Radio Access Network status after RAN#43

News Archives

The RAN#43 Meeting in Biarritz was as busy as ever, with the added responsibility of holding elections to appoint their new Chairman and Vice-Chairmen.

The other main achievements included the creation of several new work items for Release 9, the continued progress on the IMT submission, the completion of work on Support of UTRA HNB, the LTE ASN.1 freeze, progress on test specification work...and approving Change Requests to Release 8 specifications:
