

UNITED STATES PATENT AND TRADEMARK OFFICE

BEFORE THE PATENT TRIAL AND APPEAL BOARD

VOLKSWAGEN GROUP OF AMERICA, INC.
Petitioner

v.

NEO WIRELESS, LLC
Patent Owner

Case IPR2022-01539
U.S. Patent No. 10,965,512

**DECLARATION OF DR. PAUL MIN IN SUPPORT OF PETITION FOR
INTER PARTES REVIEW OF U.S. PATENT NO. 10,965,512**

Mail Stop PATENT BOARD
Patent Trial and Appeal Board
U.S. Patent & Trademark Office
P.O. Box 1450
Alexandria, VA 22313-1450

TABLE OF CONTENTS

I.	INTRODUCTION	1
II.	GROUNDS OF UNPATENTABILITY	2
III.	QUALIFICATIONS	3
IV.	MATERIALS CONSIDERED	7
V.	LEGAL UNDERSTANDING.....	9
	A. My Understanding of Claim Construction.....	9
	B. My Understanding of Obviousness	10
	C. A Person of Ordinary Skill in the Art.....	12
VI.	OVERVIEW OF THE '512 PATENT	13
VII.	TECHNOLOGY OVERVIEW	16
	A. Cellular systems implemented OFDM and OFDMA for providing downlink signals	17
	B. OFDM/OFDMA cellular systems implemented pilot signals for channel estimation and data recovery	22
	C. OFDM/OFDMA systems implemented multiple types of pilot symbols.....	25
	D. Cellular systems routinely implemented beamforming for transmitting downlink signals	26
VIII.	PROSECUTION HISTORY SUMMARY	27
IX.	LEVEL OF ORDINARY SKILL IN THE ART	27
X.	CLAIM CONSTRUCTION	28
XI.	OVERVIEW OF THE PRIOR-ART.....	28
	A. Kim.....	28
	B. Ketchum	35
	C. Tong	38
	D. Li	39
	E. Smee.....	40
XII.	GROUND 1: THE COMBINATION OF KIM AND TONG TEACHES CLAIMS 1-30.....	42

Declaration of Dr. Paul Min
U.S. Patent No. 10,965,512

A.	A POSA would have been motivated to combine Kim and Tong.....	42
1.	A POSA would have been motivated to implement beamforming in Kim’s base station, as taught by Tong.....	42
2.	A POSA would have been motivated to use Kim’s pilots for channel estimation, and to recover the transmitted data, as taught by Tong.....	46
B.	Independent Claim 1.....	50
1.	[1.P]: An orthogonal frequency division multiple access (OFDMA)-compatible base station that uses subcarriers in a frequency domain and time slots in a time domain, the OFDMA-compatible base station comprising:	51
2.	[1.1] a plurality of antennas; and a transmitter operably coupled to the plurality of antennas;.....	52
3.	[1.2] the transmitter configured to: insert first pilots of a first type onto a first plurality of subcarriers, wherein the first pilots are cell-specific pilots; and.....	53
4.	[1.3] insert data and second pilots of a second type onto a second plurality of subcarriers;	57
5.	[1.4] wherein at least some subcarriers of the first plurality of subcarriers or the second plurality of subcarriers are beam-formed; and.....	61
6.	[1.5] the plurality of antennas configured to transmit the first plurality of subcarriers and the second plurality of subcarriers in at least one of the time slots;	63
7.	[1.6] wherein the second type is different than the first type and wherein the first pilots do not interfere with the second pilots.....	66
C.	Independent Claim 8.....	67
1.	[8.P] A method performed by an orthogonal frequency division multiple access (OFDMA)-compatible base station that uses subcarriers in a frequency domain and time slots in a time domain, the method comprising:	67
2.	[8.1] inserting, by the OFDMA-compatible base station, first pilots of a first type onto a first plurality of subcarriers, wherein the first pilots are cell-specific pilots;.....	67

Declaration of Dr. Paul Min
U.S. Patent No. 10,965,512

3. [8.2] inserting, by the OFDMA-compatible base station, data and second pilots of a second type onto a second plurality of subcarriers;67
 4. [8.3] wherein at least some subcarriers of the first plurality of subcarriers or the second plurality of subcarriers are beam-formed; and.....68
 5. [8.4] transmitting, by the OFDMA-compatible base station, the first plurality of subcarriers and the second plurality of subcarriers in at least one of the time slots using a plurality of antennas;.....68
 6. [8.5] wherein the second type is different than the first type and wherein the first pilots do not interfere with the second pilots.68
- D. Independent Claim 1568
1. [15.P] An orthogonal frequency division multiple access (OFDMA)-compatible mobile station that uses subcarriers in a frequency domain and time slots in a time domain, the OFDMA-compatible mobile station comprising:68
 2. [15.1] at least one antenna; and a receiver; and69
 3. [15.2] the at least one antenna and the receiver are configured to: receive first pilots of a first type on a first plurality of subcarriers, wherein the first pilots are cell-specific pilots; and70
 4. [15.3] receive second pilots of a second type and data on a second plurality of subcarriers, wherein the first plurality of subcarriers and the second plurality of subcarriers are received in at least one of the time slots;71
 5. [15.4] wherein at least some subcarriers of the first plurality of subcarriers or the second plurality of subcarriers are beam-formed; and.....71
 6. [15.5] the receiver is further configured to: recover the data using channel estimates from at least the second pilots; and ...72
 7. [15.6] recover cell-specific information using the cell-specific pilots;.....75

*Declaration of Dr. Paul Min
U.S. Patent No. 10,965,512*

8.	[15.7] wherein the second type is different than the first type and wherein the first pilots do not interfere with the second pilots.....	75
E.	Independent Claim 23	75
1.	[23.P] A method performed by an orthogonal frequency division multiple access (OFDMA)-compatible mobile station that uses subcarriers in a frequency domain and time slots in a time domain, the method comprising:	76
2.	[23.1] receiving first pilots of a first type on a first plurality of subcarriers, wherein the first pilots are cell-specific pilots;	76
3.	[23.2] receiving second pilots of a second type and data on a second plurality of subcarriers, wherein the first plurality of subcarriers and the second plurality of subcarriers are received in at least one of the time slots;	76
4.	[23.3] wherein at least some subcarriers of the first plurality of subcarriers or the second plurality of subcarriers are beam-formed;	76
5.	[23.4] recovering the data using channel estimates from at least the second pilots; and.....	76
6.	[23.5] recovering cell-specific information using the cell-specific pilots;.....	77
7.	[23.6] wherein the second type is different than the first type and wherein the first pilots do not interfere with the second pilots.....	77
F.	Claims 2, 9, 16, and 24	77
G.	Claims 3, 10, 17, and 25.....	78
H.	Claims 4, 11, 18, and 26.....	80
I.	Claims 5, 12, 21, and 29.....	81
J.	Claims 6, 13, 20, and 28.....	82
K.	Claims 7 and 14	82
L.	Claims 19 and 27	83
M.	Claims 22 and 30	84

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
