under the pre-AIA first to invent provisions.

#### ***Election/Restrictions***

2. Newly submitted claims 1-20 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: The claims are directed to a method registering reservation and definition of a geographic area to be selected by a sponsor and applied rules on how to establish availability or in availability of an area to delivery of content from the sponsor of interest on that area exclusively. While the original presentation claims were oriented to delivery of content from a sponsor to navigation system based geographical area associated with the application programs.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 1-20 withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

#### ***Response to Amendment***

3. The amendment filed on 04/19/2014 amending claims (1-20) which were previously drawn to the elected invention and presenting currently amended claims (1-20) in a way as to be drawn to a non-elected invention is non-responsive (MPEP § 821.03). The remaining claims are not readable on the elected invention because are

directed to a method registering reservation and definition of a geographic area to be selected by a sponsor and applied rules on how to establish availability or in availability of an area to delivery of content from the sponsor of interest on that area exclusively.

Since the above-mentioned reply appears to be *bona fide*, applicant is given a TIME PERIOD of **TWO (2) MONTHS** from the mailing date of this notice within which to supply the omission or correction in order to avoid abandonment. This application has been granted special status under the accelerated examination program. Extensions of this time period may be granted under 37 CFR 1.136(a). However, filing a petition for extension of time will result in the application being taken out of the accelerated examination program.

The objective of the accelerated examination program is to complete the examination of an application within twelve months from the filing date of the application. Any reply must be filed electronically via EFS-Web so that the papers will be expeditiously processed and considered. If the reply is not filed electronically via EFS-Web, the final disposition of the application may occur later than twelve months from the filing of the application.

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to BENJAMIN MORALES whose telephone number is (571)270-5797. The examiner can normally be reached on 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kent Chang can be reached on (571) 272-7667. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.

**IN THE UNITED STATES PATENT AND TRADEMARK OFFICE**

In re Application of: Ryan Hardin et al. : By the Examiner: Benjamin Morales  
Fenandez

Serial No.: 13/856,392 : Group Art Unit: 2624

Filed: April 3, 2013 :

Title: **EXCLUSIVE DELIVERY OF CONTENT WITHIN GEOGRAPHIC  
AREAS**

EFS-Web  
Commissioner for Patents  
P.O. Box 1450  
Alexandria, VA 22313-1450

Examiner Fernandez:

This is a response to an Office Actions mailed November 20, 2013 and May 21, 2014 mailed by the United States Patent And Trademark Office (the Office). The Applicants request reconsideration of the above-identified application in view of the remarks presented herein.

**Amendment of the Claims** begin on page 2 of this correspondence;

**Remarks** begin on page 13 of this correspondence; and

**Conclusions** begin on page 22 of this correspondence.

**AMENDMENTS - IN THE CLAIMS**

Please amend the claims as follows. This listing of the claims will replace all prior versions, and listings, of the claims in the Application.

1. (currently amended) A method comprising:
  - registering a plurality of application programs for use with a content delivery platform, wherein the plurality of registered application programs are each associated for use with a navigation system;
  - establishing a plurality of perimeters defining a plurality of geographic areas;
  - receiving, from the one or more of the registered application programs, at least one request to obtain an interest in a designated geographic area;
  - determining if the interest in the designated geographic area is to be provided to at least one of the one or more registered application programs;
  - in response to determining that the interest in the designated geographic area is to be provided to at least one of the one or more registered application programs,
  - reserving content delivery to one or more of the registered application programs to being from one or more sponsors after it is determined that a target location has entered the designated geographic area ~~reserving for delivery of content from a plurality of sponsors to the plurality of registered application programs on the basis of a geographic area associated with each of the plurality of registered application programs;~~
  - receiving, from the one or more sponsors, content to be delivered to at least one of the one or more registered application program in response to said reserving;
  - and
  - ~~receiving, from a registered application program, a request for content to be used within the registered application program;~~
  - ~~in response to receiving the request:~~

~~selecting content from at least one sponsor to be delivered to the registered application program, subject to the reserving; and providing, after it is determined that the target location has entered the designated geographic area, at least a portion of the content selected from the one or more at least one sponsors to at least one of the one or more registered application programs.~~

2. (currently amended) The method of claim 1 wherein:

receiving the at least one request to obtain the interest in the designated geographic area includes receiving sponsor established perimeter definitions; and the sponsor established perimeter definitions at least partially define the designated geographic area, further comprising: recording a request identifier associated with the request; and providing the request identifier to the registered application program.

3. (currently amended) The method of claim 1 [[2]] wherein:

receiving the at least one request to obtain the interest in the designated geographic area includes receiving a first request from a first one of the registered application programs and receiving a second request from a second one of the registered application programs; reserving content delivery to the one or more registered application programs includes restricting content delivered to one or more registered application programs to be from the first one of the registered application programs during a first period of time and to be from the second one of the registered application programs during a second period of time; receiving content to be delivered to the one or more registered application programs includes receiving content from the first sponsor and receiving content from the second sponsor; and providing the at least a portion of the content to the one or more registered application programs includes providing at least a portion of the content received from the first sponsor to one or more of the registered application programs during the first period of time and providing at least a portion of the

~~content received from the second sponsor to the one or more of the registered application programs during the second period of time, further comprising: receiving information related to user interaction with the provided content, the information including the request identifier; and providing additional content to the registered application in response to the received information.~~

4. (currently amended) The method of claim 1 wherein the one or more sponsors is at least one of the one or more registered application programs, ~~further comprising: determining whether at least one of the plurality of sponsors is associated with a geographical representation lying at least partially within a predetermined radial distance of a target location; and~~ in response to a negative determination, increasing the predetermined radial distance.
  
5. (currently amended) The method of claim 1, further comprising: ~~receiving, from a sponsor, a request to obtain an interest in a selected one of the plurality of geographic areas;~~ providing the one or more sponsors a response to the request in response to determining that the interest in the designated geographic area is to be provided to at least one of the one or more registered application programs; and ~~storing a record of the interest in the designated selected one of the plurality of geographic area[[s]] in response to determining that the interest in the designated geographic area is to be provided to the one or more registered application programs.~~
  
6. (currently amended) The method of claim 5 wherein the one or more sponsors is at least one of the one or more registered application programs, ~~further comprising: receiving, from the sponsor, content to be delivered to registered application programs having target locations contained within a selected one of the plurality of geographic areas.~~

7. (currently amended) The method of claim 6[[1]] wherein:
- receiving the at least one request to obtain the interest in the designated geographic area includes receiving sponsor established perimeter definitions; and
  - the sponsor established perimeter definitions at least partially define the designated geographic area, further comprising:
  - ~~reserving a specific one of the plurality of geographic areas for exclusive delivery of content associated with a particular one of the plurality of sponsors to registered application programs and having a target location contained within the specific one of the plurality of geographic areas.~~
8. (currently amended) A system comprising:
- memory;
  - a communications interface operably coupled to the memory; and
  - at least one processor operably coupled to the memory and the communications interface, the processor configured to execute a program of instructions, the program of instructions comprising:
    - at least one instruction for registering a plurality of application programs for use with a content delivery platform, wherein the plurality of registered application programs are each associated for use with a navigation system;
    - at least one instruction for establishing a plurality of perimeters defining a plurality of geographic areas;
    - at least one instruction for receiving, from the one or more of the registered application programs, at least one request to obtain an interest in a designated geographic area;
    - at least one instruction for determining if the interest in the designated geographic area is to be provided to at least one of the one or more registered application programs;
    - at least one instruction for reserving content delivery to one or more of the registered application programs to being from one or more sponsors after it is determined that a target location has entered the designated geographic area in response to determining that the interest in the

designated geographic area is to be provided to at least one of the one or more registered application programs  
at least one instruction for receiving, from the one or more sponsors, content to be delivered to at least one of the one or more registered application program in response to said reserving; and  
at least one instruction for providing at least a portion of the content selected from the one or more sponsors to at least one of the one or more registered application programs after it is determined that the target location has entered the designated geographic area~~at least one instruction to register a plurality of application programs for use with a content delivery platform, wherein the plurality of registered application programs are each associated for use with a navigation system;~~  
~~at least one instruction to establish a plurality of perimeters defining a plurality of geographic areas;~~  
~~at least one instruction to maintain at least one record indicating content delivery reservations associating each of a plurality of sponsors with at least one of the plurality of geographic areas;~~  
~~at least one instruction to receive a request from a registered application program for content to be used within the registered application program;~~  
~~at least one instruction to select content associated with at least one of the plurality of sponsors to be delivered to the registered application program in accordance with a content delivery reservation associating the at least one sponsor with a geographic area; and~~  
~~at least one instruction to provide the selected content to the registered application program.~~

9. (currently amended) The system of claim 8[[,]] wherein ~~the program of instructions further comprises:~~

receiving the at least one request to obtain the interest in the designated geographic area includes receiving sponsor established perimeter definitions; and

~~the sponsor established perimeter definitions at least partially define the designated geographic area at least one instruction to record a request identifier associated with the request; and at least one instruction to provide the request identifier to the registered application program.~~

10. (currently amended) The system of claim 8[[9,]] wherein ~~the program of instructions further comprises:~~

~~receiving the at least one request to obtain the interest in the designated geographic area includes receiving a first request from a first one of the registered application programs and receiving a second request from a second one of the registered application programs;~~

~~reserving content delivery to the one or more registered application programs includes restricting content delivered to one or more registered application programs to be from the first one of the registered application programs during a first period of time and to be from the second one of the registered application programs during a second period of time;~~

~~receiving content to be delivered to the one or more registered application programs includes receiving content from the first sponsor and receiving content from the second sponsor; and~~

~~providing the at least a portion of the content to the one or more registered application programs includes providing at least a portion of the content received from the first sponsor to one or more of the registered application programs during the first period of time and providing at least a portion of the content received from the second sponsor to the one or more of the registered application programs during the second period of time at least one instruction to receive information related to user interaction with the provided content, the information including the request identifier; and at least one instruction to provide additional content to the registered application in response to the received information.~~

11. (currently amended) The system of claim 8[[,]] wherein the one or more sponsors is at least one of the registered application program ~~the program of instructions further comprises:~~
- ~~at least one instruction to determine whether at least one of the plurality of sponsors is associated with a geographical representation lying at least partially within a predetermined radial distance of a target location; and~~
  - ~~at least one instruction to increase the predetermined radial distance in response to the at least one instruction to determine.~~
12. (currently amended) The system of claim 8[[,]] wherein the program of instructions further comprises:
- ~~at least one instruction to receive, from a sponsor, a request to obtain an interest in a selected one of the plurality of geographic areas;~~
  - ~~at least one instruction to provide for providing the one or more sponsors a response to the request in response to determining that the interest in the designated geographic area is to be provided to at least one of the one or more registered application programs; and~~
  - ~~at least one instruction to store for storing a record of the interest in the designated selected one of the plurality of geographic area[[s]] in response to determining that the interest in the designated geographic area is to be provided to the one or more registered application programs.~~
13. (currently amended) The system of claim 12[[,]] wherein the one or more sponsors is at least one of the one or more registered application programs ~~the program of instructions further comprises:~~
- ~~at least one instruction to receive, from the sponsor, content to be delivered to registered application programs having target locations contained within the selected one of the plurality of geographic areas.~~
14. (currently amended) The system of claim [[8,]]13 wherein ~~the program of instructions further comprises:~~

receiving the at least one request to obtain the interest in the designated geographic area includes receiving sponsor established perimeter definitions; and the sponsor established perimeter definitions at least partially define the designated geographic area~~at least one instruction to reserve a specific one of the plurality of geographic areas for exclusive delivery of content associated with a particular one of the plurality of sponsors to registered application programs and having a target location contained within the specific one of the plurality of geographic areas.~~

15. (currently amended) A non-transitory computer readable medium tangibly embodying a program of computer executable instructions, the program of instructions comprising:
- at least one instruction for registering a plurality of application programs for use with a content delivery platform, wherein the plurality of registered application programs are each associated for use with a navigation system;
  - at least one instruction for establishing a plurality of perimeters defining a plurality of geographic areas;
  - at least one instruction for receiving, from the one or more of the registered application programs, at least one request to obtain an interest in a designated geographic area;
  - at least one instruction for determining if the interest in the designated geographic area is to be provided to at least one of the one or more registered application programs;
  - at least one instruction for reserving content delivery to one or more of the registered application programs to being from one or more sponsors after it is determined that a target location has entered the designated geographic area in response to determining that the interest in the designated geographic area is to be provided to at least one of the one or more registered application programs
  - at least one instruction for receiving, from the one or more sponsors, content to be delivered to at least one of the one or more registered application program in response to said reserving; and

~~at least one instruction for providing at least a portion of the content selected from the one or more sponsors to at least one of the one or more registered application programs after it is determined that the target location has entered the designated geographic area~~ at least one instruction to register a plurality of application programs for use with a content delivery platform, wherein the plurality of registered application programs are each associated for use with a navigation system;

~~at least one instruction to establish a plurality of perimeters defining respective geographic areas;~~

~~at least one instruction to maintain at least one record indicating content delivery reservations associating each of a plurality of sponsors with at least one of the plurality of geographic areas;~~

