Re: Image Processing LLC's Patent Portfolio

Dear Mr. Joo:

As you know, General Patent Corporation is the Managing Member of Image Processing Technologies LLC (IPT) and represents IPT in connection with the licensing of its portfolio of patents. I write on behalf of IPT.

As we informed you last December, Claim 1 of the '293 Patent survived Samsung's IPR challenge. We continue to believe that LG infringes Claim 1 of the '293 Patent. Attached is a claim chart illustrating that infringement.

Please let me know if LG is interested in entering into licensing negotiations with IPT while we await PTAB decisions on the remaining IPRs. Significant financial incentives are still available prior to completion of the IPRs and up to the trial date. However, as you will appreciate, in the event of a successful outcome little or no incentives will be available.

If you have any questions, I can be reached at +(845) 368-4000 ext. 114 or at Mshahanah@GeneralPatent.com. We look forward to reaching an amicable resolution.

Sincerely yours,

GENERAL PATENT CORPORATION

Michael E. Shanahan
