(PTAB Sept. 15, 2023)..... 5

## I. INTRODUCTION

Zentian does not dispute the Petition’s combination teaches each of the claim elements. Nor does Zentian dispute the Petition’s level of skill for a POSITA or that Mr. Schmandt (Apple’s expert) qualifies as a POSITA. Zentian instead argues a lack of motivation to combine for various reasons that are either technically incorrect, overly generalized and not responsive to the Petition’s mapping, or are not supported by Federal Circuit caselaw.

## II. THE JIANG-CHEN COMBINATION RENDERS OBVIOUS CLAIMS 1(D) AND 1(E)

Zentian incorrectly argues the Petition and Declaration do not “explain how Jiang’s tree search engine 74 *modified in view of Chen* would operate to meet limitation 1(d) and 1(e).” (Paper 19, 29) (emphasis original). The Petition specifies “each of the one or more clusters in the modified *Jiang-Chen* circuit would have been configured by a POSITA to include a plurality of processors described by *Chen* performing the techniques described regarding the tree search engine 74 described by *Jiang*, **replicating the tree search engine’s functionality amongst each of the plurality of *Chen*’s processors.**” (Paper 1, 17-18 (emphasis added), 24 (the combination “**would have stored at least a portion of the acoustic model data** (HMM acoustic model from *Jiang*’s model memory 72) in the shared cluster memories 104a-d” of the *Chen* clusters), 30 (“*each* of the plurality of processors” of the *Chen* cluster “would have been utilized to perform the probability computations

# Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

## Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

## Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

## Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

## API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

## LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

## FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

## E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