~~at least one instruction to receive a request from a registered application program for content to be used within the registered application program;~~

~~at least one instruction to select content associated with at least one of the plurality of sponsors to be delivered to the registered application program in accordance with a content delivery reservation associating the at least one sponsor with a geographic area; and~~

~~at least one instruction to provide the selected content to the registered application program.~~

16. (currently amended) The non-transitory computer readable medium of claim 15[[,]]

~~wherein the program of instructions further comprises:~~

~~receiving the at least one request to obtain the interest in the designated geographic area includes receiving sponsor established perimeter definitions; and~~

~~the sponsor established perimeter definitions at least partially define the designated geographic area~~ at least one instruction to record a request identifier associated with the request; and

~~at least one instruction to provide the request identifier to the registered application program.~~

17. (currently amended) The non-transitory computer readable medium of claim ~~[[16,]]15~~ wherein ~~the program of instructions further comprises:~~

receiving the at least one request to obtain the interest in the designated geographic area includes receiving a first request from a first one of the registered application programs and receiving a second request from a second one of the registered application programs;

reserving content delivery to the one or more registered application programs includes restricting content delivered to one or more registered application programs to be from the first one of the registered application programs during a first period of time and to be from the second one of the registered application programs during a second period of time;

receiving content to be delivered to the one or more registered application programs includes receiving content from the first sponsor and receiving content from the second sponsor; and

providing the at least a portion of the content to the one or more registered application programs includes providing at least a portion of the content received from the first sponsor to one or more of the registered application programs during the first period of time and providing at least a portion of the content received from the second sponsor to the one or more of the registered application programs during the second period of time~~at least one instruction to receive information related to user interaction with the provided content, the information including the request identifier; and~~

~~at least one instruction to provide additional content to the registered application in response to the received information.~~

18. (currently amended) The non-transitory computer readable medium of claim 15~~[[,]]~~ wherein the one or more sponsors is at least one of the one or more registered application program~~the program of instructions further comprises:~~

~~at least one instruction to determine whether at least one of the plurality of sponsors is associated with a geographical representation lying at least partially within a predetermined radial distance of a target location; and~~

~~at least one instruction to increase the predetermined radial distance in response to a negative determination.~~

19. (currently amended) The non-transitory computer readable medium of claim 15, wherein the program of instructions further comprises:

~~at least one instruction to receive, from a sponsor, a request to obtain an interest in a selected one of the plurality of geographic areas;~~

at least one instruction to provide for providing the one or more sponsors a response to the request in response to determining that the interest in the designated one or more of the plurality of geographic areas is to be provided to the one or more registered application programs; and

at least one instruction to store for storing a record of the interest in the designated selected one of the plurality of geographic area[[s]] in response to determining that the interest in the designated geographic area is to be provided to the one or more registered application programs; and

~~at least one instruction to receive, from the sponsor, content to be delivered to application programs having target locations contained within the selected one of the plurality of geographic areas.~~

20. (currently amended) The non-transitory computer readable medium of claim [[15,]]19 wherein ~~the program of instructions further comprises:~~

receiving the at least one request to obtain the interest in the designated geographic area includes receiving sponsor established perimeter definitions; and

the sponsor established perimeter definitions at least partially define the designated geographic area at least one instruction to reserve a specific one of the plurality of geographic areas for exclusive delivery of content associated with a particular one of the plurality of sponsors to application programs and having a target location contained within the specific one of the plurality of geographic areas.

**REMARKS**

The Application has been reviewed in light of the Office Actions mailed November 20, 2014 and May 21, 2014. At the time of this Office Action, Claims 1-20 were pending in the Application. The following actions were taken or matters raised: (I) Claims 1-20 were rejected on the grounds of nonstatutory double patenting as being unpatentable over one or more claims of U.S. Patent No. 8,433,296 in view of U.S. Patent No. 7,103,368; (II) Claims 1-3, 8-10, and 15-17 were rejected under pre-AIA 35 USC U.S.C. 103(a) as being unpatentable over Gupta et al. (US 2010/00312646) in view of Khivesara et al. (US 2008/0098420); (III) Claims 4, 11, and 18 were rejected under pre-AIA 35 USC U.S.C. 103(a) as being unpatentable over Gupta et al. (US 2010/00312646) in view of Khivesara et al. (US 2008/0098420) in further view of Sato (US 2004/0253965); and (IV) Claims 5-7, 12-14, and 19-20 were rejected under pre-AIA 35 USC U.S.C. 103(a) as being unpatentable over Gupta et al. (US 2010/00312646) in view of Khivesara et al. (US 2008/0098420) in further view of Guido (US 7814106). In order to advance prosecution of this case by overcoming the rejections asserted by the Office and/or characterizing the Applicant's claimed invention (i.e., the invention) with greater specificity, certain claims have been amended. The Applicants submit that the amendments made herein do not involve the introduction of any new matter. Accordingly, the Applicants respectfully request reconsideration and favorable action in this case.

**Double Patenting Rejection**

With respect to the rejection of claims 1-20 on the grounds of nonstatutory double patenting, the Applicants request reconsideration in view of the scope of amended claims 1-20.

**Rejection of the Claims 1, 8 and 15 under pre-AIA 35 USC 103(a)**

The Office has rejected independent Claims 1, 8 and 15 under pre-AIA 35 U.S.C. § 103(a) as being unpatentable over Gupta et al. (US 2010/00312646) in view of Khivesara et al. (US 2008/0098420). The Applicants submit that the present invention as recited in amended independent Claims 1, 8, and 15 and all claims dependent thereon are distinguished from the disclosures of Gupta and Khivesara, individually and in any combination thereof, and that the present invention provides advantageous, useful and non-obvious functionality with respect to Gupta and Khivesara. Accordingly, the Applicants submit that the rejection under pre-AIA 35 U.S.C. § 103(a) applied to independent Claims 1, 8, and 15 have been overcome, and respectfully requests the Office to withdraw such rejections to independent Claims 1, 8, and 15 as well as all claims dependent thereon.

Independent claims 1, 8, and 15 have each been amended to recite:

- 1.) registering a plurality of application programs for use with a content delivery platform, wherein the plurality of registered application programs are each associated for use with a navigation system; *[originally recited language]*
- 2.) establishing a plurality of perimeters defining a plurality of geographic areas; *[originally recited language]*
- 3.) receiving, from the one or more of the registered application programs, at least one request to obtain an interest in a designated geographic area; *[This recited language finds support in the specification of the Applicant's as-filed application at least at paragraphs 0009, 0018, 0021, 0044 and 0048]*
- 4.) determining if the interest in the designated geographic area is to be provided to at least one of the one or more registered application programs; *[This recited language finds*

*support in the specification of the Applicant's as-filed application at least at paragraphs 0009 and 0049]*

5.) in response to determining that the interest in the designated geographic area is to be provided to at least one of the one or more registered application programs, reserving content delivery to one or more of the registered application programs to being from one or more sponsors after it is determined that a target location has entered the designated geographic area; *[This recited language finds support in the specification of the Applicant's as-filed application at least at paragraphs 0019-0021, 0023, 0027, 0050 ]*

6.) receiving, from the one or more sponsors, content to be delivered to at least one of the one or more registered application program in response to said reserving; *[This recited language finds support in the specification of the Applicant's as-filed application at least at paragraphs 0008, 0009, 0029, 0035, 0044 and 0050]* and

7.) providing, after it is determined that the target location has entered the designated geographic area, at least a portion of the content selected from the one or more sponsors to at least one of the one or more registered application programs. *[This recited language finds support in the specification of the Applicant's as-filed application at least at paragraphs 0006, 0019, 0021, 0029, 0034 and 0038]*

The cited prior art references, individually or in combination, do not disclose or suggest the claimed invention as recited in amended independent Claims 1, 8 and 15.

**Rejection of the Claims 2, 7, 9, 14, 16 and 20 under pre-AIA 35 USC 103(a)**

The Office has rejected dependent Claims 2, 9, and 16 under pre-AIA 35 U.S.C. § 103(a) as being unpatentable over Gupta et al. (US 2010/00312646) in view of Khivesara et al.

(US 2008/0098420). The Office has rejected dependent Claims 7, 14, and 20 under pre-AIA 35 U.S.C. § 103(a) as being unpatentable over Gupta et al. (US 2010/00312646) in view of Khivesara et al. (US 2008/0098420) in further view of Guido (US 7814106). The Applicants submit that the present invention as recited in amended dependent Claims 2, 7, 9, 14, 16 and 20 and all claims dependent thereon are distinguished from the disclosures of Gupta, Khivesara, and Guido, individually and in any combination thereof, and that the present invention provides advantageous, useful and non-obvious functionality with respect to Gupta, Khivesara and Guido. Accordingly, the Applicants submit that the rejection under pre-AIA 35 U.S.C. § 103(a) applied to dependent Claims 2, 7, 9, 14, 16 and 20 have been overcome, and respectfully requests the Office to withdraw such rejections to dependent Claims 2, 7, 9, 14, 16 and 20 as well as all claims dependent thereon.

Dependent claims 2, 7, 9, 14, 16 and 20 have each been amended to recite:

1.) receiving the at least one request to obtain the interest in the designated geographic area includes receiving sponsor established perimeter definitions; *[This recited language finds support in the specification of the Applicant's as-filed application at least at paragraphs 0045-0047]* and

2.) the sponsor established perimeter definitions at least partially define the designated geographic area. *[This recited language finds support in the specification of the Applicant's as-filed application at least at paragraphs 0045-0047]*

The cited prior art references, individually or in combination, do not disclose or suggest the claimed invention as recited in amended dependent Claims 2, 7, 9, 14, 16 and 20.

**Rejection of the Claims 3, 10, and 17 under pre-AIA 35 USC 103(a)**

The Office has rejected dependent Claims 3, 10, and 17 under pre-AIA 35 U.S.C. § 103(a) as being unpatentable over Gupta et al. (US 2010/00312646) in view of Khivesara et al. (US 2008/0098420). The Applicants submit that the present invention as recited in amended dependent Claims 3, 10, and 17 and all claims dependent thereon are distinguished from the disclosures of Gupta and Khivesara, individually and in any combination thereof, and that the present invention provides advantageous, useful and non-obvious functionality with respect to Gupta and Khivesara. Accordingly, the Applicants submit that the rejection under pre-AIA 35 U.S.C. § 103(a) applied to dependent Claims 3, 10, and 17 have been overcome, and respectfully requests the Office to withdraw such rejections to dependent Claims 3, 10, and 17 as well as all claims dependent thereon.

Dependent claims 3, 10, and 17 have each been amended to recite:

1.) receiving the at least one request to obtain the interest in the designated geographic area includes receiving a first request from a first one of the registered application programs and receiving a second request from a second one of the registered application programs; *[This recited language finds support in the specification of the Applicant's as-filed application at least at paragraphs 0009, 0018, 0021, 0044 and 0048]*

2.) reserving content delivery to the one or more registered application programs includes restricting content delivered to one or more registered application programs to be from the first one of the registered application programs during a first period of time and to be from the second one of the registered application programs during a second period of time; *[This recited language finds support in the specification of the Applicant's as-filed application at least at paragraphs 0009, 0029 and 0052]*

3.) receiving content to be delivered to the one or more registered application programs includes receiving content from the first sponsor and receiving content from the second sponsor; *[This recited language finds support in the specification of the Applicant's as-filed application at least at paragraphs 0008, 0009, 0029, 0035, 0044 and 0050]* and

4.) providing the at least a portion of the content to the one or more registered application programs includes providing at least a portion of the content received from the first sponsor to one or more of the registered application programs during the first period of time and providing at least a portion of the content received from the second sponsor to the one or more of the registered application programs during the second period of time. *[This recited language finds support in the specification of the Applicant's as-filed application at least at paragraphs 0009, 0029 and 0052]*

The cited prior art references, individually or in combination, do not disclose or suggest the claimed invention as recited in amended dependent Claims 3, 10 and 17.

**Rejection of the Claims 4, 6, 11, 13 and 18 under pre-AIA 35 USC 103(a)**

The Office has rejected dependent Claims 4, 11, and 18 under pre-AIA 35 USC U.S.C. 103(a) as being unpatentable over Gupta et al. (US 2010/00312646) in view of Khivesara et al. (US 2008/0098420) in further view of Sato (US 2004/0253965). The Office has rejected dependent Claims 6 and 13 under pre-AIA 35 USC U.S.C. 103(a) as being unpatentable over Gupta et al. (US 2010/00312646) in view of Khivesara et al. (US 2008/0098420) in further view of Guido (US 7814106). The Applicants submit that the present invention as recited in amended dependent Claims 4, 6, 11, 13 and 18 and all claims dependent thereon are distinguished from the disclosures of Gupta, Khivesara, Guido and Sato, individually and in

any combination thereof, and that the present invention provides advantageous, useful and non-obvious functionality with respect to Gupta, Khivesara, Guido and Sato. Accordingly, the Applicants submit that the rejection under pre-AIA 35 U.S.C. § 103(a) applied to dependent Claims 4, 6, 11, 13 and 18 have been overcome, and respectfully requests the Office to withdraw such rejections to dependent Claims 4, 6, 11, 13 and 18 as well as all claims dependent thereon.

Dependent claims 4, 6, 11, 13 and 18 have each been amended to recite:

1.) the one or more sponsors is at least one of the one or more registered application programs. *[This recited language finds support in the specification of the Applicant's as-filed application at least at paragraphs 0019, 0067 and 0068]*

The cited prior art references, individually or in combination, do not disclose or suggest the claimed invention as recited in amended dependent Claims 4, 6, 11, 13 and 18.

**Rejection of the Claims 5, 12, and 19 under pre-AIA 35 USC 103(a)**

The Office has rejected dependent Claims 5, 12, and 19 under pre-AIA 35 USC U.S.C. 103(a) as being unpatentable over Gupta et al. (US 2010/00312646) in view of Khivesara et al. (US 2008/0098420) in further view of Guido (US 7814106). The Applicants submit that the present invention as recited in amended dependent Claims 5, 12, and 19 and all claims dependent thereon are distinguished from the disclosures of Gupta, Khivesara and Guido, individually and in any combination thereof, and that the present invention provides advantageous, useful and non-obvious functionality with respect to Gupta, Khivesara and Guido. Accordingly, the Applicants submit that the rejection under pre-AIA 35 U.S.C. §

103(a) applied to dependent Claims 5, 12, and 19 have been overcome, and respectfully requests the Office to withdraw such rejections to dependent Claims 5, 12, and 19 as well as all claims dependent thereon.

Dependent claims 5, 12, and 19 have each been amended to recite:

- 1.) providing the one or more sponsors a response to the request after determining that the interest in the designated geographic area is to be provided to the at least one of the one or more registered application programs; *[This recited language finds support in the specification of the Applicant's as-filed application at least at paragraphs 0009]* and
- 2.) storing a record of the interest in the designated geographic area after determining that the interest in the designated geographic area is to be provided to at least one of the one or more application programs. *[This recited language finds support in the specification of the Applicant's as-filed application at least at paragraphs 0009 and 0033]*

The cited prior art references, individually or in combination, do not disclose or suggest the claimed invention as recited in amended dependent Claims 5, 12 and 19.

#### **Allowable Subject Matter In Parent Application**

In an Examiner's Amendment in the Notice of Allowance mailed January 14, 2013 in parent application serial no. 12/434,094, the following language was amended into independent Claims 1, 8 and 15:

receiving, from a sponsor, a request to obtain an interest in a selected one of the plurality of geographic areas;  
providing the sponsor a response to the request;  
storing a record of the interest in the selected one of the plurality of geographic areas;  
and  
receiving, from the sponsor, content to be delivered to registered application programs having target locations contained within a selected one of the plurality of geographic areas.

The Applicants submit that these same limitations are expressly and/or effectively presented in one or more of the as-amended claims presented herein, as indicated below:

- 1.) receiving, from a sponsor, a request to obtain an interest in a selected one of the plurality of geographic areas; *[clause 3 of independent claims 1, 8 and 15]*
- 2.) providing the sponsor a response to the request; *[clause 1 of independent claims 5, 12 and 19]*
- 3.) storing a record of the interest in the selected one of the plurality of geographic areas; *[clause 1 of independent claims 5, 12 and 19]* and
- 4.) receiving, from the sponsor, content to be delivered to registered application programs having target locations contained within a selected one of the plurality of geographic areas. *[clause 6 of independent claims 1, 8 and 15]*

**CONCLUSION**

The Applicants have made an earnest attempt to place this case in condition for allowance. For the foregoing reasons, and for reasons clearly apparent, the Applicants respectfully requests full allowance of all pending claims. If there are any matters that can be discussed by telephone to further the prosecution of the Application, the Applicants invite the Examiner to contact the undersigned at 512-345-9767 at the Examiner's convenience.

Respectfully Submitted,

A handwritten signature in black ink that reads "David O. Simmons". The signature is written in a cursive style with a long horizontal flourish extending to the right.

-------------------------------------	--------

This Acknowledgement Receipt evidences receipt on the noted date by the USPTO of the indicated documents, characterized by the applicant, and including page counts, where applicable. It serves as evidence of receipt similar to a Post Card, as described in MPEP 503.

**New Applications Under 35 U.S.C. 111**

If a new application is being filed and the application includes the necessary components for a filing date (see 37 CFR 1.53(b)-(d) and MPEP 506), a Filing Receipt (37 CFR 1.54) will be issued in due course and the date shown on this Acknowledgement Receipt will establish the filing date of the application.

**National Stage of an International Application under 35 U.S.C. 371**

If a timely submission to enter the national stage of an international application is compliant with the conditions of 35 U.S.C. 371 and other applicable requirements a Form PCT/DO/EO/903 indicating acceptance of the application as a national stage submission under 35 U.S.C. 371 will be issued in addition to the Filing Receipt, in due course.

**New International Application Filed with the USPTO as a Receiving Office**

If a new international application is being filed and the international application includes the necessary components for an international filing date (see PCT Article 11 and MPEP 1810), a Notification of the International Application Number and of the International Filing Date (Form PCT/RO/105) will be issued in due course, subject to prescriptions concerning national security, and the date shown on this Acknowledgement Receipt will establish the international filing date of the application.

Under the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number.

PAPER

**Please find below and/or attached an Office communication concerning this application or proceeding.**

The time period for reply, if any, is set in the attached communication.

<b>Office Action Summary</b>	<b>Application No.</b> 13/856,392	<b>Applicant(s)</b> HARDIN ET AL.	
	<b>Examiner</b> BENJAMIN MORALES	<b>Art Unit</b> 2624	<b>AIA (First Inventor to File) Status</b> No

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTHS FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1)  Responsive to communication(s) filed on 05/27/2014.  
 A declaration(s)/affidavit(s) under **37 CFR 1.130(b)** was/were filed on \_\_\_\_\_.
- 2a)  This action is **FINAL**.                      2b)  This action is non-final.
- 3)  An election was made by the applicant in response to a restriction requirement set forth during the interview on \_\_\_\_\_; the restriction requirement and election have been incorporated into this action.
- 4)  Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims\***

- 5)  Claim(s) 1-20 is/are pending in the application.  
5a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 6)  Claim(s) \_\_\_\_\_ is/are allowed.
- 7)  Claim(s) 1-20 is/are rejected.
- 8)  Claim(s) \_\_\_\_\_ is/are objected to.
- 9)  Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

\* If any claims have been determined allowable, you may be eligible to benefit from the **Patent Prosecution Highway** program at a participating intellectual property office for the corresponding application. For more information, please see [http://www.uspto.gov/patents/init\\_events/pph/index.jsp](http://www.uspto.gov/patents/init_events/pph/index.jsp) or send an inquiry to [PPHfeedback@uspto.gov](mailto:PPHfeedback@uspto.gov).

**Application Papers**

- 10)  The specification is objected to by the Examiner.
- 11)  The drawing(s) filed on \_\_\_\_\_ is/are: a)  accepted or b)  objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).

**Priority under 35 U.S.C. § 119**

- 12)  Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).

**Certified copies:**

- a)  All    b)  Some\*\*    c)  None of the:
1.  Certified copies of the priority documents have been received.
  2.  Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  3.  Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\*\* See the attached detailed Office action for a list of the certified copies not received.

**Attachment(s)**

- 1)  Notice of References Cited (PTO-892)
- 2)  Information Disclosure Statement(s) (PTO/SB/08a and/or PTO/SB/08b)  
Paper No(s)/Mail Date 09/20/2013.
- 3)  Interview Summary (PTO-413)  
Paper No(s)/Mail Date. \_\_\_\_\_
- 4)  Other: \_\_\_\_\_

### **DETAILED ACTION**

1. The present application is being examined under the pre-AIA first to invent provisions.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of 35 U.S.C. 112(b):  
(b) CONCLUSION.—The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the inventor or a joint inventor regards as the invention.

The following is a quotation of 35 U.S.C. 112 (pre-AIA), second paragraph:  
The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-20 are rejected under 35 U.S.C. 112(b) or 35 U.S.C. 112 (pre-AIA), second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which the inventor or a joint inventor, or for pre-AIA the applicant regards as the invention. The claim mentions the limitation “after it is determined that a target location has entered the designated geographic area” it is unclear how a location which a fix point in time can enter an area since a location is something that its unable to move since it’s a description of fix points or places.

### ***Double Patenting***

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory double

patenting rejection is appropriate where the claims at issue are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the reference application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement. A terminal disclaimer must be signed in compliance with 37 CFR 1.321(b).

The USPTO internet Web site contains terminal disclaimer forms which may be used. Please visit <http://www.uspto.gov/forms/>. The filing date of the application will determine what form should be used. A web-based eTerminal Disclaimer may be filled out completely online using web-screens. An eTerminal Disclaimer that meets all requirements is auto-processed and approved immediately upon submission. For more information about eTerminal Disclaimers, refer to <http://www.uspto.gov/patents/process/file/efs/guidance/eTD-info-I.jsp>.

5. Claims 1-20 are rejected on the ground of nonstatutory double patenting over claims 1,6 and 11 of U.S. Patent No. 8433296 since the claims, if allowed, would improperly extend the “right to exclude” already granted in the patent.

The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter, as follows:

13856392	8433296
1.A method comprising: registering a plurality of application programs for use with a content delivery platform, <b>wherein the plurality of registered application programs are each associated for use with a navigation system</b> ; establishing a plurality of perimeters defining a plurality of geographic areas; <u>receiving, from the one or more of the <b>registered application programs</b>, at least one request to obtain an interest in a designated geographic area; <b>determining if the interest in the designated geographic area is to be provided to at least one of the one or</b></u>	1. A method comprising: registering a plurality of application programs for use with a content delivery platform, wherein the plurality of registered application programs are each associated with at least one application program type; establishing a plurality of perimeters defining a plurality of geographic areas; reserving delivery of content from a plurality of sponsors to the plurality of registered application programs on the basis of both a geographic area and an application program type associated with each of the plurality of registered application programs; receiving, from a sponsor, a request to obtain an interest in

<p><b><u>more registered application programs;</u></b> <u>in response to determining that the interest in the designated geographic area is to be provided to at least one of the one or more registered application programs, reserving content delivery to one or more of the registered application programs to being from one or more sponsors after it is determined that a target location has entered the designated geographic area; receiving, from the one or more sponsors, content to be delivered to at least one of the one or more registered application program in response to said reserving; and providing, after it is determined that the target location has entered the designated geographic area, at least a portion of the content selected from the one or more sponsors to at least one of the one or more registered application programs.</u></p>	<p>a selected one of the plurality of geographic areas; providing the sponsor a response to the request; storing a record of the interest in the selected one of the plurality of geographic areas; receiving, from the sponsor, content to be delivered to registered application programs having target locations contained within the selected one of the plurality of geographic areas; receiving, from a registered application program, a request for content to be used within the registered application program; in response to receiving the request: selecting content from at least one sponsor to be delivered to the registered application program, subject to the reserving; and providing the content from the at least one sponsor to the registered application program.</p>
<p>8.A system comprising: memory; a</p>	<p>6. A system comprising: memory; a</p>

<p>communications interface operably coupled to the memory; and at least one processor operably coupled to the memory and the communications interface, the processor configured to execute a program of instructions, the program of instructions comprising: <u>at least one instruction for registering a plurality of application programs for use with a content delivery platform, wherein</u> <b><u>the plurality of registered application programs are each associated for use with a navigation system;</u></b> <u>at least one instruction for establishing a plurality of perimeters defining a plurality of geographic areas;</u> <b><u>at least one instruction for receiving, from the one or more of the registered application programs, at least one request to obtain an interest in a designated geographic area;</u></b> <u>at least one instruction for determining if</u></p>	<p>communications interface operably coupled to the memory; and at least one processor operably coupled to the memory and the communications interface, the processor configured to execute a program of instructions, the program of instructions comprising: at least one instruction to register a plurality of application programs for use with a content delivery platform, wherein the plurality of registered application programs are each associated with at least one application program type; at least one instruction to establish a plurality of perimeters defining a plurality of geographic areas; at least one instruction to maintain at least one record indicating content delivery reservations associating each of a plurality of sponsors with specific registered application program types and at least one of the plurality of geographic areas; at least one instruction to receive,</p>
--	---

<p><u>the interest in the designated geographic area is to be provided to at least one of the one or more registered application programs;</u></p> <p><u>at least one instruction for reserving content delivery to one or more of the registered application programs to being from one or more sponsors after it is determined that a target location has entered the designated geographic area in response to determining that the interest in the designated geographic area is to be provided to at least one of the one or more registered application programs at least one instruction for receiving, from the one or more sponsors, content to be delivered to at least one of the one or more registered application program in response to said reserving; and</u></p> <p><u>at least one instruction for providing at least a portion of the content selected from the one or more sponsors to at least one</u></p>	<p>from a sponsor, a request to obtain an interest in a selected one of the plurality of geographic areas; at least one instruction to provide the sponsor a response to the request; at least one instruction to store a record of the interest in the selected one of the plurality of geographic areas; at least one instruction to receive, from the sponsor, content to be delivered to registered application programs having target locations contained within the selected one of the plurality of geographic areas; at least one instruction to receive a request from a registered application program for content to be used within the registered application program; at least one instruction to select content associated with at least one of the plurality of sponsors, to be delivered to the registered application program of a specific type, in accordance with a content delivery reservation associating the at</p>
--	---

<p><u>of the one or more registered application programs after it is determined that the target location has entered the designated geographic area.</u></p>	<p>least one sponsor with a geographic area and a registered application program type; and at least one instruction to provide the selected content to the registered application program.</p>
<p>15. A non-transitory computer readable medium tangibly embodying a program of computer executable instructions, the program of instructions comprising: <u>at least one instruction for registering a plurality of application programs for use with a content delivery platform, <b>wherein the plurality of registered application programs are each associated for use with a navigation system</b></u>; at least one instruction for establishing a plurality of <u>perimeters defining a plurality of geographic areas; at least one instruction for receiving, from the one or more of the registered application programs, at least one request to obtain an interest in a designated geographic area; at least one</u></p>	<p>11. A non-transitory computer readable medium tangibly embodying a program of computer executable instructions, the program of instructions comprising: at least one instruction to register a plurality of application programs for use with a content delivery platform, wherein the plurality of registered application programs are each associated with at least one application program type; at least one instruction to establish a plurality of perimeters defining respective geographic areas; at least one instruction to maintain at least one record indicating content delivery reservations associating each of a plurality of sponsors with specific registered application program types and</p>

<p><u>instruction for determining if the interest in the designated geographic area is to be provided to at least one of the one or more registered application programs; at least one instruction for reserving content delivery to one or more of the registered application programs to being from one or more sponsors after it is determined that a target location has entered the designated geographic area in response to determining that the interest in the designated geographic area is to be provided to at least one of the one or more registered application programs at least one instruction for receiving, from the one or more sponsors, content to be delivered to at least one of the one or more registered application program in response to said reserving; and at least one instruction for providing at least a portion of the content selected from the one or more sponsors to at least one of the one</u></p>	<p>at least one of the plurality of geographic areas; at least one instruction to receive, from a sponsor, a request to obtain an interest in a selected one of the plurality of geographic areas; at least one instruction to provide the sponsor a response to the request; at least one instruction to store a record of the interest in the selected one of the plurality of geographic areas; at least one instruction to receive, from the sponsor, content to be delivered to application programs having target locations contained within the selected one of the plurality of geographic areas; at least one instruction to receive a request from a registered application program for content to be used within the registered application program; at least one instruction to select content associated with at least one of the plurality of sponsors to be delivered to the registered application program of a specific type, in</p>
--	---

<u>or more registered application programs</u> <u>after it is determined that the target</u> <u>location has entered the designated</u> <u>geographic area</u>	accordance with a content delivery reservation associating the at least one sponsor with a geographic area and a registered application program type; and at least one instruction to provide the selected content to the registered application program.
---	---

As seen in the above table all the limitations in this application are on the claims of 8433296 and the only difference is that the application program type on 13/856392 is associated with a navigation system which it's not specified on claim 1 on 8433296 even though the application itself receives location information which should be associated with some kind of location identification system but it's not mentioned on the claim. Additionally the fact that the registered application program as a sponsor to supply the interest for a region. It would have been an obvious matter of design choice to let a registered application program be a sponsor, since applicant has not disclosed that receiving, from the one or more of the registered application programs, at least one request to obtain an interest in a designated geographic area solves any stated problem or is for any particular purpose and it appears that the invention would perform equally well with any well-known advertiser registering system.

However Teshima in the other hand teaches "wherein the plurality of registered application programs are each associated for use with a navigation system" (abstract

Figure 5 column 16 lines 22-47 where the advertisements are sent to be displayed on a navigation system).

Therefore it would have been obvious to a person with ordinary skill in the art at the time of the invention to provide the teachings described above from Teshima's invention 8433296 invention in order to effectively deliver advertisement information to travelers both walkers and drivers.

Furthermore, there is no apparent reason why applicant was prevented from presenting claims corresponding to those of the instant application during prosecution of the application which matured into a patent. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.

### ***Conclusion***

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to BENJAMIN MORALES whose telephone number is (571)270-5797. The examiner can normally be reached on 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kent Chang can be reached on (571) 272-7667. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.

<b>Doc Code: DIST.E.FILE</b> <b>Document Description: Electronic Terminal Disclaimer - Filed</b>	PTO/SB/26 U.S. Patent and Trademark Office Department of Commerce
---	---

Electronic Petition Request	<b>TERMINAL DISCLAIMER TO OBVIATE A DOUBLE PATENTING REJECTION OVER A "PRIOR" PATENT</b>
-----------------------------	--

Application Number	13856392
--------------------	----------

Filing Date	03-Apr-2013
-------------	-------------

First Named Inventor	Ryan Hardin
----------------------	-------------

Attorney Docket Number	0075652.00002
------------------------	---------------

Title of Invention	EXCLUSIVE DELIVERY OF CONTENT WITHIN GEOGRAPHIC AREAS
--------------------	---

Filing of terminal disclaimer does not obviate requirement for response under 37 CFR 1.111 to outstanding Office Action

This electronic Terminal Disclaimer is not being used for a Joint Research Agreement.

Owner	Percent Interest
Ryan Hardin and Andrew Hill	100%

The owner(s) with percent interest listed above in the instant application hereby disclaims, except as provided below, the terminal part of the statutory term of any patent granted on the instant application which would extend beyond the expiration date of the full statutory term of prior patent number(s)

8433296

as the term of said prior patent is presently shortened by any terminal disclaimer. The owner hereby agrees that any patent so granted on the instant application shall be enforceable only for and during such period that it and the prior patent are commonly owned. This agreement runs with any patent granted on the instant application and is binding upon the grantee, its successors or assigns.

In making the above disclaimer, the owner does not disclaim the terminal part of the term of any patent granted on the instant application that would extend to the expiration date of the full statutory term of the prior patent, "as the term of said prior patent is presently shortened by any terminal disclaimer," in the event that said prior patent later:

- expires for failure to pay a maintenance fee;
- is held unenforceable;
- is found invalid by a court of competent jurisdiction;
- is statutorily disclaimed in whole or terminally disclaimed under 37 CFR 1.321;
- has all claims canceled by a reexamination certificate;
- is reissued; or
- is in any manner terminated prior to the expiration of its full statutory term as presently shortened by any terminal disclaimer.

Terminal disclaimer fee under 37 CFR 1.20(d) is included with Electronic Terminal Disclaimer request.

I certify, in accordance with 37 CFR 1.4(d)(4), that the terminal disclaimer fee under 37 CFR 1.20(d) required for this terminal disclaimer has already been paid in the above-identified application.

Applicant claims the following fee status:

- Small Entity
- Micro Entity
- Regular Undiscounted

I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code and that such willful false statements may jeopardize the validity of the application or any patent issued thereon.

THIS PORTION MUST BE COMPLETED BY THE SIGNATORY OR SIGNATORIES

I certify, in accordance with 37 CFR 1.4(d)(4) that I am:

- An attorney or agent registered to practice before the Patent and Trademark Office who is of record in this application  
  
Registration Number 43124
- A sole inventor
- A joint inventor; I certify that I am authorized to sign this submission on behalf of all of the inventors as evidenced by the power of attorney in the application
- A joint inventor; all of whom are signing this request

Signature	/David O. Simmons/
Name	David Simmons

\*Statement under 37 CFR 3.73(b) is required if terminal disclaimer is signed by the assignee (owner).  
Form PTO/SB/96 may be used for making this certification. See MPEP § 324.

Title: **EXCLUSIVE DELIVERY OF CONTENT WITHIN GEOGRAPHIC  
AREAS**

EFS-Web  
Commissioner for Patents  
P.O. Box 1450  
Alexandria, VA 22313-1450

Examiner Fernandez:

This is a response to an Office Actions mailed September 11, 2014 mailed by the United States Patent And Trademark Office (the Office). The Applicants request reconsideration of the above-identified application in view of the remarks presented herein.

**Amendment of the Claims** begin on page 2 of this correspondence;

**Remarks** begin on page 10 of this correspondence; and

**Conclusions** begin on page 12 of this correspondence.

**AMENDMENTS - IN THE CLAIMS**

Please amend the claims as follows. This listing of the claims will replace all prior versions, and listings, of the claims in the Application.

1. (currently amended) A method comprising:
  - registering a plurality of application programs for use with a content delivery platform, wherein the plurality of registered application programs are each associated for use with a navigation system;
  - establishing a plurality of perimeters defining a plurality of geographic areas;
  - receiving, from the one or more of the registered application programs, at least one request to obtain an interest in a designated geographic area;
  - determining if the interest in the designated geographic area is to be provided to at least one of the one or more registered application programs;
  - in response to determining that the interest in the designated geographic area is to be provided to at least one of the one or more registered application programs, reserving content delivery to one or more of the registered application programs to being from one or more sponsors after it is determined that an object of interest ~~target location~~ has entered the designated geographic area;
  - receiving, from the one or more sponsors, content to be delivered to at least one of the one or more registered application programs in response to said reserving; and
  - providing, after it is determined that the object of interest ~~target location~~ has entered the designated geographic area, at least a portion of the content selected from the one or more sponsors to at least one of the one or more registered application programs.
  
2. (previously presented) The method of claim 1 wherein:

receiving the at least one request to obtain the interest in the designated geographic area includes receiving sponsor established perimeter definitions; and the sponsor established perimeter definitions at least partially define the designated geographic area.

3. (previously presented) The method of claim 1 wherein:

receiving the at least one request to obtain the interest in the designated geographic area includes receiving a first request from a first one of the registered application programs and receiving a second request from a second one of the registered application programs;

reserving content delivery to the one or more registered application programs includes restricting content delivered to one or more registered application programs to be from the first one of the registered application programs during a first period of time and to be from the second one of the registered application programs during a second period of time;

receiving content to be delivered to the one or more registered application programs includes receiving content from the first sponsor and receiving content from the second sponsor; and

providing the at least a portion of the content to the one or more registered application programs includes providing at least a portion of the content received from the first sponsor to one or more of the registered application programs during the first period of time and providing at least a portion of the content received from the second sponsor to the one or more of the registered application programs during the second period of time.

4. (previously presented) The method of claim 1 wherein the one or more sponsors is at least one of the one or more registered application programs.

5. (previously presented) The method of claim 1, further comprising:

providing the one or more sponsors a response to the request in response to determining that the interest in the designated geographic area is to be provided to at least one of the one or more registered application programs; and storing a record of the interest in the designated geographic area in response to determining that the interest in the designated geographic area is to be provided to the one or more registered application programs.

6. (previously presented) The method of claim 5 wherein the one or more sponsors is at least one of the one or more registered application programs.
7. (previously presented) The method of claim 6 wherein:
  - receiving the at least one request to obtain the interest in the designated geographic area includes receiving sponsor established perimeter definitions; and
  - the sponsor established perimeter definitions at least partially define the designated geographic area.
8. (currently amended) A system comprising:
  - memory;
  - a communications interface operably coupled to the memory; and
  - at least one processor operably coupled to the memory and the communications interface, the processor configured to execute a program of instructions, the program of instructions comprising:
    - at least one instruction for registering a plurality of application programs for use with a content delivery platform, wherein the plurality of registered application programs are each associated for use with a navigation system;
    - at least one instruction for establishing a plurality of perimeters defining a plurality of geographic areas;
    - at least one instruction for receiving, from the one or more of the registered application programs, at least one request to obtain an interest in a designated geographic area;

at least one instruction for determining if the interest in the designated geographic area is to be provided to at least one of the one or more registered application programs;

at least one instruction for reserving content delivery to one or more of the registered application programs to being from one or more sponsors after it is determined that an object of interest~~target location~~ has entered the designated geographic area in response to determining that the interest in the designated geographic area is to be provided to at least one of the one or more registered application programs

at least one instruction for receiving, from the one or more sponsors, content to be delivered to at least one of the one or more registered application programs in response to said reserving; and

at least one instruction for providing at least a portion of the content selected from the one or more sponsors to at least one of the one or more registered application programs after it is determined that the object of interest~~target location~~ has entered the designated geographic area.

9. (previously presented) The system of claim 8 wherein:

receiving the at least one request to obtain the interest in the designated geographic area includes receiving sponsor established perimeter definitions; and

the sponsor established perimeter definitions at least partially define the designated geographic area.

10. (previously presented) The system of claim 8 wherein:

receiving the at least one request to obtain the interest in the designated geographic area includes receiving a first request from a first one of the registered application programs and receiving a second request from a second one of the registered application programs;

reserving content delivery to the one or more registered application programs includes restricting content delivered to one or more registered application programs to be from the first one of the registered application programs during

a first period of time and to be from the second one of the registered application programs during a second period of time;  
 receiving content to be delivered to the one or more registered application programs includes receiving content from the first sponsor and receiving content from the second sponsor; and  
 providing the at least a portion of the content to the one or more registered application programs includes providing at least a portion of the content received from the first sponsor to one or more of the registered application programs during the first period of time and providing at least a portion of the content received from the second sponsor to the one or more of the registered application programs during the second period of time.

11. (previously presented) The system of claim 8 wherein the one or more sponsors is at least one of the registered application program.

12. (previously presented) The system of claim 8 wherein the program of instructions further comprises:

at least one instruction for providing the one or more sponsors a response to the request in response to determining that the interest in the designated geographic area is to be provided to at least one of the one or more registered application programs; and

at least one instruction for storing a record of the interest in the designated geographic area in response to determining that the interest in the designated geographic area is to be provided to the one or more registered application programs.

13. (previously presented) The system of claim 12 wherein the one or more sponsors is at least one of the one or more registered application programs.

14. (previously presented) The system of claim 13 wherein:

receiving the at least one request to obtain the interest in the designated geographic area includes receiving sponsor established perimeter definitions; and the sponsor established perimeter definitions at least partially define the designated geographic area.

15. (currently amended) A non-transitory computer readable medium tangibly embodying a program of computer executable instructions, the program of instructions comprising:
- at least one instruction for registering a plurality of application programs for use with a content delivery platform, wherein the plurality of registered application programs are each associated for use with a navigation system;
  - at least one instruction for establishing a plurality of perimeters defining a plurality of geographic areas;
  - at least one instruction for receiving, from the one or more of the registered application programs, at least one request to obtain an interest in a designated geographic area;
  - at least one instruction for determining if the interest in the designated geographic area is to be provided to at least one of the one or more registered application programs;
  - at least one instruction for reserving content delivery to one or more of the registered application programs to being from one or more sponsors after it is determined that an object of interest~~target location~~ has entered the designated geographic area in response to determining that the interest in the designated geographic area is to be provided to at least one of the one or more registered application programs
  - at least one instruction for receiving, from the one or more sponsors, content to be delivered to at least one of the one or more registered application programs in response to said reserving; and
  - at least one instruction for providing at least a portion of the content selected from the one or more sponsors to at least one of the one or more registered application programs after it is determined that the object of interest~~target location~~ has entered the designated geographic area.

16. (previously presented) The non-transitory computer readable medium of claim 15 wherein:

receiving the at least one request to obtain the interest in the designated geographic area includes receiving sponsor established perimeter definitions; and the sponsor established perimeter definitions at least partially define the designated geographic area.

17. (previously presented) The non-transitory computer readable medium of claim 15 wherein:

receiving the at least one request to obtain the interest in the designated geographic area includes receiving a first request from a first one of the registered application programs and receiving a second request from a second one of the registered application programs;

reserving content delivery to the one or more registered application programs includes restricting content delivered to one or more registered application programs to be from the first one of the registered application programs during a first period of time and to be from the second one of the registered application programs during a second period of time;

receiving content to be delivered to the one or more registered application programs includes receiving content from the first sponsor and receiving content from the second sponsor; and

providing the at least a portion of the content to the one or more registered application programs includes providing at least a portion of the content received from the first sponsor to one or more of the registered application programs during the first period of time and providing at least a portion of the content received from the second sponsor to the one or more of the registered application programs during the second period of time.

18. (previously presented) The non-transitory computer readable medium of claim 15 wherein the one or more sponsors is at least one of the one or more registered application program.

19. (previously presented) The non-transitory computer readable medium of claim 15, wherein the program of instructions further comprises:

at least one instruction for providing the one or more sponsors a response to the request in response to determining that the interest in the designated one or more of the plurality of geographic areas is to be provided to the one or more registered application programs; and

at least one instruction for storing a record of the interest in the designated geographic area in response to determining that the interest in the designated geographic area is to be provided to the one or more registered application programs.

20. (previously presented) The non-transitory computer readable medium of claim 19 wherein:

receiving the at least one request to obtain the interest in the designated geographic area includes receiving sponsor established perimeter definitions; and the sponsor established perimeter definitions at least partially define the designated geographic area.

**REMARKS**

The Application has been reviewed in light of the Office Actions mailed September 11, 2014. At the time of this Office Action, Claims 1-20 were pending in the Application. The following actions were taken or matters raised: (I) Claims 1-20 were rejected under 35 U.S.C. 112(b) or 35 U.S.C. § 112 (pre-AIA), second paragraph and (II) Claims 1-20 were rejected on the grounds of nonstatutory double patenting as being unpatentable over one or more claims of U.S. Patent No. 8,433,296. In order to advance prosecution of this case by overcoming the rejections asserted by the Office and/or characterizing the Applicant's claimed invention (i.e., the invention) with greater specificity, certain claims have been amended and a terminal disclaimer has been filed in association with this matter. The Applicants submit that the amendments made herein do not involve the introduction of any new matter. Accordingly, the Applicants respectfully request reconsideration and favorable action in this case.

**Double Patenting Rejection**

With respect to the rejection of claims 1-20 on the grounds of nonstatutory double patenting, the Applicants submit that a terminal disclaimer has been filed in association with this matter.

**Rejection of the Claims 1-20 under 35 U.S.C. § 112**

The Office has rejected independent Claims 1-20 under 35 U.S.C. 112(b) or 35 U.S.C. § 112 (pre-AIA), second paragraph. The Applicants submit that the present invention as recited in amended independent Claims 1, 8, and 15 and all claims dependent thereon overcome this rejection. The term –target location—has been replaced with “object of interest”.

PATENT

This amendment finds support at paragraphs 0030, 0031, 0032, 0034, and 0035. Accordingly, the Applicants submit that the rejection under 35 U.S.C. 112(b) or 35 U.S.C. § 112 (pre-AIA), second paragraph applied to independent Claims 1, 8, and 15 have been overcome, and respectfully requests the Office to withdraw such rejections to independent Claims 1, 8, and 15 as well as all claims dependent thereon.

**CONCLUSION**

The Applicants have made an earnest attempt to place this case in condition for allowance. For the foregoing reasons, and for reasons clearly apparent, the Applicants respectfully requests full allowance of all pending claims. If there are any matters that can be discussed by telephone to further the prosecution of the Application, the Applicants invite the Examiner to contact the undersigned at 512-345-9767 at the Examiner's convenience.

Respectfully Submitted,

/David O. Simmons/

This Acknowledgement Receipt evidences receipt on the noted date by the USPTO of the indicated documents, characterized by the applicant, and including page counts, where applicable. It serves as evidence of receipt similar to a Post Card, as described in MPEP 503.

**New Applications Under 35 U.S.C. 111**

If a new application is being filed and the application includes the necessary components for a filing date (see 37 CFR 1.53(b)-(d) and MPEP 506), a Filing Receipt (37 CFR 1.54) will be issued in due course and the date shown on this Acknowledgement Receipt will establish the filing date of the application.

**National Stage of an International Application under 35 U.S.C. 371**

If a timely submission to enter the national stage of an international application is compliant with the conditions of 35 U.S.C. 371 and other applicable requirements a Form PCT/DO/EO/903 indicating acceptance of the application as a national stage submission under 35 U.S.C. 371 will be issued in addition to the Filing Receipt, in due course.

**New International Application Filed with the USPTO as a Receiving Office**

If a new international application is being filed and the international application includes the necessary components for an international filing date (see PCT Article 11 and MPEP 1810), a Notification of the International Application Number and of the International Filing Date (Form PCT/RO/105) will be issued in due course, subject to prescriptions concerning national security, and the date shown on this Acknowledgement Receipt will establish the international filing date of the application.

Under the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number.

The "Highest Number Previously Paid For" (Total or Independent) is the highest number found in the appropriate box in column 1.</p>						

LIE  
/MARCIA GORDON/

This collection of information is required by 37 CFR 1.16. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.14. This collection is estimated to take 12 minutes to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. **SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.**

If you need assistance in completing the form, call 1-800-PTO-9199 and select option 2.

DATE MAILED: 10/28/2014

Table with 5 columns: APPLICATION NO., FILING DATE, FIRST NAMED INVENTOR, ATTORNEY DOCKET NO., CONFIRMATION NO.

13/856,392 04/03/2013 Ryan Hardin 0075652.00002 7722

TITLE OF INVENTION: EXCLUSIVE DELIVERY OF CONTENT WITHIN GEOGRAPHIC AREAS

Table with 7 columns: APPLN. TYPE, ENTITY STATUS, ISSUE FEE DUE, PUBLICATION FEE DUE, PREV. PAID ISSUE FEE, TOTAL FEE(S) DUE, DATE DUE

nonprovisional MICRO \$240 \$0 \$0 \$240 01/28/2015

THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. PROSECUTION ON THE MERITS IS CLOSED. THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. THIS STATUTORY PERIOD CANNOT BE EXTENDED. SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

HOW TO REPLY TO THIS NOTICE:

I. Review the ENTITY STATUS shown above. If the ENTITY STATUS is shown as SMALL or MICRO, verify whether entitlement to that entity status still applies.

If the ENTITY STATUS is the same as shown above, pay the TOTAL FEE(S) DUE shown above.

If the ENTITY STATUS is changed from that shown above, on PART B - FEE(S) TRANSMITTAL, complete section number 5 titled "Change in Entity Status (from status indicated above)".

For purposes of this notice, small entity fees are 1/2 the amount of undiscounted fees, and micro entity fees are 1/2 the amount of small entity fees.

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

IMPORTANT REMINDER: Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.

**PART B - FEE(S) TRANSMITTAL**

**Complete and send this form, together with applicable fee(s), to: Mail Mail Stop ISSUE FEE  
 Commissioner for Patents  
 P.O. Box 1450  
 Alexandria, Virginia 22313-1450  
 or Fax (571)-273-2885**

**INSTRUCTIONS:** This form should be used for transmitting the ISSUE FEE and PUBLICATION FEE (if required). Blocks 1 through 5 should be completed where appropriate. All further correspondence including the Patent, advance orders and notification of maintenance fees will be mailed to the current correspondence address as indicated unless corrected below or directed otherwise in Block 1, by (a) specifying a new correspondence address; and/or (b) indicating a separate "FEE ADDRESS" for maintenance fee notifications.

CURRENT CORRESPONDENCE ADDRESS (Note: Use Block 1 for any change of address)

41468                      7590                      10/28/2014  
**IVC Patent Agency**  
 7637 PARKVIEW CIRCLE  
 AUSTIN, TX 78731

Note: A certificate of mailing can only be used for domestic mailings of the Fee(s) Transmittal. This certificate cannot be used for any other accompanying papers. Each additional paper, such as an assignment or formal drawing, must have its own certificate of mailing or transmission.

**Certificate of Mailing or Transmission**

I hereby certify that this Fee(s) Transmittal is being deposited with the United States Postal Service with sufficient postage for first class mail in an envelope addressed to the Mail Stop ISSUE FEE address above, or being facsimile transmitted to the USPTO (571) 273-2885, on the date indicated below.

5. **Change in Entity Status** (from status indicated above)

Applicant certifying micro entity status. See 37 CFR 1.29

Applicant asserting small entity status. See 37 CFR 1.27

Applicant changing to regular undiscounted fee status.

**NOTE:** Absent a valid certification of Micro Entity Status (see forms PTO/SB/15A and 15B), issue fee payment in the micro entity amount will not be accepted at the risk of application abandonment.

**NOTE:** If the application was previously under micro entity status, checking this box will be taken to be a notification of loss of entitlement to micro entity status.

**NOTE:** Checking this box will be taken to be a notification of loss of entitlement to small or micro entity status, as applicable.

**NOTE:** This form must be signed in accordance with 37 CFR 1.31 and 1.33. See 37 CFR 1.4 for signature requirements and certifications.

DATE MAILED: 10/28/2014

Determination of Patent Term Adjustment under 35 U.S.C. 154 (b)
(Applications filed on or after May 29, 2000)

The Office has discontinued providing a Patent Term Adjustment (PTA) calculation with the Notice of Allowance.

Section 1(h)(2) of the AIA Technical Corrections Act amended 35 U.S.C. 154(b)(3)(B)(i) to eliminate the requirement that the Office provide a patent term adjustment determination with the notice of allowance. See Revisions to Patent Term Adjustment, 78 Fed. Reg. 19416, 19417 (Apr. 1, 2013). Therefore, the Office is no longer providing an initial patent term adjustment determination with the notice of allowance. The Office will continue to provide a patent term adjustment determination with the Issue Notification Letter that is mailed to applicant approximately three weeks prior to the issue date of the patent, and will include the patent term adjustment on the patent. Any request for reconsideration of the patent term adjustment determination (or reinstatement of patent term adjustment) should follow the process outlined in 37 CFR 1.705.

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (571)-272-7702. Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at 1-(888)-786-0101 or (571)-272-4200.

## OMB Clearance and PRA Burden Statement for PTOL-85 Part B

The Paperwork Reduction Act (PRA) of 1995 requires Federal agencies to obtain Office of Management and Budget approval before requesting most types of information from the public. When OMB approves an agency request to collect information from the public, OMB (i) provides a valid OMB Control Number and expiration date for the agency to display on the instrument that will be used to collect the information and (ii) requires the agency to inform the public about the OMB Control Number's legal significance in accordance with 5 CFR 1320.5(b).

