3D VISUALIZATION OF DICOM IMAGES FOR RADIOLOGICAL APPLICATIONS

Sonia Pujol, PhD, Harvard Medical School Surgical Planning Laboratory, Brigham and Women's Hospital

Kitt Shaffer, MD, PhD, Boston University Vice-Chairman for Education, Boston University School of Medicine

Ron Kikinis, MD, Harvard Medical School Surgical Planning Laboratory, Brigham and Women's Hospital

Medivis Exhibit 1007

3D Visualization of DICOM images for Radiological applications

Following this tutorial, you will be able to load and visualize DICOM volumes with 3D Slicer, and to interact in 3D with structural images and models of the anatomy.

©2012-2014 Surgical Planning Laboratory, ARR

Overview

Part I: Introduction to the 3DSlicer software

Part II: 3D Data Loading and visualization of DICOM images

- Volume Rendering of thoraco-abdominal CT data
- Surface Rendering of MR head data

Part III: 3D interactive exploration of the anatomy

- Exploration of the Segments of the liver

3

- Exploration of the Segments of the lung

©2012-2014 Surgical Planning Laboratory, ARR

Tutorial Datasets

The tutorial data include 4 datasets:

- 3D Visualization DICOM images part 1:
- dataset1_Thorax_Abdomen
- dataset2_Head

3D Visualization DICOM images part 2

- dataset3_Liver
- dataset4_Chest

4

Introduction to the 3DSlicer software

©2012-2014 Surgical Planning Laboratory, ARR

3D Slicer is a freely available open-source platform for segmentation, registration and 3D visualization of medical imaging data.

3D Slicer is a multi-institutional effort supported by the National Institute of Health.

©2012-2014 Surgical Planning Laboratory, ARR

- 3DSlicer version 4.3 is a multiplatform software running on Windows, Linux, and Mac OSX
- Slicer is distributed under a BSD license with no restriction on use
- Slicer is a tool for research, and is not FDA approved

Disclaimer

It is the responsibility of the user of 3DSlicer to comply with both the terms of the license and with the applicable laws, regulations and rules.

©2012-2014 Surgical Planning Laboratory, ARR

An interdisciplinary platform

An open-source environment for software developers

An end-user application for clinical investigators and scientists

A software platform that is both easy to use for clinical researchers and easy to extend for programmers

©2012-2014 Surgical Planning Laboratory, ARR

 1997: Slicer started as a research project between the Surgical Planning Lab (Harvard) and the CSAIL (MIT)

3D visualization of surface models of the brain

58 ©2012-2014 Surgical Planning Laboratory, ARR

3D Data Loading and Visualization

- This tutorial is a short introduction to the advanced 3D visualization capabilities Slicer
- The Slicer4 Minute dataset is composed of an MR scan of the brain and 3D surface reconstructions of anatomical structures.
- The data are part of the SPL Multi-modality MRIbased atlas of the brain by Halle et al. The atlas is available at:

http://www.spl.harvard.edu/publications/item/view/2037
