OFFICIAL REPORTER: SHAWN M. McROBERTS, RMR, CRR  
100 E. HOUSTON STREET  
MARSHALL, TEXAS 75670  
(903) 923-7464

1 he walked through a very long claim to prove that.

2 Our burden of proof is met by way more than the feather.  
3 We only need the feather, but we've gone well beyond that.  
4 They don't even dispute how our system works -- their system  
5 works.

6 Invalidity. Now, patents are presumed valid. We start  
7 with the premise that the Patent Office did its job. They had  
8 a technical person at the Patent Office review and have a lot  
9 of back and forth here.

10 I want to show you something. We saw these ribbon copies  
11 of the patent, but they only give this to you after they've  
12 done a whole review.

13 Now, the other side showed you one paragraph that the  
14 Patent Office had back and forth. But maybe you don't know  
15 this: When you send -- when you try to get a patent, they  
16 scrutinize it. And every time you go back and forth debating  
17 what the patent is and whether you really deserve it, there's  
18 a piece of paper that goes to the Patent Office. That one  
19 paragraph is in this 600-plus page stack of paper that  
20 represents all the back and forth that Bright Data went  
21 through to make sure that these patents were valid before they  
22 got them issued. And there's just as thick a stack for the  
23 '510.

24 So they did this process two times. In 2019, they went  
25 through a huge process at the Patent Office to make sure that

1 the patents were valid, and in 2020 they did it again. And  
2 the Patent Office agreed. That's why their burden is so much  
3 higher. It's really -- once that's happened, do you really  
4 want to second-guess the work that those people did?

5 You would need a firm belief or conviction or, as Your  
6 Honor said, an abiding belief or conviction, that this  
7 absolutely is not valid, that the Patent Office messed up  
8 twice. Somehow in the 1200 pages of communications, those  
9 patent examiners were clueless. And if you don't find that,  
10 you have to say no to invalidity in this case.

11 Lack of written description. They say you didn't  
12 describe this invention in 2009. We already showed you their  
13 documents describing the patent did say they were doing this  
14 routing technology. They knew about it. We just proved this  
15 to you.

16 Doctor Rhyne was trying to make it easy on you, and he  
17 said, look, anybody knows in this time period with this patent  
18 specification that you can put a client device in a proxy  
19 server in Figure 3. Okay? That's fair.

20 They questioned this. Well, would you really do this?  
21 Well, we also cited you text that says in the patent that you  
22 would put a proxy server between the client devices. And  
23 Doctor Freedman admitted that you would -- that, in fact, a  
24 client and an agent are actually the same kind of device in  
25 the system in Figure 3. He said that right on the stand.

# Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

## Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

## Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

## Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

## API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

## LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

## FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

## E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