The information collected by PTOL-85 Part B is required by 37 CFR 1.311. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.14. This collection is estimated to take 12 minutes to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, Virginia 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, Virginia 22313-1450. Under the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number.

### Privacy Act Statement

**The Privacy Act of 1974 (P.L. 93-579)** requires that you be given certain information in connection with your submission of the attached form related to a patent application or patent. Accordingly, pursuant to the requirements of the Act, please be advised that: (1) the general authority for the collection of this information is 35 U.S.C. 2(b)(2); (2) furnishing of the information solicited is voluntary; and (3) the principal purpose for which the information is used by the U.S. Patent and Trademark Office is to process and/or examine your submission related to a patent application or patent. If you do not furnish the requested information, the U.S. Patent and Trademark Office may not be able to process and/or examine your submission, which may result in termination of proceedings or abandonment of the application or expiration of the patent.

The information provided by you in this form will be subject to the following routine uses:

1. The information on this form will be treated confidentially to the extent allowed under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C. 552a). Records from this system of records may be disclosed to the Department of Justice to determine whether disclosure of these records is required by the Freedom of Information Act.
2. A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.
3. A record in this system of records may be disclosed, as a routine use, to a Member of Congress submitting a request involving an individual, to whom the record pertains, when the individual has requested assistance from the Member with respect to the subject matter of the record.
4. A record in this system of records may be disclosed, as a routine use, to a contractor of the Agency having need for the information in order to perform a contract. Recipients of information shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).
5. A record related to an International Application filed under the Patent Cooperation Treaty in this system of records may be disclosed, as a routine use, to the International Bureau of the World Intellectual Property Organization, pursuant to the Patent Cooperation Treaty.
6. A record in this system of records may be disclosed, as a routine use, to another federal agency for purposes of National Security review (35 U.S.C. 181) and for review pursuant to the Atomic Energy Act (42 U.S.C. 218(c)).
7. A record from this system of records may be disclosed, as a routine use, to the Administrator, General Services, or his/her designee, during an inspection of records conducted by GSA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with the GSA regulations governing inspection of records for this purpose, and any other relevant (i.e., GSA or Commerce) directive. Such disclosure shall not be used to make determinations about individuals.
8. A record from this system of records may be disclosed, as a routine use, to the public after either publication of the application pursuant to 35 U.S.C. 122(b) or issuance of a patent pursuant to 35 U.S.C. 151. Further, a record may be disclosed, subject to the limitations of 37 CFR 1.14, as a routine use, to the public if the record was filed in an application which became abandoned or in which the proceedings were terminated and which application is referenced by either a published application, an application open to public inspection or an issued patent.
9. A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local law enforcement agency, if the USPTO becomes aware of a violation or potential violation of law or regulation.

<b>Notice of Allowability</b>	<b>Application No.</b> 13/856,392	<b>Applicant(s)</b> HARDIN ET AL.	
	<b>Examiner</b> BENJAMIN MORALES	<b>Art Unit</b> 2624	<b>AIA (First Inventor to File) Status</b> No

**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address--**

All claims being allowable, PROSECUTION ON THE MERITS IS (OR REMAINS) CLOSED in this application. If not included herewith (or previously mailed), a Notice of Allowance (PTOL-85) or other appropriate communication will be mailed in due course. **THIS NOTICE OF ALLOWABILITY IS NOT A GRANT OF PATENT RIGHTS.** This application is subject to withdrawal from issue at the initiative of the Office or upon petition by the applicant. See 37 CFR 1.313 and MPEP 1308.

1.  This communication is responsive to 10/07/2014.  
 A declaration(s)/affidavit(s) under **37 CFR 1.130(b)** was/were filed on \_\_\_\_\_.
2.  An election was made by the applicant in response to a restriction requirement set forth during the interview on \_\_\_\_\_; the restriction requirement and election have been incorporated into this action.
3.  The allowed claim(s) is/are 1-20. As a result of the allowed claim(s), you may be eligible to benefit from the **Patent Prosecution Highway** program at a participating intellectual property office for the corresponding application. For more information, please see [http://www.uspto.gov/patents/init\\_events/pph/index.jsp](http://www.uspto.gov/patents/init_events/pph/index.jsp) or send an inquiry to [PPHfeedback@uspto.gov](mailto:PPHfeedback@uspto.gov).
4.  Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).

**Certified copies:**

- a)  All    b)  Some    \*c)  None of the:
1.  Certified copies of the priority documents have been received.
  2.  Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  3.  Copies of the certified copies of the priority documents have been received in this national stage application from the International Bureau (PCT Rule 17.2(a)).

\* Certified copies not received: \_\_\_\_\_.

Applicant has THREE MONTHS FROM THE "MAILING DATE" of this communication to file a reply complying with the requirements noted below. Failure to timely comply will result in ABANDONMENT of this application.

**THIS THREE-MONTH PERIOD IS NOT EXTENDABLE.**

5.  CORRECTED DRAWINGS ( as "replacement sheets") must be submitted.  
 including changes required by the attached Examiner's Amendment / Comment or in the Office action of Paper No./Mail Date \_\_\_\_\_.  
**Identifying indicia such as the application number (see 37 CFR 1.84(c)) should be written on the drawings in the front (not the back) of each sheet. Replacement sheet(s) should be labeled as such in the header according to 37 CFR 1.121(d).**
6.  DEPOSIT OF and/or INFORMATION about the deposit of BIOLOGICAL MATERIAL must be submitted. Note the attached Examiner's comment regarding REQUIREMENT FOR THE DEPOSIT OF BIOLOGICAL MATERIAL.

/BENJAMIN MORALES/  
Examiner, Art Unit 2624

/KENT CHANG/  
Supervisory Patent Examiner, Art Unit 2624

### DETAILED ACTION

1. The present application is being examined under the pre-AIA first to invent provisions.

### *Terminal Disclaimer*

2. The terminal disclaimer filed on 10/07/2014 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of 8433296 has been reviewed and is accepted. The terminal disclaimer has been recorded.

### *Allowable Subject Matter*

3. Claims 1-20 are allowed.

### Reasons For Allowance

4. The following is an examiner's statement of reasons for allowance: The claims are allowable over the prior art on record because none of the references in record either alone inherently or in combination discloses or renders obvious the combination of elements as claimed (Emphasis added) : A method comprising: **registering a plurality of application programs for use with a content delivery platform**, wherein the plurality of registered application programs are each associated for use with a navigation system; **establishing a plurality of perimeters defining a plurality of**

**geographic areas**; receiving, from the one or more of the registered application programs, at least one request to **obtain an interest in a designated geographic area**; **determining if the interest in the designated geographic area is to be provided to at least one of the one or more registered application programs**; in response to determining that the interest in the designated geographic area is to be provided to at least one of the one or more registered application programs, reserving content delivery to one or more of the registered application programs to being from one or more sponsors after it is determined that an object of interest has entered the designated geographic area; **receiving, from the one or more sponsors, content to be delivered to at least one of the one or more registered application programs in response to said reserving**; and providing, after it is determined that the object of interest has entered the designated geographic area, at least a portion of the content selected from the one or more sponsors to at least one of the one or more registered application programs.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to BENJAMIN MORALES whose telephone number is (571)270-5797. The examiner can normally be reached on 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kent Chang can be reached on (571) 272-7667. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.

In re Application of: Ryan Hardin et al. : By the Examiner: Benjamin Morales  
Fenandez

Serial No.: 13/856,392 : Group Art Unit: 2624

Filed: April 3, 2013 :

Title: **EXCLUSIVE DELIVERY OF CONTENT WITHIN GEOGRAPHIC  
AREAS**

EFS-Web  
Commissioner for Patents  
P.O. Box 1450  
Alexandria, VA 22313-1450

Examiner Fernandez:

This is a response to an Office Actions mailed September 11, 2014 mailed by the United States Patent And Trademark Office (the Office). The Applicants request reconsideration of the above-identified application in view of the remarks presented herein.

**Amendment of the Claims** begin on page 2 of this correspondence;

**Remarks** begin on page 10 of this correspondence; and

**Conclusions** begin on page 12 of this correspondence.

Serial No.: 13/856,392  
Examiner: Benjamin Morales Fernandez

**IN THE UNITED STATES PATENT AND TRADEMARK OFFICE**

In re Application of: Ryan Hardin et al. : By the Examiner: Benjamin Morales  
Fernandez

Serial No.: 13/856,392 : Group Art Unit: 2624

Filed: April 3, 2013 : Atty. Docket No.: 0075652.00002

Title: **EXCLUSIVE DELIVERY OF CONTENT WITHIN GEOGRAPHIC  
AREAS**

EFS-Web  
Commissioner for Patents  
P.O. Box 1450  
Alexandria, VA 22313-1450

**AMENDMENT UNDER 37 CFR 1.312**

Examiner Fernandez:

This is an amendment filed under 37 CFR 1.312 in view of the Notice of Allowance mailed on October 28, 2014 by the United States Patent And Trademark Office (the Office). The above-identified applicants (the Applicants) request that amendment of the claims, as presented below, be entered in this case.

**Amendment in the Claims** begin on page 2 of this correspondence;

**Remarks** begin on page 12 of this correspondence; and

**Conclusions** begin on page 16 of this correspondence.

(0075652.00002)  
Page 1

**AMENDMENT IN THE CLAIMS**

Please amend the claims as follows. This listing of the claims will replace all prior versions, and listings, of the claims in the Application.

1. (currently amended) A method comprising:
  - registering a plurality of application programs for use with a content delivery platform, ~~wherein the plurality of registered application programs are each associated for use with a navigation system;~~
  - establishing a plurality of perimeters defining a plurality of geographic areas;
  - receiving, from at least a particular one of the ~~one or more of the~~ registered application programs, ~~at least one~~ request to obtain an interest in a designated geographic area;
  - determining if the interest in the designated geographic area is to be provided to at least the particular one of the ~~one or more~~ registered application programs;
  - in response to determining that the interest in the designated geographic area is to be provided to at least the particular one of the ~~one or more~~ registered application programs, reserving content delivery to at least the particular one of the ~~one or more of the~~ registered application programs to being from one or more sponsors after it is determined that an object of interest has entered the designated geographic area;
  - receiving, from the one or more sponsors, content to be delivered to at least one of the ~~one or more~~ registered application programs in response to said reserving;
  - and
  - providing, after it is determined that the object of interest has entered the designated geographic area, at least a portion of the content ~~selected~~ received

(0075652.00002)

Page 2

from the one or more sponsors to at least the particular one of the ~~one or more~~ registered application programs.

2. (currently amended) The method of claim 1 wherein:

receiving the ~~at least one~~ request to obtain the interest in the designated geographic area includes receiving sponsor established perimeter definitions; and  
the sponsor established perimeter definitions at least partially define the designated geographic area.

3. (currently amended) The method of claim 1 wherein:

receiving the ~~at least one~~ request to obtain the interest in the designated geographic area includes receiving a first request from a first one of the registered application programs and receiving a second request from a second one of the registered application programs;  
reserving content delivery to at least the particular one of the ~~one or more~~ registered application programs includes restricting content delivery delivered to one or more registered application programs to being to from the first one of the registered application programs during a first period of time and to being to from the second one of the registered application programs during a second period of time;  
receiving content to be delivered to at least the one of the ~~one or more~~ registered application programs includes receiving content from at the first sponsor and receiving content from at the second sponsor; and  
providing the at least a portion of the content to at least the particular one of the ~~one or more~~ registered application programs includes providing at least a portion of the content received from the first sponsor to the first one of the ~~one or more of the~~ registered application programs during the first period of time and providing at least a portion of the content received from the second

(0075652.00002)

Page 3

sponsor to the second one of the ~~one or more~~ of the registered application programs during the second period of time.

4. (currently amended) The method of claim 1 wherein the one or more sponsors is at least one of the ~~one or more~~ registered application programs.
  
5. (currently amended) The method of claim 1, further comprising:  
providing at least the particular one of the ~~one or more~~ sponsors registered application programs a response to the request in response to determining that the interest in the designated geographic area is to be provided to at least the particular one of the ~~one or more~~ registered application programs; and  
storing a record of the interest in the designated geographic area in response to determining that the interest in the designated geographic area is to be provided to at least the particular one of the ~~one or more~~ registered application programs.
  
6. (currently amended) The method of claim ~~[[5]]~~2 wherein the one or more sponsors is at least one of the ~~one or more~~ registered application programs.
  
7. (currently amended) The method of claim 6 ~~wherein, further comprising:~~  
~~receiving the at least one request to obtain the interest in the designated geographic area includes receiving sponsor established perimeter definitions;~~  
~~and~~  
~~the sponsor established perimeter definitions at least partially define the designated geographic area~~  
providing at least the particular one of the registered application programs a response to the request in response to determining that the interest in the

designated geographic area is to be provided to at least the particular one of the registered application programs; and  
storing a record of the interest in the designated geographic area in response to determining that the interest in the designated geographic area is to be provided to at least the particular one of the registered application programs.

