Election Restrictions

During a telephone conversation with Charles Kulas on 4/22/08 a provisional election was made without traverse to prosecute the invention of I, claims 1-10, 46-49. Affirmation of this election must be made by applicant in replying to this Office action. Claims 11-45 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10, 46-49, drawn to a system for monitoring a fire comprising a plurality of devices, classified in class 340, subclass 870.05.
- II. Claims 11-16, 41-45, drawn to a method comprising dispersing several self-networking nodes in a region, classified in class 340, subclass 539.22.
- III. Claims 17-40, drawn to selectively controlling the sensor network, classified in class 348, subclass 153.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because of both reasons. The subcombination has separate utility such as monitoring a fire.
