670 PATENT LIST OF CLAIMS IN CONTENTION	ix
I. Background and Qualifications	2
A. Qualifications	2
B. Technology Background	9
C. Materials Reviewed	16
II. Relevant Legal Standards	16
III. The 670 Patent	20
A. Overview of the 670 Patent	20
B. Overview of the 670 patent's File History	21
C. Person of Ordinary Skill in the Art	22
D. Claim Construction	23
E. Non-Functional Descriptive Material	28
IV. Overview of the Prior Art References	29
A. EX1004- Shanman	29
B. EX1005- Ogasawara	32
C. EX1006 - Beach	35
D. EX1030 - Bezos	37
E. EX1031 - Shelton	37
V. Ground 1: Shanman Renders Obvious Claims 1, 2, 4, 6-10, 12 and 14	39
A. Claim 1	39
1. [1pre] A method of providing product location information within a store, the method comprising the steps of:	39
2. [1a] providing at least one information storage device including a database, wherein the at least one information storage device is configured to be at least indirectly in communication with at least one other device that includes at least one user interface, and wherein at least one of the at least one information storage device and the at least one other device with respect to which the at least one information storage device is configured to be at	

	least indirectly in communication is or includes a mobile device;	40
3.	[1b] wherein the at least one information storage device includes both product location information and additional product-related information linking a product with another product in a cross-referential manner;	41
4.	[1c] receiving a product location inquiry signal regarding the product, the product location inquiry signal being at least indirectly based upon a product location inquiry received by way of the at least one user interface;	44
5.	[1d] processing the product location inquiry signal at a signal processing device to determine a processed product location inquiry signal;	46
6.	[1e] querying the at least one information storage device to obtain portions of the product location information and additional product-related information in response to the processed product location inquiry signal;	48
7.	[1f] providing a product location information signal that is at least indirectly responsive to the processed product location inquiry signal;	50
8.	[1g] wherein the product location information signal is configured to enable, at least indirectly, a providing of an output signal at an output device as a response to the product location inquiry that includes location information concerning the product and also provides at least one suggestion related to the other product.	51
B.	Claim 2. The method of claim 1, wherein the product location information signal is configured to enable, at least indirectly, the providing of the output signal at the least one user interface, which includes the output device in addition to an input device.	52
C.	Claim 4. The method of claim 2, wherein the at least one user interface includes a mobile user interface.	52
D.	Claim 6. The method of claim 4, wherein the product location information signal is configured to enable, at least indirectly, the at least one user interface to provide information concerning one or more products that are being specially promoted or that are located close by the at least one user interface.	53

E.	Claim 7. The method of claim 4, wherein the product location information signal is configured to enable, at least indirectly, the providing of the output signal so that the output signal provides at least one further suggestion to a customer in accordance with one or more customer preferences.....	55
F.	Claim 8. The method of claim 4, wherein the product location information signal is configured to enable, at least indirectly, the at least one user interface to provide further additional product-related information, and wherein the further additional product-related information includes at least one of: product promotion information; a current stock of the product; a price of the product; a presence or absence of the product within the store; a time at which the product should be available at the store if the product is currently absent from the store; and an alternate way of obtaining the product if the product is currently absent from the store.	56
G.	Claim 9. The method of claim 8, wherein the further additional product-related information relates to either the time at which the product should be available at the store if the product is currently absent from the store, or the alternate way of obtaining the product if the product is currently absent from the store.....	59
H.	Claim 10. The method of claim 8, wherein the further additional product-related information relates to either the current stock of the product, or the presence or absence of the product within the store...	59
I.	Claim 12. The method of claim 4, further comprising one or both of: receiving an additional inquiry signal that relates to something other than a product location-type inquiry; or obtaining identification information concerning the customer that at least in part allows for the providing of an additional suggestion to the customer.	60
J.	Claim 14. The method of claim 1, wherein either (a) the mobile device is able to provide at least some of the information to the at least one user interface, or (b) at least a first one of the at least one user interface is in wireless communication with either a central hub or at least a second one of the at least one user interface, or (c) one or more words associated with the product location inquiry received by way of the at least one user interface are determined by way of a voice recognition process.....	62
VI.	Ground 2: Ogasawara and Beach Render Obvious Claims 1, 2, 4, 6-10, 12 and 14.....	64

A.	Claim 1	64
1.	[1pre] A method of providing product location information within a store, the method comprising the steps of:	64
2.	[1a] providing at least one information storage device including a database, wherein the at least one information storage device is configured to be at least indirectly in communication with at least one other device that includes at least one user interface, and wherein at least one of the at least one information storage device and the at least one other device with respect to which the at least one information storage device is configured to be at least indirectly in communication is or includes a mobile device	64
3.	[1b] wherein the at least one information storage device includes both product location information and additional product-related information linking a product with another product in a cross-referential manner;	67
4.	[1c] receiving a product location inquiry signal regarding the product, the product location inquiry signal being at least indirectly based upon a product location inquiry received by way of the at least one user interface;	71
5.	[1d] processing the product location inquiry signal at a signal processing device to determine a processed product location inquiry signal	72
6.	[1e] querying the at least one information storage device to obtain portions of the product location information and additional product-related information in response to the processed product location inquiry signal	73
7.	[1f] providing a product location information signal that is at least indirectly responsive to the processed product location inquiry signal;	75
8.	[1g] wherein the product location information signal is configured to enable, at least indirectly, a providing of an output signal at an output device as a response to the product location inquiry that includes location information concerning the product and also provides at least one suggestion related to the other product.	76

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