8. (currently amended) A system comprising:

memory;

a communications interface operably coupled to the memory; and

at least one processor operably coupled to the memory and the communications interface, the processor configured to execute a program of instructions, the program of instructions comprising:

at least one instruction for registering a plurality of application programs for use with a content delivery platform, ~~wherein the plurality of registered application programs are each associated for use with a navigation system;~~

at least one instruction for establishing a plurality of perimeters defining a plurality of geographic areas;

at least one instruction for receiving, from at least a particular one of the one or more of the registered application programs, ~~at least one~~ request to obtain an interest in a designated geographic area;

at least one instruction for determining if the interest in the designated geographic area is to be provided to at least the particular one of the one or more registered application programs;

at least one instruction for reserving content delivery to at least the particular one of the one or more of the registered application programs to being from one or more sponsors after it is determined that an object of interest has entered the designated geographic area in response to determining that the interest in the designated geographic area is to be provided to at least the particular one of the one or more registered application programs;

(0075652.00002)

Page 5

at least one instruction for receiving, from the one or more sponsors, content to be delivered to at least one of the ~~one or more~~ registered application programs in response to said reserving; and  
at least one instruction for providing at least a portion of the content ~~selected~~ received from the one or more sponsors to ~~[[ ]]~~ at least the particular one of the ~~one or more~~ registered application programs after it is determined that the object of interest has entered the designated geographic area.

9. (currently amended) The system of claim 8 wherein:

receiving the ~~at least one~~ request to obtain the interest in the designated geographic area includes receiving sponsor established perimeter definitions; and  
the sponsor established perimeter definitions at least partially define the designated geographic area.

10. (currently amended) The system of claim 8 wherein:

receiving the ~~at least one~~ request to obtain the interest in the designated geographic area includes receiving a first request from a first one of the registered application programs and receiving a second request from a second one of the registered application programs;  
reserving content delivery to at least the particular one of the ~~one or more~~ registered application programs includes restricting content ~~delivery delivered to one or more registered application programs to being to from~~ being to from the first one of the registered application programs during a first period of time and to being to from the second one of the registered application programs during a second period of time;

(0075652.00002)

Page 6

receiving content to be delivered to at least the one of the ~~one or more~~ registered application programs includes receiving content from at the first sponsor and receiving content from at the second sponsor; and providing the at least a portion of the content to at least the particular one of the ~~one or more~~ registered application programs includes providing at least a portion of the content received from the first sponsor to the first one of the ~~one or more of the~~ registered application programs during the first period of time and providing at least a portion of the content received from the second sponsor to the second one of the ~~one or more of the~~ registered application programs during the second period of time.

11. (currently amended) The system of claim 8 wherein the one or more sponsors is at least one of the registered application programs.

12. (currently amended) The system of claim 8 wherein the program of instructions further comprises:

at least one instruction for providing at least the particular one of the ~~one or more sponsors registered application programs~~ a response to the request in response to determining that the interest in the designated geographic area is to be provided to at least the particular one of the ~~one or more~~ registered application programs; and

at least one instruction for storing a record of the interest in the designated geographic area in response to determining that the interest in the designated geographic area is to be provided to at least the particular one of the ~~one or more~~ registered application programs.

13. (currently amended) The system of claim [[12]]9 wherein the one or more sponsors is at least one of the ~~one or more~~ registered application programs.

(0075652.00002)

Page 7

14. (currently amended) The system of claim 13 wherein the program of instructions further comprises:

~~receiving the at least one request to obtain the interest in the designated geographic area includes receiving sponsor established perimeter definitions; and~~  
~~the sponsor established perimeter definitions at least partially define the designated geographic area~~  
at least one instruction for providing at least the particular one of the registered application programs a response to the request in response to determining that the interest in the designated geographic area is to be provided to at least the particular one of the registered application programs; and  
at least one instruction for storing a record of the interest in the designated geographic area in response to determining that the interest in the designated geographic area is to be provided to at least the particular one of the registered application programs.

15. (currently amended) A non-transitory computer readable medium tangibly embodying a program of computer executable instructions, the program of instructions comprising:

~~at least one instruction for registering a plurality of application programs for use with a content delivery platform, wherein the plurality of registered application programs are each associated for use with a navigation system;~~  
at least one instruction for establishing a plurality of perimeters defining a plurality of geographic areas;  
at least one instruction for receiving, from at least a particular one of the one or more of the registered application programs, ~~at least one~~ request to obtain an interest in a designated geographic area;  
at least one instruction for determining if the interest in the designated geographic area is to be provided to at least the particular one of the one or more registered application programs;

(0075652.00002)

Page 8

at least one instruction for reserving content delivery to at least the particular one of the ~~one or more~~ of the registered application programs to being from one or more sponsors after it is determined that an object of interest has entered the designated geographic area in response to determining that the interest in the designated geographic area is to be provided to at least the particular one of the ~~one or more~~ registered application programs;

at least one instruction for receiving, from the one or more sponsors, content to be delivered to at least one of the ~~one or more~~ registered application programs in response to said reserving; and

at least one instruction for providing at least a portion of the content ~~selected~~ received from the one or more sponsors to  at least the particular one of the ~~one or more~~ registered application programs after it is determined that the object of interest has entered the designated geographic area.

16. (currently amended) The non-transitory computer readable medium of claim 15 wherein: receiving the ~~at least one~~ request to obtain the interest in the designated geographic area includes receiving sponsor established perimeter definitions; and

the sponsor established perimeter definitions at least partially define the designated geographic area.

17. (currently amended) The non-transitory computer readable medium of claim 15 wherein: receiving the ~~at least one~~ request to obtain the interest in the designated geographic area includes receiving a first request from a first one of the registered application programs and receiving a second request from a second one of the registered application programs;

reserving content delivery to at least the particular one of the ~~one or more~~ registered application programs includes restricting content delivery delivered

(0075652.00002)

~~to one or more registered application programs to being to from~~ the first one of the registered application programs during a first period of time and to ~~being to from~~ the second one of the registered application programs during a second period of time;  
receiving content to be delivered to at least the one of the ~~one or more~~ registered application programs includes receiving content from ~~at the~~ first sponsor and receiving content from ~~at the~~ second sponsor; and  
providing the at least a portion of the content to at least the particular one of the ~~one or more~~ registered application programs includes providing at least a portion of the content received from the first sponsor to the first one of the ~~one or more of the~~ registered application programs during the first period of time and providing at least a portion of the content received from the second sponsor to the second one of the ~~one or more of the~~ registered application programs during the second period of time.

18. (currently amended) The non-transitory computer readable medium of claim 15 wherein the one or more sponsors is at least one of the ~~one or more~~ registered application programs.

19. (currently amended) The non-transitory computer readable medium of claim 15[[,]] wherein the program of instructions further comprises:

at least one instruction for providing at least the particular one of the ~~one or more sponsors registered application programs~~ a response to the request in response to determining that the interest in the designated ~~one or more of the plurality of~~ geographic area[[s]] is to be provided to at least the particular one of the ~~one or more~~ registered application programs; and  
at least one instruction for storing a record of the interest in the designated geographic area in response to determining that the interest in the designated

geographic area is to be provided to at least the particular one of the ~~one or more~~ registered application programs.

20. (currently amended) The non-transitory computer readable medium of claim ~~[[19]]~~18 wherein:

receiving the ~~at least one~~ request to obtain the interest in the designated geographic area includes receiving sponsor established perimeter definitions;  
and  
the sponsor established perimeter definitions at least partially define the designated geographic area.

**REMARKS**

The Notice of Allowance in this matter was mailed on October 28, 2014. After review of the allowed claims of record, it was noticed that there were various antecedent basis inconsistencies and/or typographical errors in certain claims. Appropriate correction of these various antecedent basis inconsistencies and/or typographical errors has been made herein through amendment thereof. Furthermore, in view of the Reasons for Allowance presented by the Examiner in the Notice of Allowance, amendments have been made to certain claims, but which the Applicant submits do not contradict with the stated reasons for allowance.

Claims 1, 3-5, 8, 10, 12, 13, 15, and 17-19 have each been amended to recite “~~one or more~~ registered application programs”. Independent claims 1, 8, and 15 each recite “registering a plurality of application programs”, which provides proper antecedent basis for “registered application programs”. To maintain proper antecedent basis throughout the claims, the limitation of recited language of “one or more” with respect to registered application programs has been deleted.

Independent claims 1, 8, and 15 have each been amended to recite “at least a particular one of the registered application programs” at the first instance of “the registered application programs”. Corresponding amendments (i.e., “at least the particular one of the registered application programs”) have been made in dependent claims 3, 5, 10, 12, 17, and 19. This amended language provides clarity in view of the above-mentioned amendments made for

(0075652.00002)

Page 12

antecedent basis reason with respect to the recited limitation of “the registered application programs”.

Independent claims 1, 8, and 15 have each been amended to recite “content ~~selected~~received from”. This amended language provides proper antecedent basis with respect to the previously recited limitation of receiving content.

Independent claims 1, 8, and 15 have each been amended to recite “~~at least one~~ request” at the first instance of “the registered application programs”. Corresponding amendments have been made in dependent claims 2, 3, 9, 10, 16, 17, and 20. This amended language maintains proper antecedent basis with respect to the recited language of “the request” in claims 5, 12, and 19.

Dependent claims 3, 10, and 17 have each been amended to recite “restricting content delivery delivered to one or more registered application programs to being to from the first one of the registered application programs during a first period of time and to being to from the second one of the registered application programs during a second period of time... providing at least a portion of the content received from the first sponsor to the first one of the one or more of ~~the~~ registered application programs during the first period of time and providing at least a portion of the content received from the second sponsor to the second one of the one or more of the registered application programs during the second period of time.” This amended language provides proper antecedent basis and clarity with respect to the previously recited limitation of

receiving content in independent claims 1, 8, and 15, respectively, and finds express support at paragraph 0029 of the as-filed application.

Dependent claims 5, 12, and 19 have each been amended to recite “providing at least the particular one of the ~~one or more sponsors~~ registered application programs a response to the request.” This amended language provides proper antecedent basis and clarity with respect to the previously recited limitation of receiving a request in independent claims 1, 8, and 15, respectively, and finds express support at paragraph 0061 of the as-filed application.

Dependent claims 7 and 14 have each been amended to recite “providing at least the particular one of the registered application programs a response to the request in response to determining that the interest in the designated geographic area is to be provided to at least the particular one of the registered application programs; and storing a record of the interest in the designated geographic area in response to determining that the interest in the designated geographic area is to be provided to at least the particular one of the registered application programs” This amended language is the same claim language as also recited at previously allowed dependent claims 5, 12, and 19.

Dependent claim 19 has been amended to recite “the designated ~~one or more of the plurality of~~ geographic area[[s]]”, which provides for proper antecedent basis to “a designated geographic area” in corresponding independent claim 15.

Independent claims 1, 8, and 15 have each been amended to cancel the limitation of “wherein the plurality of registered application programs are each associated for use with a navigation system”, which is not a distinguishing limitation necessary for patentability.

**CONCLUSIONS**

If there are any matters that can be discussed by telephone to further the prosecution of the Application, the Applicants invite the Examiner to contact the undersigned at 512-345-9767 at the Examiner's convenience.

Respectfully submitted,

By: /David O. Simmons/  
David O. Simmons

### Warnings:

### Information:

This Acknowledgement Receipt evidences receipt on the noted date by the USPTO of the indicated documents, characterized by the applicant, and including page counts, where applicable. It serves as evidence of receipt similar to a Post Card, as described in MPEP 503.

**New Applications Under 35 U.S.C. 111**

If a new application is being filed and the application includes the necessary components for a filing date (see 37 CFR 1.53(b)-(d) and MPEP 506), a Filing Receipt (37 CFR 1.54) will be issued in due course and the date shown on this Acknowledgement Receipt will establish the filing date of the application.

**National Stage of an International Application under 35 U.S.C. 371**

If a timely submission to enter the national stage of an international application is compliant with the conditions of 35 U.S.C. 371 and other applicable requirements a Form PCT/DO/EO/903 indicating acceptance of the application as a national stage submission under 35 U.S.C. 371 will be issued in addition to the Filing Receipt, in due course.

**New International Application Filed with the USPTO as a Receiving Office**

If a new international application is being filed and the international application includes the necessary components for an international filing date (see PCT Article 11 and MPEP 1810), a Notification of the International Application Number and of the International Filing Date (Form PCT/RO/105) will be issued in due course, subject to prescriptions concerning national security, and the date shown on this Acknowledgement Receipt will establish the international filing date of the application.

**PART B - FEE(S) TRANSMITTAL**

Complete and send this form, together with applicable fee(s), to: **Mail Stop ISSUE FEE  
Commissioner for Patents  
P.O. Box 1450  
Alexandria, Virginia 22313-1450**  
or **Fax (571)-273-2885**

**INSTRUCTIONS:** This form should be used for transmitting the ISSUE FEE and PUBLICATION FEE (if required). Blocks 1 through 5 should be completed where appropriate. All further correspondence including the Patent, advance orders and notification of maintenance fees will be mailed to the current correspondence address as indicated unless corrected below or directed otherwise in Block 1, by (a) specifying a new correspondence address; and/or (b) indicating a separate "FEE ADDRESS" for maintenance fee notifications.

