

ABYC H-27 July 2021

Machinery Division Standard

Hull Piping Project
Technical Committee

The ABYC Standards and Technical Information Reports for Small Craft are the product of a consensus of representatives of government, industry, and public sectors. It is intended solely as a guide to aid manufacturers and the marine community in the design, construction, equipage, and maintenance of small craft.

ABYC reviews each standard at least every five years at which time it may be reaffirmed, revised, or withdrawn. ABYC welcomes any written comments on the standards and technical information reports.

ABYC H-27

SEACOCKS, THRU-HULL FITTINGS, AND DRAIN PLUGS

Origin and Development

ABYC H-27 first appeared in 1972 as H-27, *Seacocks, Through-Hull Connections, Outboard Water Strainers, Water Scoops and Drain Plugs*. Revised editions were published in 1988, 1997, and 2008. In July 2014 H-27 was revised and renamed *Seacocks, Thru-Hull Fittings, and Drain Plugs*. The 2021 revision is the work of the Hull Piping Project Technical Committee.

Hull Piping Project Technical Committee

This list represents the membership at the time the committee was balloted.

Jon Sheller, *Chair*

Simon McFarland, *Vice Chair*

Pat Armano
Scott Berry
Paul Campagna
Steve D'Antonio

Ulrich Heinemann
Bob Holt
Eric Johnson
David Marlow

Derek Rhymes
Ed Wiser

Membership on a committee shall not in and of itself constitute an endorsement of ABYC or any document developed by the committee on which the member serves.

This standard, which is the result of extended and careful consideration of available knowledge and experience on the subject, was developed under procedures accredited as meeting the criteria for American National Standards and is intended to provide minimum performance requirements. The Project Technical Committee that approved the standard was balanced to ensure that individuals from competent and concerned interests have had an opportunity to participate.

ABYC's Project Technical Committee (PTC) meetings are open to the public. All inquiries regarding standards activity, interpretations, or meeting attendance should be directed to the ABYC Technical Department at comments@abycinc.org.

ABYC and its committees do not "approve" or "endorse" any item, construction, or proprietary device.

Request for Interpretations

Upon written request the Hull Piping PTC will render an interpretation of any requirement of the standard. The request for interpretation should be clear and unambiguous. Requests should be presented to the PTC in a manner in which they may be answered in a "Yes" or "No" fashion.

The committee reserves the right to reconsider any interpretation when or if additional information that might affect it becomes available to the PTC. Persons aggrieved by an interpretation may appeal to the committee for reinterpretation.

Summary of Revisions

This list indicates revisions to the standard when compared with the previously published version. It is not intended to be used independently of the standard. It should be used for informational purposes and as a guide to the official requirements contained in this standard. It is the responsibility of the user to read and understand the complete standard.

The main changes in this revision of H-27, *Seacocks, Thru-Hull Fittings, and Drain Plugs* as compared with the previous edition dated 7/14, are:

- Scope and Purpose were combined and revised
- Units of Measure section was added
- Definitions were added
- Requirements from UL 1121 were incorporated

DISCLAIMER

ABYC technical board rules provide that all reports, including standards and technical information reports, are advisory only. Their use is entirely voluntary. They represent, as of the date of publication, the consensus of knowledgeable persons currently active in the field of small craft on performance objectives that contribute to small boat safety.

The American Boat & Yacht Council assumes no responsibility whatsoever for the use of, or failure to use, standards or technical information reports promulgated by it, their adaptation to any processes of a user, or any consequences flowing therefrom.

Prospective users of the standards and technical information reports are responsible for protecting themselves against liability for infringement of patents. The American Boat & Yacht Council Standards and Technical Information Reports are used to achieve a specific level of design or performance, and are not intended to preclude attainment of desired results by other means.

H-27 SEACOCKS, THRU-HULL FITTINGS, AND DRAIN PLUGS

Based on ABYC's assessment of the existing technology, and the problems associated with achieving the goals of this standard, ABYC recommends compliance with this standard for all boats, associated equipment, and systems manufactured after July 31, 2022.

27.1 SCOPE

This standard applies to the selection of materials, design, construction, and installation of seacocks, thru-hull fittings, drain plugs, and other fittings intended for the passage of water in or out of a boat that penetrate the hull at or below the maximum heeled waterline. This standard applies to all boats.

27.2 UNITS OF MEASURE

Values stated without parentheses are the requirement. Values in parentheses are explanatory or approximate.

27.3 REFERENCES

The following references form a part of this standard. Unless otherwise noted the latest version of the referenced standards shall apply.

SAE J30, *Fuel and Oil Hoses*

27.4 DEFINITIONS

For the purposes of this standard, the following definitions apply.

27.4.1 Drain Plug - removable plug that allows the draining of the bilge.

27.4.2 Maximum Heeled Waterline - the level of the water on the hull when the hull is inclined to:

27.4.2.1 for powerboats, an angle of seven degrees, or

27.4.2.2 for sailboats, the level of sheer amidships.

27.4.3 Readily Accessible - capable of being reached quickly and safely for effective use under emergency conditions without the use of tools.

27.4.4 Reinforced Hose - a hose manufactured with a secondary matrix or material to increase the strength and resists crushing and kinking (e.g., hose constructed with a fiber mesh or wire helix).

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
