Some pretty stunning stats from market analytics firm OneStat.com, which is reporting that Microsoft's Windows OS family of products has 97% of the operating system market - "a global usage share of 96.97 percent", to be exact. The leading OS on the web is Windows XP, with 86.80% share. Microsoft's Windows 2000 has a global usage share of 6.09 percent and is the second most popular OS on the web.

Meanwhile OneStat.com claims that Apple Macintosh has only 2.47 percent and Linux a mere 0.36 percent. OneStat.com says this research is "is based on a sample of 2 million visitors divided into 20,000 visitors of 100 countries each day."

The 10 most popular operating systems in the world on the web according to OneStat.com are:

1.	Windows XP	86.80%
2.	Windows 2000	6.09%
3.	Windows 98	2.68%
4.	Macintosh	2.32%

And when I say the biggest, I am not kidding

This 10-inch car display brings Apple CarPlay or Android Auto to your dash for $110.

StackSocial

Integration of advanced technology into everyday life continues to accelerate, and the automotive sphere is no exception. While newer cars sport the latest features, most notably some sort of touchscreen interface, it's now possible to bring those innovations to older models.

This 10-inch wireless touchscreen display mounts on your dashboard to bring Apple CarPlay, Android Auto, and other conveniences to your fingertips or those of someone on your gift list. Right now you can get this accessory upgrade for just $110 ahead of the holidays, a savings of 45% off. And If you purchase by 11:59 p.m. PT on Dec. 7, it's guaranteed to arrive by Christmas.

10" Touchscreen Wireless/Wi-Fi/Bluetooth Car Display with Apple CarPlay & Android Auto Support

And when I say the biggest, I am not kidding.

Setup is rather simple: use the mounting accessories and bracket to securely attach the screen to your dashboard; plug it into your car's lighter for power; and decide whether you want to use the AUX cable to connect to your car's existing speakers, or use those built into the display.

From there, navigate the Android operating system to access Apple CarPlay or Android Auto. That's where you'll find navigation apps like Google Maps and Waze, your phone's messages and phone apps, and other compatible apps like Spotify, Podcasts, and even YouTube. Certain apps will require a Wi-Fi connection, but your phone's hotspot will do just fine.

While using CarPlay or Android Auto, you'll also have access to Siri or Google Assistant for a number of hands-free features like making calls, sending texts, asking it to play a song, or getting last-minute directions. The result is a safer driving experience.

Another notable capability of this touchscreen display is integration with your car's existing rear backup camera. If your vehicle is equipped, the screen automatically switches to that camera when shifted into reverse and shows helpful parking guidelines to help you maneuver into a spot.

You don't have to get a brand-new car to enjoy the latest features when you have this 10-inch wireless touchscreen display on your dashboard. Until Dec. 17, get it for just $110 -- but if you order by the end of the day on Dec. 7, you can ensure on-time holiday delivery to give it as a Christmas gift.

DOCKET ALARM

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS
Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS
Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS
Sync your system to PACER to automate legal marketing.