CURRENT CORRESPONDENCE ADDRESS (Note: Use Block 1 for any change of address)

41468 7590 10/28/2014  
IVC Patent Agency  
7637 PARKVIEW CIRCLE  
AUSTIN, TX 78731

Note: A certificate of mailing can only be used for domestic mailings of the Fee(s) Transmittal. This certificate cannot be used for any other accompanying papers. Each additional paper, such as an assignment or formal drawing, must have its own certificate of mailing or transmission.

**Certificate of Mailing or Transmission**  
I hereby certify that this Fee(s) Transmittal is being deposited with the United States Postal Service with sufficient postage for first class mail in an envelope addressed to the Mail Stop ISSUE FEE address above, or being facsimile transmitted to the USPTO (571) 273-2885, on the date indicated below.

1. Change of correspondence address or indication of "Fee Address" (37 CFR 1.363).

Change of correspondence address (or Change of Correspondence Address form PTO/SB/122) attached.

"Fee Address" indication (or "Fee Address" Indication form PTO/SB/17; Rev 03-02 or more recent) attached. **Use of a Customer Number is required.**

2. For printing on the patent front page, list

(1) The names of up to 3 registered patent attorneys or agents OR, alternatively,

(2) The name of a single firm (having as a member a registered attorney or agent) and the names of up to 2 registered patent attorneys or agents. If no name is listed, no name will be printed.

1. *David O. Simmons*

2. \_\_\_\_\_

3. \_\_\_\_\_

3. ASSIGNEE NAME AND RESIDENCE DATA TO BE PRINTED ON THE PATENT (print or type)

PLEASE NOTE: Unless an assignee is identified below, no assignee data will appear on the patent. If an assignee is identified below, the document has been filed for recordation as set forth in 37 CFR 3.11. Completion of this form is NOT a substitute for filing an assignment.

(A) NAME OF ASSIGNEE: \_\_\_\_\_ (B) RESIDENCE: (CITY and STATE OR COUNTRY) \_\_\_\_\_

Please check the appropriate assignee category or categories (will not be printed on the patent):  Individual  Corporation or other private group entity  Government

4a. The following fee(s) are submitted:

Issue Fee

Publication Fee (No small entity discount permitted)

Advance Order - # of Copies \_\_\_\_\_

4b. Payment of Fee(s): (Please first reapply any previously paid issue fee shown above)

A check is enclosed.

Payment by credit card. Form PTO-2038 is attached.

The Director is hereby authorized to charge the required fee(s), any deficiency, or credits any overpayment, to Deposit Account Number \_\_\_\_\_ (enclose an extra copy of this form).

5. Change in Entity Status (from status indicated above)

Applicant certifying micro entity status. See 37 CFR 1.29

Applicant asserting small entity status. See 37 CFR 1.27

Applicant changing to regular undiscounted fee status.

NOTE: Absent a valid certification of Micro Entity Status (see forms PTO/SB/15A and 15B), issue fee payment in the micro entity amount will not be accepted at the risk of application abandonment.

NOTE: If the application was previously under micro entity status, checking this box will be taken to be a notification of loss of entitlement to micro entity status.

NOTE: Checking this box will be taken to be a notification of loss of entitlement to small or micro entity status, as applicable.

NOTE: This form must be signed in accordance with 37 CFR 1.31 and 1.33. See 37 CFR 1.4 for signature requirements and certifications.

**ISSUE NOTIFICATION**

The projected patent number and issue date are specified above.

**Determination of Patent Term Adjustment under 35 U.S.C. 154 (b)**  
(application filed on or after May 29, 2000)

The Patent Term Adjustment is 0 day(s). Any patent to issue from the above-identified application will include an indication of the adjustment on the front page.

If a Continued Prosecution Application (CPA) was filed in the above-identified application, the filing date that determines Patent Term Adjustment is the filing date of the most recent CPA.

Applicant will be able to obtain more detailed information by accessing the Patent Application Information Retrieval (PAIR) WEB site (<http://pair.uspto.gov>).

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (571)-272-7702. Questions relating to issue and publication fee payments should be directed to the Application Assistance Unit (AAU) of the Office of Data Management (ODM) at (571)-272-4200.

APPLICANT(s) (Please see PAIR WEB site <http://pair.uspto.gov> for additional applicants):

Ryan Hardin, Houston, TX;  
Andrew Hill, Houston, TX;

The United States represents the largest, most dynamic marketplace in the world and is an unparalleled location for business investment, innovation, and commercialization of new technologies. The USA offers tremendous resources and advantages for those who invest and manufacture goods here. Through SelectUSA, our nation works to encourage and facilitate business investment. **REQUEST FOR CERTIFICATE OF CORRECTION UNDER 37 CFR 1.322**

This is a request for the Office to Issue a Certificate of Correction of Office Mistake under 37 CFR 1.322 for US patent no. 8977247 (“the subject patent”). Upon review of the subject patent, which issued from the above-noted application, several mistakes introduced by the Office were identified. These mistakes were not present in the document last filed by the Applicants, which was an Amendment under 37 CFR 1.312 filed on December 16, 2104 (“the 1.312 amendment”).

Following is a listing of these mistakes, along with reference to the corresponding passages of the Amendment under 37 CFR 1.312 filed on December 16, 2104.

Paragraph 13, line 56 (claim 1): insert -- a -- after “programs, ”. See line 7 of claim 1 on page 2 of the 1.131 Amendment.

Paragraph 14, line 25 (claim 3): delete "from" after “to being to”. See line 10 of claim 3 on page 3 of the 1.131 Amendment.

(0075652.00002)

Page 1

Paragraph 15, line 12 (claim 8): insert -- a -- after “programs, ”. See line 13 of claim 8 on page 5 of the 1.131 Amendment.

Paragraph 15, line 51(claim 10): insert -- to -- after “and to being ”. See line 10 of claim 10 on page 6 of the 1.131 Amendment.

Paragraph 16, line 17 (claim 14): after “wherein the program of”, delete “the”. See line 1 of claim 14 on page 8 of the 1.131 Amendment.

Paragraph 16, line 24 (claim 14): after “registered application programs”, replace “,” with -- ; --. See line 11 of claim 14 on page 8 of the 1.131 Amendment.

Paragraph 16, line 27 (claim 14), replace "geograpgic" with -- geographic --. See line 14 of claim 14 on page 8 of the 1.131 Amendment.

Paragraph 17, line 14 (claim 17), insert -- to -- after “and to being ”. See line 10 of claim 17 on page 9-10 of the 1.131 Amendment.

In view of the foregoing information, the Applicants request that the Office issue a Certificate of Correction of Office Mistake under 37 CFR 1.322.

Respectfully submitted,

By: /David O. Simmons/

### Information:

This Acknowledgement Receipt evidences receipt on the noted date by the USPTO of the indicated documents, characterized by the applicant, and including page counts, where applicable. It serves as evidence of receipt similar to a Post Card, as described in MPEP 503.

**New Applications Under 35 U.S.C. 111**

If a new application is being filed and the application includes the necessary components for a filing date (see 37 CFR 1.53(b)-(d) and MPEP 506), a Filing Receipt (37 CFR 1.54) will be issued in due course and the date shown on this Acknowledgement Receipt will establish the filing date of the application.

**National Stage of an International Application under 35 U.S.C. 371**

If a timely submission to enter the national stage of an international application is compliant with the conditions of 35 U.S.C. 371 and other applicable requirements a Form PCT/DO/EO/903 indicating acceptance of the application as a national stage submission under 35 U.S.C. 371 will be issued in addition to the Filing Receipt, in due course.

**New International Application Filed with the USPTO as a Receiving Office**

If a new international application is being filed and the international application includes the necessary components for an international filing date (see PCT Article 11 and MPEP 1810), a Notification of the International Application Number and of the International Filing Date (Form PCT/RO/105) will be issued in due course, subject to prescriptions concerning national security, and the date shown on this Acknowledgement Receipt will establish the international filing date of the application.

In re Application of: Ryan Hardin et al. : By the Examiner: Benjamin Morales  
Fernandez

Serial No.: 13/856,392 : Group Art Unit: 2624

Filed: April 3, 2013 : Atty. Docket No.: 0075652.00002

Title: **EXCLUSIVE DELIVERY OF CONTENT WITHIN GEOGRAPHIC  
AREAS**

EFS-Web  
Commissioner for Patents  
P.O. Box 1450  
Alexandria, VA 22313-1450

**CORRECTED**  
**REQUEST FOR CERTIFICATE OF CORRECTION UNDER 37 CFR 1.322**

This is a request for the Office to Issue a Certificate of Correction of Office Mistake under 37 CFR 1.322 for US patent no. 8977247 (“the subject patent”). Upon review of the subject patent, which issued from the above-noted application, several mistakes introduced by the Office were identified. These mistakes were not present in the document last filed by the Applicants, which was an Amendment under 37 CFR 1.312 filed on December 16, 2104 (“the 1.312 amendment”).

Following is a listing of these mistakes, along with reference to the corresponding passages of the Amendment under 37 CFR 1.312 filed on December 16, 2104.

Paragraph 13, line 56 (claim 1): insert -- a -- after “programs, ”. See line 7 of claim 1 on page 2 of the 1.312 Amendment.

Paragraph 14, line 25 (claim 3): delete "from" after “to being to”. See line 10 of claim 3 on page 3 of the 1.312 Amendment.

(0075652.00002)

Page 1

Paragraph 15, line 12 (claim 8): insert -- a -- after “programs, ”. See line 13 of claim 8 on page 5 of the 1.312 Amendment.

Paragraph 15, line 51(claim 10): insert -- to -- after “and to being ”. See line 10 of claim 10 on page 6 of the 1.312 Amendment.

Paragraph 16, line 17 (claim 14): after “wherein the program of”, delete “the”. See line 1 of claim 14 on page 8 of the 1.312 Amendment.

Paragraph 16, line 24 (claim 14): after “registered application programs”, replace “,” with -- ; --. See line 11 of claim 14 on page 8 of the 1.312 Amendment.

Paragraph 16, line 27 (claim 14), replace "geograpgic" with -- geographic --. See line 14 of claim 14 on page 8 of the 1.312 Amendment.

Paragraph 17, line 14 (claim 17), insert -- to -- after “and to being ”. See line 10 of claim 17 on page 9-10 of the 1.312 Amendment.

In view of the foregoing information, the Applicants request that the Office issue a Certificate of Correction of Office Mistake under 37 CFR 1.322.

## Privacy Act Statement

The **Privacy Act of 1974 (P.L. 93-579)** requires that you be given certain information in connection with your submission of the attached form related to a patent application or patent. Accordingly, pursuant to the requirements of the Act, please be advised that: (1) the general authority for the collection of this information is 35 U.S.C. 2(b)(2); (2) furnishing of the information solicited is voluntary; and (3) the principal purpose for which the information is used by the U.S. Patent and Trademark Office is to process and/or examine your submission related to a patent application or patent. If you do not furnish the requested information, the U.S. Patent and Trademark Office may not be able to process and/or examine your submission, which may result in termination of proceedings or abandonment of the application or expiration of the patent.

The information provided by you in this form will be subject to the following routine uses:

1. The information on this form will be treated confidentially to the extent allowed under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C. 552a). Records from this system of records may be disclosed to the Department of Justice to determine whether disclosure of these records is required by the Freedom of Information Act.
2. A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.
3. A record in this system of records may be disclosed, as a routine use, to a Member of Congress submitting a request involving an individual, to whom the record pertains, when the individual has requested assistance from the Member with respect to the subject matter of the record.
4. A record in this system of records may be disclosed, as a routine use, to a contractor of the Agency having need for the information in order to perform a contract. Recipients of information shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).
5. A record related to an International Application filed under the Patent Cooperation Treaty in this system of records may be disclosed, as a routine use, to the International Bureau of the World Intellectual Property Organization, pursuant to the Patent Cooperation Treaty.
6. A record in this system of records may be disclosed, as a routine use, to another federal agency for purposes of National Security review (35 U.S.C. 181) and for review pursuant to the Atomic Energy Act (42 U.S.C. 218(c)).
7. A record from this system of records may be disclosed, as a routine use, to the Administrator, General Services, or his/her designee, during an inspection of records conducted by GSA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with the GSA regulations governing inspection of records for this purpose, and any other relevant (*i.e.*, GSA or Commerce) directive. Such disclosure shall not be used to make determinations about individuals.
8. A record from this system of records may be disclosed, as a routine use, to the public after either publication of the application pursuant to 35 U.S.C. 122(b) or issuance of a patent pursuant to 35 U.S.C. 151. Further, a record may be disclosed, subject to the limitations of 37 CFR 1.14, as a routine use, to the public if the record was filed in an application which became abandoned or in which the proceedings were terminated and which application is referenced by either a published application, an application open to public inspection or an issued patent.
9. A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local law enforcement agency, if the USPTO becomes aware of a violation or potential violation of law or regulation.

Under the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number.
