(57) **ABSTRACT**

A method for the online modification, submission and approval processing of a future payment request to afford a user the ability to renegotiate established loan agreement debt terms in which network communications are established between a user, such as a debtor, and a computing device, such as a server or server arrangement, is presented. The method comprises receiving information, at the computing device, regarding the loan agreement debt terms, presenting received information to a debtor, providing an interactive environment enabling a debtor to modify existing terms, submitting modified terms, processing data from the available information using a rules based engine, and processing a future payment request based on at least one decision made by the rules based engine. While online, the user/debtor may engage in revising a rejected future payment request in an attempt to reach a satisfactory renegotiation of debt terms.

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
